Barings Umbrella Fund Plc

Introduction

Barings Umbrella Fund Plc (the "Company") is incorporated as an Irish open-ended umbrella investment company with variable capital and segregated liability between sub-funds. The Company is authorised by the Central Bank of Ireland (the "CBI") under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and under the Central Bank (Supervision & Enforcement) Act 2013 (Section 48(1) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (together, the "UCITS Regulations"). The Company's shares are listed on the Euronext Dublin, Global Exchange Market.

The registered office of the Company is 70 Sir John Rogerson's Quay, Dublin, D02 R296, Ireland.

The investment objective of each Sub-Fund is to provide high current income generation, and where appropriate, capital appreciation. The investment activities of all Sub-Funds are managed by Baring Asset Management Limited and Barings LLC (the "Investment Managers"). The administration of the Company is delegated to State Street Fund Services (Ireland) Limited (the "Administrator").

Shares representing interests in different sub-funds may be issued from time to time by the Company. As at 31 December 2025, the Company had 11 active sub-funds (the "Sub-Funds"). The Company may create additional Sub-Funds, with the prior approval of the CBI.

These financial statements are in respect of the Swiss registered funds listed below. The full report of the Company is available free of charge on request from the Manager.

The following Sub-Funds have been approved by the CBI:

Sub-Fund	Launch Date
Barings Global Senior Secured Bond Fund (″GSSB Fund″)	27 January 2011
Barings European High Yield Bond Fund (″EHYB Fund″)	31 May 2011
Barings Global High Yield Bond Fund (″GHYB Fund″)	30 April 2012
Barings Emerging Markets Corporate Bond Fund (″EMCB Fund″)	16 April 2014
Barings Emerging Markets Local Debt Fund (″EMLD Fund″)	16 April 2014
Barings Emerging Markets Debt Short Duration Fund (″EMDSD Fund″)	17 November 2014
Barings Income Navigator Fund (″IN Fund″)	18 November 2014
Barings Emerging Markets Debt Blended Total Return Fund (″EMDBTR Fund″)	03 December 2014
Barings Emerging Markets Sovereign Debt Fund (″EMSD Fund″)	10 September 2015
Barings U.S. High Yield Bond Fund (″USHYB Fund″)	17 February 2016
Barings Developed and Emerging Markets High Yield Bond Fund (″DEMHYB Fund″)	2 December 2022

As at 31 December 2025, all of the active Sub-Funds' share tranches are listed on the Global Exchange Market of Euronext Dublin.

As at 31 December 2025, the Company had no employees.

Hong Kong Authorised Funds

The following Sub-Funds are registered for sale in Hong Kong, and are authorised by the Hong Kong Securities and Futures Commission ("SFC") pursuant to the provisions of the Hong Kong Code on Unit Trusts and Mutual Funds, supplemented or consolidated from time to time:

Barings Global Senior Secured Bond Fund (GSSB Fund) (registered on 4 October 2018)
Barings European High Yield Bond Fund (EHYB Fund) (registered on 7 June 2024)
Barings Global High Yield Bond Fund (GHYB Fund) (registered on 4 October 2018)
Barings Income Navigator Fund (IN Fund) (registered on 20 January 2025)
Barings Emerging Markets Sovereign Debt Fund (EMSD Fund) (registered on 13 September 2019)
Barings Developed and Emerging Markets High Yield Bond Fund (DEMHYB Fund) (registered on 4 March 2022)

Within the prospectus of the above Sub-Funds it sets out requirements to comply with certain disclosure requirements of the Hong Kong Code on Unit Trusts & Mutual funds. In the opinion of the Directors the financial statements materially comply with these requirements.

None of the Sub-Funds, other than the aforementioned Sub-Funds, are authorised for sale in Hong Kong nor are they available to Hong Kong residents.

Barings Global Senior Secured Bond Fund
The investment objective of the Sub-Fund is to provide high current income generation and, where appropriate, capital appreciation. To achieve its objective, the Sub-Fund will invest principally in a portfolio of fixed and floating rate Corporate Debt Instruments, focusing primarily on North American and European senior secured High Yield Instruments which are listed or traded on Recognised Markets in Europe or North America. While the Sub-Fund will invest principally in North American and European issuers, it may also invest in issuers located in other geographic areas, subject to a limit of 5% of Net Asset Value in issuers from Emerging Markets.

The Sub-Fund will invest at least 50% of its Net Asset Value in assets which exhibit positive or improving environmental ("E") and/or social ("S") characteristics. Further information about the environmental and social characteristics promoted by the Sub-Fund is available in the SFDR Annex appended to the Supplement.

Barings European High Yield Bond Fund
The investment objective of the Sub-Fund is to provide high current income generation and, where appropriate, capital appreciation. To achieve its objective, the Sub-Fund will invest in a portfolio consisting primarily of European High Yield Instruments. European High Yield Instruments comprise High Yield fixed and floating rate Corporate Debt Instruments issued either by European corporations in any currency, or issued in a European currency by corporations established outside Europe and/or listed or traded on a Recognised Market in Europe.

The Sub-Fund will invest at least 50% of its Net Asset Value in assets which exhibit positive or improving environmental ("E") and/or social ("S") characteristics. Further information about the environmental and social characteristics promoted by the Sub-Fund is available in the SFDR Annex appended to the Supplement.

