PORTFOLIO
MANAGERS

James Govan, CFA
23 years of experience

1. The Fund invests in a diversified portfolio of the securities of Commodity Producers, being companies engaged in the extraction, production, processing and/or trading of commodities such as oil, gold, aluminium, coffee and sugar.
2. The Fund is subject to risks, such as investment, equities and equity-related securities, liquidity, counterparty, currency risks and the risks of investing in small and mid-capitalisation companies.
3. The Fund's investment may be concentrated in the Commodity Producers and the value of the Fund may be more volatile. Investing in emerging markets may involve increased risks, including liquidity, currency/currency control, political and economic uncertainties, legal and taxation, settlement, custody and volatility risks.
4. The Manager integrates environmental, social and governance (ESG) information into the investment process, which may affect the Fund's investment performance and, as such, may perform differently compared to similar collective investment schemes.
5. The Fund may invest in derivatives for investment or efficient portfolio management purposes which may involve counterparty/credit, liquidity, valuation, volatility and over-the-counter transaction risks. Exposure to derivatives may lead to a high risk of significant loss by the Fund.
6. Dividends may be paid out of unrealised capital gains at the discretion of the Manager which would effectively represent paying dividend out of capital. This amounts to a return or withdrawal of part of an investor's original investment or any capital gains attributable to that original investment. Payment of dividends may result in an immediate reduction of the net asset value of the Fund per unit.
7. Investors may suffer substantial loss of their investments in the Fund.

OBJECTIVE

The investment objective of the Fund is to achieve long-term capital appreciation through investment in a diversified portfolio of the securities of Commodity Producers, being issuers engaged in the extraction, production, processing and/or trading of commodities such as oil, gold, aluminium, coffee and sugar.

STRATEGY

The Investment Manager believes that equity markets contain unrecognised growth potential and seeks to identify this through the analysis of a company's business model whilst incorporating wider economic and social governance trends, often referred to as fundamental analysis.
