

Dividend Summary

Important Information

- The Fund invests primarily in an actively managed globally diversified portfolio of fixed income instruments.
- The Fund is subject to risks relating to investment, credit, interest rate, volatility and liquidity, downgrading, sovereign debt, valuation, credit rating, counterparty and currency risks, as well as risks associated with collateralised and/or securitised products. The Fund's investment may be concentrated in specific countries or regions and the value of the Fund may be more volatile.
- The Fund's investment in sub-investment grade or unrated debt securities may be subject to higher liquidity, volatility and credit risks than high-rated debt securities, as well as increased risk of loss of principal and interest.
- RMB classes are subject to RMB currency risks. RMB is currently not freely convertible and conversion of RMB is subject to foreign exchange control policies and restrictions. There is no guarantee that RMB will not be subject to depreciation. Under exceptional circumstances, payment of realisation proceeds and/or dividend payment from underlying investments to the Fund in RMB may be delayed.
- The Fund may invest in derivatives for investment or efficient portfolio management purposes which may involve counterparty/credit, liquidity, valuation, volatility and over-the-counter transaction risks. Exposure to derivatives may lead to a high risk of significant loss by the Fund.
- The Fund's investment in debt instruments with loss-absorption features ("LAP") are subject to risks of contingent write-down or contingent conversion to ordinary shares upon occurrence of complex and unpredictable trigger events which may result in higher price volatility and total loss of amount invested. LAP may also be exposed to liquidity, valuation and sector concentration risk.
- Dividends may be paid out of unrealised capital gains at the discretion of the Manager which would effectively represent paying dividend out of capital. This amounts to a return or withdrawal of part of an investor's original investment or any capital gains attributable to that original investment. Payment of dividends may result in an immediate reduction of the net asset value of the Fund per unit.
- Investors may suffer substantial loss of their investments in the Fund.

Dividend is not guaranteed, subject to Fund manager's discretion. A positive yield does not imply a positive return of the Fund. Annualised dividend yield is for reference only.

The amount of dividend payout for the period depends upon the number of units held by the investors as of the record date for that period's distribution and the relevant annualized dividend yield is calculated using the formula: $[(1 + \text{Distribution per unit for the period} / \text{ex-dividend date NAV per unit})^2] - 1$. For unit classes aiming to pay dividend on a regular basis, dividend rate is not guaranteed. Dividend can be paid out from capital. Please refer to point 7 of the Important Information.

¹Annualised dividend yield is denominated in the currency of the respective share class. US/HK dollar-based investors are therefore exposed to fluctuations in the exchange rate of the relevant currency against US/HK dollar.