Barings Global High Yield Bond Fund
The investment objective of the Sub-Fund is to provide high current income generation and, where appropriate, capital appreciation. To achieve its objective, the Sub-Fund will invest principally in a portfolio of High Yield fixed and floating rate Corporate Debt Instruments, focusing primarily on North American and European High Yield Instruments which are listed or traded on Recognised Markets in Europe or North America.

The Sub-Fund will invest at least 50% of its Net Asset Value in assets which exhibit positive or improving environmental ("E") and/or social ("S") characteristics. Further information about the environmental and social characteristics promoted by the Sub-Fund is available in the SFDR Annex appended to the Supplement.

Barings Emerging Markets Corporate Bond Fund
The investment objective of the Sub-Fund is to seek maximum total return, consistent with preservation of capital and prudent investment management, through high current income generation and, where appropriate, capital appreciation. To achieve its objective, the Sub-Fund will invest under normal circumstances at least 80% of its net assets in an actively managed diversified portfolio consisting of fixed income instruments that are economically tied to emerging market countries including fixed income instruments that are issued by corporate issuers that are economically tied to emerging market countries.

The Sub-Fund will invest at least 50% of its Net Asset Value in assets which exhibit positive or improving environmental ("E") and/or social ("S") characteristics. Further information about the environmental and social characteristics promoted by the Sub-Fund is available in the SFDR Annex appended to the Supplement.

Barings Emerging Markets Local Debt Fund
The investment objective of the Sub-Fund is to seek long-term total return through investment in a diversified portfolio of emerging markets local currency-denominated debt securities. To achieve its objective, the Sub-Fund will invest under normal circumstances primarily in an actively managed diversified portfolio consisting of local currency fixed income instruments issued by emerging market governments and their quasi sovereign agencies (including supranational and sub-national government issues).

The Sub-Fund will invest at least 50% of its Net Asset Value in assets which exhibit positive or improving environmental ("E") and/or social ("S") characteristics. Further information about the environmental and social characteristics promoted by the Sub-Fund is available in the SFDR Annex appended to the Supplement. The Sub-Fund will also invest at least 75% of the Sub-Fund's total assets in countries that exhibit strong or improving human development conditions, as measured by the United Nations Human Development Index ("HDI") and calculated as the average of the five year period as of two years prior to the investment period. Further details of the Investment Manager's ESG policy is available in the Prospectus and the Manager's website at www.barings.com.

Barings Emerging Markets Debt Short Duration Fund
The investment objective of the Sub-Fund is to seek maximum total return, consistent with preservation of capital and prudent investment management, through high current income generation and, where appropriate, capital appreciation. To achieve its objective, the Sub-Fund will invest under normal circumstances at least 80% of its net assets in an actively managed diversified portfolio consisting of fixed income instruments that are economically tied to emerging market countries including fixed income instruments that are issued by corporate issuers that are economically tied to emerging market countries.

The Sub-Fund will invest at least 50% of its Net Asset Value in assets which exhibit positive or improving environmental ("E") and/or social ("S") characteristics. Further information about the environmental and social characteristics promoted by the Sub-Fund is available in the SFDR Annex appended to the Supplement.

Barings Income Navigator Fund
The investment objective of the Fund is to seek to provide investors with attractive current income that is consistent with preservation of capital.

To achieve its investment objective, the Fund will navigate multiple sectors, including low and high grade investment grade income, as well as an increased allocation to high yield, depending on market conditions and attractiveness to generate income. The Fund will invest primarily in an actively managed diversified portfolio of investment grade fixed income instruments which are listed or traded on Recognised Markets. The fixed income instruments in which the Fund invests may include instruments issued by governments, corporations, and supranational entities. The fixed income instruments shall include bonds, notes, debentures, treasury obligations, sovereign issues, covered bonds, commercial paper, certificates of deposit, banker acceptances and other fixed and floating rate income securities.

The Sub-Fund will invest at least 50% of its Net Asset Value in assets which exhibit positive or improving environmental ("E") and/or social ("S") characteristics. Further information about the environmental and social characteristics promoted by the Sub-Fund is available in the SFDR Annex appended to the Supplement.

Barings Emerging Markets Debt Blended Total Return Fund
The investment objective of the Sub-Fund is to seek maximum total return, consistent with preservation of capital and prudent investment management, through high current income generation and, where appropriate, capital appreciation. To achieve its objective, the Sub-Fund will invest under normal circumstances at least 80% of its net assets in an actively managed diversified portfolio consisting of fixed income instruments that are economically tied to emerging market countries including fixed income instruments that are issued by corporate issuers that are economically tied to emerging market countries.

The Sub-Fund will invest at least 50% of its Net Asset Value in assets which exhibit positive or improving environmental ("E") and/or social ("S") characteristics. Further information about the environmental and social characteristics promoted by the Sub-Fund is available in the SFDR Annex appended to the Supplement.

Barings Emerging Markets Sovereign Debt Fund
The investment objective of the Sub-Fund is to seek maximum total return, consistent with preservation of capital and prudent investment management, through high current income generation and where appropriate, capital appreciation. To achieve its objective, the Sub-Fund will invest under normal circumstances at least 80% of its net assets in an actively managed diversified portfolio consisting of fixed income instruments that are issued by or economically tied to, emerging market countries including fixed income instruments that are issued by corporate issuers that are economically tied to emerging market countries.

The Sub-Fund will invest at least 50% of its Net Asset Value in assets which exhibit positive or improving environmental ("E") and/or social ("S") characteristics. Further information about the environmental and social characteristics promoted by the Sub-Fund is available in the SFDR Annex appended to the Supplement.

