MARCH 2024 / FACTSHEET

OVERALL
MORNINGSSTAR RATING™*

1. The Fund invests primarily in equity and equity-related securities of companies incorporated in, or having a significant proportion of their assets or other interests, or carrying on their principal business in or from, emerging market countries.
2. The Fund is subject to risks, such as investment, equities and equity-related instruments, liquidity, counterparty, currency risks and the risks of investing in small and mid-capitalisation companies.
3. The Fund's investment may be concentrated in specific countries, regions and sectors and the value of the Fund may be more volatile. Investing in emerging and frontier markets may involve increased risks, including liquidity, currency/currency control, political and economic uncertainties, legal and taxation, settlement, custody and volatility risks.
4. The Manager integrates environmental, social and governance (ESG) information into the investment process, which may affect the Fund's investment performance and, as such, may perform differently compared to similar collective investment schemes.
5. Dividends may be paid out of unrealised capital gains at the discretion of the Managers which would effectively represent paying dividend out of capital. This amounts to a return or withdrawal of part of an investor's original investment or any capital gains attributable to that original investment. Payment of dividends may result in an immediate reduction of the net asset value of the Fund per unit.
6. Investors may suffer substantial loss of their investments in the Fund.
