Best Global Fixed Income Manager | 2023, 2024

AS OF 30 NOVEMBER 2024

OVERALL MORNINGSTAR RATING™<sup>7</sup>

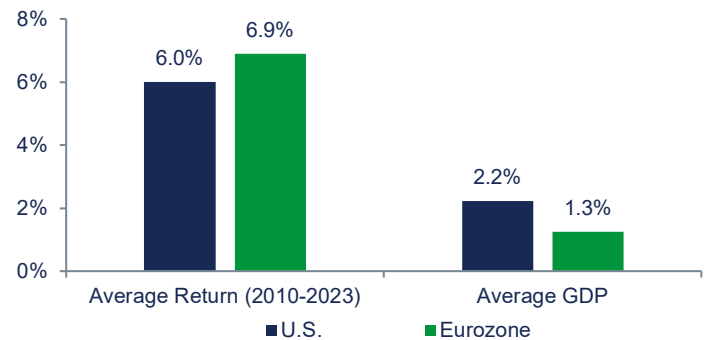

1. The Fund is subject to risks relating to investment, concentration, credit, interest rate fluctuations, downgrading, valuation, credit rating, and currency risks. The Fund's investment may be concentrated in North American and European markets and the value of the Fund may be more volatile. Further, investment in countries within the Eurozone may involve Eurozone sovereign debt crisis risks.
2. The Fund's investment in sub-investment grade or unrated debt instruments may be subject to higher liquidity, volatility and credit risks than investment grade instruments, as well as increased risk of loss of principal and interest.
3. RMB classes are subject to RMB currency risks. RMB is currently not freely convertible and conversion of RMB is subject to foreign exchange control policies and restrictions. There is no guarantee that RMB will not be subject to depreciation. Under exceptional circumstances, payment of realisation proceeds and/or dividend payment from underlying investments to the Fund in RMB may be delayed.
4. The Fund may invest in derivatives for hedging and/or investment purposes which may involve counterparty/credit, liquidity, valuation, volatility and over-the-counter transaction risks. Exposure to derivatives may lead to a high risk of significant loss by the Fund.
5. The Fund's investment in debt instruments with loss-absorption features ("LAP") are subject to risks of contingent write-down or contingent conversion to ordinary shares upon occurrence of complex and unpredictable trigger events which may result in higher price volatility and total loss of amount invested. LAP may also be exposed to liquidity, valuation and sector concentration risk.
6. Dividends, at the discretion of the Directors, may be paid out of unrealised capital gains and/or gross income while charging some or all fees and expenses out of capital (which represent effectively paying dividends out of capital), resulting in an increase in distributable income. The Fund may also pay dividends directly out of capital. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or any capital gains attributable to that original investment and results in an immediate reduction of the Fund's net asset value per share.
7. Investors may suffer substantial loss of their investments in the Fund.

## WHY BARINGS GLOBAL HIGH YIELD BOND FUND (THE "FUND")?

### 1. LOW GDP GROWTH HAS LIMITED IMPACT ON HIGH YIELD ISSUERS

Historically, the high yield market has performed reasonably well in low growth environments. For instance, since 2010—despite Europe experiencing slower growth versus the U.S.—the European high yield bond market has been able to consistently outperform the U.S. on a like for like currency hedged basis.

High Yield Does Not Require Strong Growth to Perform Well<sup>8</sup>

### 2. HIGHER CREDIT QUALITY PROFILE RELATIVE TO HISTORY

It is worth noting that high yield bond markets remain on solid footing and have one of the highest credit rating profiles today relative to history. Many issuers are BB-rated, and only 11% of the market is comprised of CCC-rated companies.

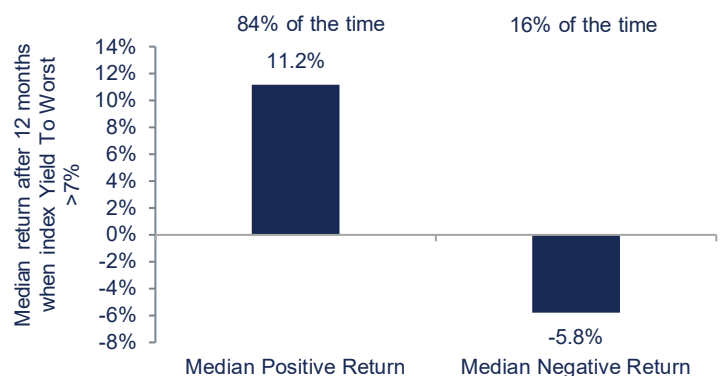

Improved Credit Quality Profile<sup>9</sup>

### 3. HIGH INCOME COULD PROVIDE A CUSHION IN A POTENTIALLY DETERIORATING MACRO ENVIRONMENT

In the last 20 years, investments in high yield bonds at yields above 7% generated a positive return in the subsequent 12 months 84% of the time, with a median return of 11%.

Higher yields may provide margin of safety<sup>10</sup>

## FUND OBJECTIVES<sup>11</sup>

The Fund invests principally in a portfolio of high yield (i.e. sub-investment grade) fixed and floating rate corporate bonds, notes and other fixed and floating rate income securities, focusing primarily on North American and European high yield instruments which are listed or traded on recognised markets in Europe or North America.