Barings U.S. High Yield Bond Fund
The investment objective of the Sub-Fund is to provide high current income generation and, where appropriate, capital appreciation. To achieve its objective, the Sub-Fund will invest principally in a portfolio of High Yield fixed and floating rate Corporate Debt Instruments, focusing primarily on North American High Yield Instruments which are listed or traded on Recognised Markets in North America.

The Sub-Fund will invest at least 50% of its Net Asset Value in assets which exhibit positive or improving environmental ("E") and/or social ("S") characteristics. Further information about the environmental and social characteristics promoted by the Sub-Fund is available in the SFDR Annex appended to the Supplement.

Barings Developed and Emerging Markets High Yield Bond Fund
The investment objective of the Sub-Fund is to produce a high level of current income, commensurate with an acceptable level of risk as determined by the Investment Manager in its reasonable discretion. To achieve its objective, the Sub-Fund will invest principally in a portfolio of high yield fixed and floating rate Corporate Debt Instruments and government debt instruments globally. The Sub-Fund may invest more than 20% of its Net Asset Value in emerging markets.

The Sub-Fund will invest at least 50% of its Net Asset Value in assets which exhibit positive or improving environmental ("E") and/or social ("S") characteristics. Further information about the environmental and social characteristics promoted by the Sub-Fund is available in the SFDR Annex appended to the Supplement.

Please refer to the Prospectus for the full investment objective and policy.

The Directors present herewith their annual report and the audited financial statements of Barings Umbrella Fund Plc ("the Company") for the financial year ended 31 December 2025.

Statement of Directors' responsibilities

The Directors are responsible for preparing the Directors' Report and financial statements, in accordance with applicable Irish law and regulations. Irish Company law requires the Directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union ("EU") and applicable law.

Under Irish company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company as at the financial year end date and of the profit or loss of the Company for the financial year and otherwise comply with the Companies Act 2014. In preparing the financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with applicable accounting standards, identify those standards, and note the effect and the reasons for any material departure from those standards;
- assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Company or cease operations, or have no realistic alternative to do so.

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and profit or loss of the Company and enable them to ensure that its financial statements comply with the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and under the CBI (Supervision & Enforcement) Act 2013 (Section 48(1) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, as amended (together, the "UCITS Regulations"). The Directors have appointed State Street Fund Services (Ireland) Limited to keep adequate accounting records which are located at the offices of the administrator at 78 Sir John Rogerson's Quay, Dublin 2, Ireland.

They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company. In this regard they have entrusted the assets of the Company to State Street Custodial Services (Ireland) Limited ("the Depositary") for safe-keeping. They have general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities. The Directors are also responsible for preparing a Directors' Report that complies with the requirements of the Companies Act 2014.

The financial statements are published at: www.barings.com. The Directors together with Baring International Fund Managers (Ireland) Limited ("the Manager") and the Investment Managers are responsible for the maintenance and integrity of the website as far as it relates to Barings Funds. Legislation in the Republic of Ireland governing the presentation and dissemination of the financial statements may differ from legislation in other jurisdictions.

Review of the performance and future developments of the business

A detailed review of the business and future developments and KPI's are included in the Investment Managers' Reports.

Results and distributions

The results of operations for the financial year are set out in the Statement of Comprehensive Income. The Directors declared distributions during the financial year as set out in Note 8 of these financial statements.

Risk management objectives and policies

An investment in the Company involves a high degree of risk, including, but not limited to, the risks as outlined below. An investment in the Company is only suitable for investors who are in a position to take such risks. There can be no assurance that the Company will achieve its objectives, and the value of shares can go down as well as up. The principal risks and uncertainties faced by the Company are market price risk, foreign currency risk, liquidity risk, credit risk and interest rate risk, which are outlined in Note 11 of these financial statements.

Directors

The names and nationalities of persons who were Directors at any time during the financial year ended 31 December 2025 are set out below:

Mr. Alan Behen (Irish)
Ms. Barbara Healy (Irish)*
Mr. Paul Smyth (Irish)
Mr. Syl O'Byrne (Irish)*

Unless stated otherwise, the Directors served for the entire financial year.

*Non-executive Directors independent of the Investment Managers.

Directors' & Company Secretary's interests in the shares of the Company
None of the current Directors, the Company Secretary or their families hold or held any beneficial interest in the shares of the Company during the financial year ended 31 December 2025 (31 December 2024: Nil).

Transactions involving Directors
Other than as stated in Note 9 and Note 10 of these financial statements, there were no contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any interest, as defined in the Companies Act 2014, at any time during the financial year ended 31 December 2025 (31 December 2024: None).

Mr. Alan Behen and Mr. Paul Smyth are employees of the Manager.

Each of the Directors are directors of the Manager.

Significant events during the financial year
The Prospectus of the Company was updated on 5 February 2025 and there were two addenda issued on 29 May 2025 and 17 December 2025. The material changes to the Prospectus are outlined in Note 21 of these financial statements.

Launches and terminations of Sub-Funds' share tranches have been outlined in Note 22 of these financial statements.

There have been no other significant events affecting the Company during the financial year.

