Barings Hong Kong China Fund

**Bloomberg Businessweek (Chinese
Edition) Top Fund Awards¹**

China Equity—Outstanding Performer—Mutual
Funds (10 years) | 2024

AS OF 30 JUNE 2025

OVERALL
MORNINGSTAR RATING™²
★★★★

1. The Fund is subject to risks, such as investment, equities and equity-related securities, liquidity, counterparty, currency risks and the risks of investing in small and mid-capitalisation companies.
2. The Fund's investment may be concentrated in the Hong Kong and China markets and the value of the Fund may be more volatile. Investing in emerging markets may involve increased risks, including liquidity, currency/currency control, political and economic uncertainties, legal and taxation, settlement, custody and volatility risks.
3. The Manager integrates environmental, social and governance (ESG) information into the investment process, which may affect the Fund's investment performance and, as such, may perform differently compared to similar collective investment schemes.
4. The Fund may have exposure to financial derivative investments for investment or efficient portfolio management purposes which may involve counterparty/credit, liquidity, valuation, volatility and over-the-counter transaction risks. Exposure to financial derivative investments may lead to a high risk of significant loss by the Fund.
5. Dividends may be paid out of unrealised capital gains at the discretion of the Manager which would effectively represent paying dividend out of capital. This amounts to a return or withdrawal of part of an investor's original investment or any capital gains attributable to that original investment. Payment of dividends may result in an immediate reduction of the net asset value of the Fund per unit.
6. Investors may suffer substantial loss of their investments in the Fund.

WHY BARINGS HONG KONG CHINA FUND (THE "FUND")?

1. LONG-ESTABLISHED TRACK RECORD SUPPORTED BY OUTSTANDING PERFORMANCE

Barings has extensive experience investing in Chinese equities, having managed dedicated Chinese equity portfolios for over 42 years. The Fund has demonstrated strong resilience over different market cycles and delivered a solid track record over the longer term.

2. UNDEMANDING VALUATIONS COULD PRESENT AN ATTRACTIVE ENTRY POINT

Chinese equities have rebounded since mid-2024, supported by a fiscal package, the emergence of DeepSeek, and improving sentiment in the private sector. Despite this recovery, valuations remain attractive relative to broader emerging and developed markets. Looking ahead, we expect ongoing policy support for targeted sectors, steady capital inflows into Hong Kong and China, and a strong pipeline of IPOs in the Hong Kong stock market to sustain momentum through the rest of the year.

3. AI IS EXPECTED TO BE A KEY DRIVER OF GROWTH

Similar to other markets, Artificial Intelligence (AI) is expected to be a major driver of increased productivity in China. In particular, given China's focus on productivity enhancement, and the previous level of labor intensity, AI's contribution to China's GDP is expected to be outsized compared to other markets across the world. The recent success of DeepSeek effectively circumvents key hurdles for China to cultivate its own AI models—which should have structurally positive implications for hardware and software companies in China.

FUND OBJECTIVES⁶

To achieve long-term capital growth in the value of assets by investing in Hong Kong, China and Taiwan.