Significant events since the financial year end
The Investment Manager is closely monitoring global market developments and geopolitical events such as the Russian invasion of Ukraine, ongoing Iran-US conflict, and heightened geopolitical uncertainty. While these events have contributed to heightened uncertainty across financial markets, as at 13 April 2026, the Company has not experienced any material impact on performance or investor redemptions. The Investment Manager remains vigilant and continues to assess potential implications for portfolio positioning and risk management.

Distributions declared by the Sub-Funds subsequent to year end are outlined in Note 23 of these financial statements.

There have been no other significant events affecting the Company up to the date of approval of the financial statements.

Russia/Ukraine conflict
The ongoing conflict between Russia and Ukraine has led to significant disruption and volatility in the global stock market. As a result of this, the fair value of Russian securities held within the Sub-Funds have experienced a sharp decline since early 2022. As a consequence of this, management made the determination to value all Russian sovereign local bonds, sovereign hard currency debt (USD / EUR) and corporate bonds on a bid basis and Ukrainian sovereign local bonds on either a bid basis or straight vendor marks. This was based on the current restrictions on trading due to sanctions and market liquidity. Exposure details at 31 December 2025 and 31 December 2024 are outlined in the table in Note 24. The ongoing ramifications of the conflict may not be limited to Russia and Russian companies or Ukraine but may spill over to other regional and global economic markets, and the extent of the resulting impact remains uncertain. Barings continues to monitor the situation in Ukraine and consider appropriate measures for the affected Sub-Funds.

Relevant audit information
The Directors believe that they have taken all steps necessary to make themselves aware of any relevant audit information and have established that the Company's statutory auditor is aware of that information. In so far as the Directors are aware, there is no relevant audit information of which the Company's statutory auditor is unaware.

Directors' compliance statement
The Directors, in accordance with Section 225(2) of the Companies Act 2014, acknowledge that they are responsible for securing the Company's compliance with certain obligations specified in that sector arising from the Companies Act 2014, where applicable, the Market Abuse (Directive 2003/6/EC) Regulations 2005, the Prospectus (Directive 2003/71/EC) Regulations 2015, the Transparency (Directive 2004/109/EC) Regulations 2007 and Tax laws ('relevant obligations').The Directors confirm that:

- a compliance policy statement has been drawn up setting out the Company's policies with regard to such compliance;
- appropriate arrangements and structures that, in their opinion, are designed to secure material compliance with the Company's relevant obligations have been put in place; and
- a review has been conducted, during the financial year, of the arrangements and structures that have been put in place to secure the Company's compliance with its relevant obligations.

Audit committee statement
The Directors have decided not to establish an audit committee pursuant to section 167(2) of the Companies Act 2014, based on:

(a) the nature, scale and complexity of the Company's business range of services and activities undertaken in the course of that business;

(b) the resources available to the Company and the resources and expertise of the various third parties engaged to support the Company and carry out certain functions on its behalf; and

Audit committee statement (continued)

(c) the procedures in place for the review, approval and circulation of the audited financial accounts and statements which are appropriate for an investment company pursuant to the UCITS Regulations.

There is an audit committee established in the U.S. at Barings LLC, covering the Barings group. Barings LLC is the holding company of Barings Group, which includes the Manager and the Investment Manager.

EU Takeovers Directive

The Company is not subject to the European Communities (Takeover Bids (Directive 2004/25/EC) Regulation 2006 and therefore is not required to include information relating to voting rights and other matters required by those Regulations and specified by the Companies Act 2014.

Corporate Governance Statement

General Principles

The Company is subject to comply with the requirements of the Companies Act, 2014 (the "Companies Act"), the UCITS Regulations and the CBI UCITS Regulations and guidance notes, as applicable to the Company. The European Communities (Directive 2006/46/EC) Regulations (S.I. 450 of 2009 and S.I. 83 of 2010) (the "Regulations") requires the inclusion of a corporate governance statement in the Directors' Report. The aforementioned Regulations apply to entities that are listed on Euronext Dublin. On 14 December 2011, Irish Funds published a corporate governance code ("IF Code") that may be adopted on a voluntary basis by Irish authorised collective investment schemes. The Board of Directors (the ″Board″) adopted the IF Code on 6 November 2012, with effect from 31 December 2012. The Board considers that the Company has complied with the provisions contained in the IF Code throughout this financial year.

The Company was also subject to corporate governance practices imposed by:

(i) The Irish Companies Act, 2014 which are available for inspection at the registered office of the Company; and may also be obtained at http://www.irishstatutebook.ie;

(ii) The Articles of Association of the Company which are available for inspection at the registered office of the Company and at the Companies Registration Office in Ireland;

(iii) The CBI in their UCITS Regulations which can be obtained from the CBI's website at: https://www.centralbank.ie/regulation/industry-market-sectors/funds and are available for inspection at the registered office of the Company; and

(iv) Euronext Dublin through the Euronext Dublin Code of Listing Requirements and Procedures which can be obtained from Euronext Dublin's website at: http://www.ise.ie

The Board did not adopt any further corporate governance codes during the financial year.

It should be noted that the IF Code reflects existing corporate governance practices imposed on Irish authorised collective investment schemes, as noted above. If the IF Code is adopted on a voluntary basis, it can be referred to in the disclosures made in the Directors' Report in compliance with the provisions of the European Communities (Directive 2006/46/EC) Regulations (i.e. S.I. 450 of 2009 and S.I. 83 of 2010).

Internal Control and Risk Management Systems in Relation to Financial Reporting

The Board is responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Board has procedures in place to ensure that all relevant books of account are properly maintained and are readily available, including production of annual and half yearly financial statements. The Board has appointed the Administrator to maintain the books and records of the Company.

The Administrator is authorised and regulated by the CBI and must comply with the rules imposed by the CBI. From time to time, the Board examines and evaluates the Administrator's financial accounting and reporting routines. The annual financial statements of the Company are produced by the Administrator and reviewed by the Investment Managers. They are required to be approved by the Board and the annual and half yearly financial statements of the Company are required to be filed with the CBI and the annual financial statements are required to be filed with Euronext Dublin.

Corporate Governance Statement (continued)

Internal Control and Risk Management Systems in Relation to Financial Reporting (continued)
During the financial year of these financial statements, the Board was responsible for the review and approval of the annual financial statements as set out in the Statement of Directors' Responsibilities. The statutory financial statements are required to be audited by independent auditor who reports annually to the Board on their findings. The Board monitors and evaluates the independent auditor's performance, qualifications and independence. As part of its review procedures, the Board receives presentations from relevant parties including consideration of International Accounting Standards and their impact on the annual financial statements, and presentations and reports on the audit process. The Board evaluates and discusses significant accounting and reporting issues as the need arises.

Dealings with Shareholders
The convening and conduct of shareholders' meetings are governed by the Articles of Association of the Company and the Companies Act.

Although the Directors may convene an extraordinary general meeting of the Company at any time, the Directors were required to convene the first annual general meeting of the Company within eighteen months of incorporation and fifteen months of the date of the previous annual general meeting thereafter, provided that an annual general meeting is held once in each year within six months of the end of each financial year of the Company. At least twenty-one clear days' notice of every annual general meeting and any meeting convened for the passing of a special resolution must be given to shareholders and fourteen days' notice must be given in the case of any other general meeting, unless the auditor of the Company and all the shareholders of the Company entitled to attend and vote agree to shorter notice. Two shareholders present either in person or by proxy constitutes a quorum at a general meeting.

The share capital of the Company is divided into different tranches of shares and the Companies Act and the Articles of Association provide that the quorum for a general meeting convened to consider any alteration to the rights attached to any tranche of shares, is two or more shareholders present in person or by proxy, holding or representing by proxy at least one third of the issued shares of the relevant tranche. Every holder of participating shares or non-participating shares present, in person or by proxy who votes on a show of hands is entitled to one vote. On a poll, every holder of participating shares present, in person or by proxy, is entitled to one vote in respect of each share held by him, and every holder of non-participating shares is entitled to one vote in respect of all non-participating shares held by him. At any general meeting, a resolution put to the vote of the meeting is decided on a show of hands unless, before or upon the declaration of the result of the show of hands, a poll is demanded by the chairman of the general meeting, or by at least two members or shareholders present, in person or by proxy, having the right to vote at such meeting, or any holder or holders of participating shares present, in person or by proxy, representing at least one tenth of the shares in issue having the right to vote at such meeting.

Shareholders may resolve to sanction an ordinary resolution or special resolution at a shareholders' meeting. Alternatively, a resolution in writing signed by all of the shareholders and holders of non-participating shares for the time being entitled to attend and vote on such resolution at a general meeting of the Company, will be valid and effective for all purposes as if the resolution had been passed at a general meeting of the Company duly convened and held. An ordinary resolution of the Company (or of the shareholders of a particular Sub-Fund or tranche of shares) requires a simple majority of the votes cast by the shareholders voting, in person or by proxy, at the meeting at which the resolution is proposed. A special resolution of the Company (or of the shareholders of a particular Sub-Fund or tranche of shares) requires a majority of not less than 75% of shareholders present, in person or by proxy, and voting in general meeting in order to pass a special resolution including a resolution to amend the Articles of Association.

Board composition and activities
In accordance with the Companies Act and the Articles of Association, unless otherwise determined by an ordinary resolution of the Company in a general meeting, the number of Directors may not be less than two. Currently the Board is comprised of four Directors, two of whom are independent. Details of the current Directors are disclosed on page 2.

The business of the Company is managed by the Directors, who exercise all such powers of the Company as required by the Companies Act or by the Articles of Association of the Company.

The Board is responsible for the Company's overall direction and strategy and to this end it reserves the decision making power on issues such as the determination of medium and long-term goals, review of managerial performance, organisational structure and capital needs and commitments to achieve the Company's strategic goals. To achieve these responsibilities, the Board meets on a quarterly basis to review the operations of the Company, address matters of strategic importance and to receive reports from the Administrator, Depositary and the Investment Managers. However, a Director may, and the Company Secretary on the requisition of a Director will, at any time summon a meeting of the Directors and ad hoc meetings in addition to the four meetings that are convened as required.

Corporate Governance Statement (continued)

Board composition and activities (continued)
Questions arising at any meeting of the Directors are determined by the Chairman. In the case of an equality of votes, the Chairman of the meeting at which the show of hands takes place or at which the poll is demanded shall be entitled to a second or casting vote. The quorum necessary for the transaction of business at a meeting of the Directors is two.

Transactions with connected persons
The UCITS Regulations require that any transaction carried out with the Company by a manager, depositary, investment manager and/or associate of these ("connected persons") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the shareholders.

The Board are satisfied that there are arrangements (evidenced by written procedures) in place to ensure that the obligations set out in Regulation 43(1) of the CBI UCITS Regulations are applied to all transactions with connected persons, and are satisfied that transactions with connected persons entered into during the financial year complied with the obligations set out in Regulation 43(1) of the CBI UCITS Regulations.

Remuneration code
The UCITS V provisions, which became effective on 18 March 2016, require Management Companies to establish and apply remuneration policies and practices that promote sound and effective risk management, and do not encourage risk taking which is inconsistent with the risk profile of the UCITS.

The Manager has a remuneration policy in place, details of which are available on the Barings website at:
https://www.barings.com/globalassets/2-assets/content/investment-policies/barings-remuneration-policies.pdf.

The purpose of the Manager's remuneration policy is to seek to ensure that the remuneration arrangements of "Identified Staff":

(i) are consistent with and promote sound and effective risk management and do not encourage risk-taking which is inconsistent with the risk profile, rules or instruments of incorporation of the Company or any fund which the Company is the manager of; and

(ii) are consistent with the Company's business strategy, objectives, values and interests and include measures to avoid conflicts of interest.

The Company has a business model, policies and procedures which by their nature do not promote excessive risk taking and which take account of the nature, scale and complexity of the Manager and the Sub-Funds.

Please see Appendix 4 - Disclosure of Remuneration.

Independent auditor
The Independent Auditor, KPMG, Chartered Accountants and Registered Auditors have indicated their willingness to continue in office in accordance with Section 383 (2) of the Companies Act 2014.

On behalf of the Board of Directors

Date: 13 April 2026

Barings Umbrella Fund Plc

Depositary's Report

For the financial year ended 31 December 2025

We have enquired into the conduct of Barings Umbrella Fund Plc ('the Company') for the financial year ended 31 December 2025, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company as a body, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary
Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's constitution (the "Constitution") and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion
The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed:

(i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Company's Constitution and the UCITS Regulations; and

(ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion
In our opinion, the Company has been managed during the financial year, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Constitution, the UCITS Regulations and the CBI (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ('the CBI UCITS Regulations'); and

(ii) otherwise in accordance with the provisions of the Constitution, the UCITS Regulations and the CBI UCITS Regulations.

Independent Auditor's Report to the Members of Barings Umbrella Fund Plc

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Barings Umbrella Fund plc ('the Company') for the year ended 31 December 2025 set out on pages 32 to 222, which comprise the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to the Holders of Redeemable Participating Shares, Statement of Cash Flows and the related notes, including the material accounting policies set out in note 2.

The financial reporting framework that has been applied in their preparation is Irish Law and International Financial Reporting Standards (IFRS) as adopted by the European Union.

In our opinion:

- the financial statements give a true and fair view of the assets, liabilities and financial position of the Company as at 31 December 2025 and of its changes in net assets attributable to holders of redeemable participating shares for the year then ended;
- the financial statements have been properly prepared in accordance with IFRS as adopted by the European Union; and
- the financial statements have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities Regulations) 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We have fulfilled our ethical responsibilities under, and we remained independent of the Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), as applied to listed entities.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate. Our evaluation of the directors' assessment of the entity's ability to continue to adopt the going concern basis of accounting included considering the inherent risks to the Company's business model and analysis of how those risks might affect the Company's financial resources or ability to continue operations over the going concern period.

The risks that we considered most likely to adversely affect the Company's available financial resources over this period were the availability of capital to meet operating costs and other financial commitments (liquidity risk) and the valuation of investments at fair value as a result of market performance (price risk). In the Directors' assessment, it was noted that the Company is a large platform with significant resources and the composition of the Company's portfolio reduces the going concern risk resulting from market performance of the investments. The Directors' assessment is consistent with our understanding of the Company's capital structure and the composition of the portfolio held by the Company.

Conclusions relating to going concern (continued)

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Detecting irregularities including fraud

We identified the areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements and risks of material misstatement due to fraud, using our understanding of the entity's industry, regulatory environment and other external factors and inquiry with the directors. In addition, our risk assessment procedures included:

- Inquiring with the directors and other management as to the Company's policies and procedures regarding compliance with laws and regulations, identifying, evaluating and accounting for litigation and claims, as well as whether they have knowledge of non-compliance or instances of litigation or claims.
- Inquiring of directors, and inspection of policy documentation as to the Company's policies and procedures to prevent and detect fraud, as well as whether they have knowledge of any actual, suspected or alleged fraud.
- Inquiring of directors, regarding their assessment of the risk that the financial statements may be materially misstated due to irregularities, including fraud.
- Inspecting the Company's regulatory and legal correspondence.
- Reading Board minutes.
- Performing planning analytical procedures to identify any unusual or unexpected relationships.

We discussed identified laws and regulations, fraud risk factors and the need to remain alert among the audit team.

Firstly, the Company is subject to laws and regulations that directly affect the financial statements including companies and financial reporting legislation. We assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items, including assessing the financial statement disclosures and agreeing them to supporting documentation when necessary.

Secondly, the Company is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation. We identified the following areas as those most likely to have such an effect: anti-bribery, employment law, environmental law, regulatory capital and liquidity and certain aspects of company legislation recognising the financial and regulated nature of the Company's activities and its legal form.

Auditing standards limit the required audit procedures to identify non-compliance with these non-direct laws and regulations to inquiry of the directors and other management and inspection of regulatory and legal correspondence, if any. These limited procedures did not identify actual or suspected non-compliance.

We assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud. As required by auditing standards, we performed procedures to address the risk of management override of controls and the risk of fraudulent revenue recognition. On this audit we do not believe there is a fraud risk related to revenue recognition. We did not identify any additional fraud risks.

In response to the fraud risks, we also performed procedures including:

- Identifying journal entries and other adjustments to test based on risk criteria and comparing the identified entries to supporting documentation.
- Assessing significant accounting estimates for bias.
- Assessing the disclosures in the financial statements.

As the Company is regulated, our assessment of risks involved obtaining an understanding of the legal and regulatory framework that the Company operates and gaining an understanding of the control environment including the entity's procedures for complying with regulatory requirements.

Detecting irregularities including fraud (continued)

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations (irregularities) is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it. In addition, as with any audit, there remains a higher risk of non-detection of irregularities, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. We are not responsible for preventing non-compliance and cannot be expected to detect non-compliance with all laws and regulations.

Key Audit matters: our assessment of risks of material misstatement

Key audit matters are those matters that, in our professional judgement, were of most significance in the audit of the financial statements and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by us, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. This matter was addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on this matter.

In arriving at our audit opinion above, the key audit matters were as follows (the key audit matter is the same as 2024):

Valuation of Investments $12,466,433,030 (31 December 2024: $11,201,096,347)

Refer to note 2(d) (accounting policy) and note 11 (financial disclosures)

The key audit matter

The Company's investment portfolio comprises of equities, bonds, investment funds and derivatives (including both listed and non-listed investments). The valuation of investments is the key driver of the Company's net asset value and performance for the year. While the nature of the Company's investments do not require a significant level of judgement in their valuation, due to their significance in the context of the financial statements as a whole, the valuation of investments was identified as a risk of material misstatement which had the greatest effect on our overall audit strategy and allocation of resources in planning and completing our audit.

For the reasons outlined above the engagement team determine this matter to be a key audit matter.

How the matter was addressed in our audit

Our audit procedures included:

- Obtaining and documenting our understanding of the investment valuation process and we inspected the latest reports and bridging letters on the Administrator's and Barings' controls related to the Company's investment transactions issued by its auditor in accordance with ISAE 3402 "Assurance Reports on controls at a Service Organisation".
- Engaging KPMG Ireland Valuation Specialists, who agreed 98.27% of the net investment portfolio to independently sourced prices.
- For the valuation of the remaining 1.73% of the net investment portfolio, there were certain illiquid investments over which the Investment Manager was appointed as competent person and are subject to valuation techniques by the Investment Manager which incorporates certain judgements and uncertainties. For significant positions, we obtained the supporting documentation from the Investment Manager to support their pricing judgements, and this documentation was inspected for reasonableness. This included the KPMG US Valuation Specialist team assessing the assumptions included in the valuations through inquiry, inspection and reperformance and also to the extent possible, corroborating the data inputs to supporting documentation. We also performed a retrospective review over a selection of illiquid positions from the prior year financial statements that were sold during the year to evaluate the reasonableness of the year end pricing.
- In addition, we considered the adequacy of the disclosure of investments made in the financial statements in relation to the fair value of investments and fair value disclosures for compliance with IFRS.

Key Audit matters: our assessment of risks of material misstatement (continued)	Based on evidence obtained, no material misstatements were noted as part of our testing.

Our application of materiality and an overview of the scope of our audit

Materiality for the Company's financial statements as a whole was set at $259m (31 December 2024: $118m) determined with reference to a benchmark of the Company's Net Asset Value ("NAV") (of which it represents 2% as at 31 December 2025 (31 December 2024: 1%)).

Performance materiality for the financial statements as a whole was set at $194m (31 December 2024: $88.5m), determined with reference to a benchmark of materiality (of which it represents 75% (31 December 2024: 75%)). In applying our judgement in determining performance materiality, we considered a number of factors, including the number and value of misstatements detected and the number and severity of deficiencies in control activities identified in the prior year financial statements audit.

We consider Net Asset Value to be the most appropriate benchmark as it is most widely used benchmark in the funds industry and is the metric that is most important to investors, who would be one of the key users of the Company's financial statements. Subscriptions and redemptions in and out of the Company are transacted at Net Asset Value per share, potential investors would also judge how the Company is performing based on its Net Asset Value. In applying our judgement in determining materiality, we considered a number of factors which had the most significant impact were: our understanding of the Company and its business environment; the Company's ownership structure and limited debt arrangements.

The increase in the materiality percentage applied reflects the Company no longer being classified as a public interest entity following the revised International Ethics Standards Board for Accountants (IESBA) public interest entity definition.

We reported to the Board of Directors any corrected or uncorrected identified misstatements exceeding $12.3m (2024: $5.9m), in addition to other identified misstatements that warranted reporting on qualitative grounds.

Our audit was undertaken to the materiality and performance materiality level specified above and was all performed by a single engagement team in Dublin.

Other information

The directors are responsible for the other information presented in the Annual Report together with the financial statements. The other information comprises the information included in the directors' report, investment objective and policy, investment manager's report, depositary's report, schedule of investments, significant changes in portfolio composition, additional information for investors in the Federal Republic of Germany, additional information regarding Hong Kong registered funds, disclosure of remuneration and sustainability related disclosure. The financial statements and our auditor's report thereon do not comprise part of the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work we have not identified material misstatements in the other information.

Based solely on our work on the other information undertaken during the course of the audit, we report that:

- we have not identified material misstatements in the directors' report;
- in our opinion, the information given in the directors' report is consistent with the financial statements; and
- in our opinion, those parts of the directors' report specified for our review, which does not include sustainability reporting when required by Part 28 of the Companies Act 2014, have been prepared in accordance with the Companies Act 2014.

Our opinions on other matters prescribed by the Companies Act 2014 are unmodified

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the financial statements are in agreement with the accounting records.

We have nothing to report on other matters on which we are required to report by exception

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions required by Sections 305 to 312 of the Act are not made. We have nothing to report in this regard.

Hong Kong Code on Unit Trusts and Mutual Funds

As set out in the introduction to the financial statements, in our view the financial statements materially comply with the relevant disclosure requirements of the Hong Kong Code on Unit Trusts and Mutual Funds in respect of the following sub funds, Barings Global Senior Secured Bond Fund, Barings European High Yield Bond Fund, Barings Global High Yield Bond Fund, Barings Emerging Markets Sovereign Debt Fund, Barings Income Navigator Fund and Barings Developed and Emerging Markets High Yield Bond Fund.

Respective responsibilities and restrictions on use

Responsibilities of directors for the financial statements

As explained more fully in the directors' responsibilities statement set out on page 8, the directors are responsible for: the preparation of the financial statements including being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A fuller description of our responsibilities is provided on IAASA's website at:
https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements/.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Company's members, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

Barings Global Senior Secured Bond Fund

Performance

Barings Global Senior Secured Bond Fund* (the "Sub-Fund") generated a gross return of 8.54% on the Tranche G USD Distribution and outperformed against the performance comparator with a return of 7.97%** during the reporting period. The Sub-Fund generated a net return of 7.10% on the Tranche G USD Distribution over the same period.

The global high yield bond market generated positive total returns in 2025. Ongoing resilience in global macroeconomic conditions and broadly stable corporate fundamentals, alongside gradually easing inflation across major economies, supported solid returns throughout global high yield markets. Credit spreads tightened overall despite periods of regional volatility, helping drive performance as spreads ended the year near historically constructive levels amid a backdrop of resumed monetary easing in several key markets. New issuance remained healthy worldwide, supported by steady inflows and continued refinancing activity as issuers took advantage of favourable funding conditions and attractive all in yields.

During the year ending December 2025, the Sub-Fund outperformed its performance comparator. Strong credit selection within the single-B rated segment contributed to relative outperformance, while adverse credit selection within the triple-C rated segment partially detracted. Security selection in Energy and Retail were leading contributors to Sub-Fund outperformance on a sector level, while weak credit selection in Services adversely impacted relative performance.

The Sub-Fund outperformed its performance comparator in 2025. Since its inception in January 2011, the Sub-Fund has outperformed its performance comparator.

Market & Outlook

In an environment where the prospects of growing mergers and acquisition activity and broader earnings growth provide support, but risks around interest rates and geopolitics persist, high yield bonds should continue to offer an attractive total return opportunity. Overall, while spreads have compressed, the high yield bond market maintains a strong foundation with largely stable credit quality and reduced aggregate credit risk. In addition, the moderate duration profile of the market helps mitigate rate sensitivity. At the same time, all-in coupons remain at attractive levels. While these factors support a constructive outlook, the shifting macroenvironment, combined with evolving market technicals, suggests active, bottom-up investment remains key to managing risks.

Baring Asset Management Limited

Barings LLC

January 2026

*The Barings Global Senior Secured Bond Fund principally invests in sub-investment grade and/or unrated debt securities. The Sub-Fund's investment in senior secured debt securities does not guarantee repayment of the principal of investments by the investors.

**The Sub-Fund return uses the close New York prices, whereas the return of the performance comparator is calculated using global close prices.

Barings European High Yield Bond Fund

Performance

Barings European High Yield Bond Fund (the "Sub-Fund") generated a gross return of 5.27% on the Tranche S EUR Accumulation and underperformed against the performance comparator with a return of 5.35%* during the reporting period. The Sub-Fund generated a net return of 4.93% on the Tranche S EUR Accumulation over the same period.

The European high yield bond market generated positive total returns in 2025. Resilient economic conditions across the region, coupled with stable corporate fundamentals and gradually easing inflation in key European economies, supported solid returns across the market. Credit spreads tightened meaningfully over the year despite intermittent bouts of volatility, helping drive performance as spreads ended the year at historically constructive levels amid renewed monetary easing from the European Central Bank and other regional policymakers. New issuance remained robust, supported by steady inflows, refinancing activity, and improved issuer access to capital as companies capitalized on favourable funding conditions and attractive all in yields.

During the year ending December 2025, the Sub-Fund underperformed its performance comparator. Weak selection within Services contributed to relative underperformance, partially offset by strong selection within Telecommunications. An underweight allocation to Real Estate also detracted. Across ratings, credit selection within the triple-C and triple-B rating segments boosted performance, while an overweight position in triple-B securities modestly detracted from relative returns.

The Sub-Fund underperformed its performance comparator in 2025. Since its inception in May 2011, the Sub-Fund has outperformed its performance comparator.

Market & Outlook

In an environment where the prospects of growing mergers and acquisition activity and broader earnings growth provide support, but risks around interest rates and geopolitics persist, high yield bonds should continue to offer an attractive total return opportunity. Barings Global High Yield Bond Fund

Performance

Barings Global High Yield Bond Fund (the "Sub-Fund") generated a gross return of 9.28% on the Tranche F USD Accumulation and outperformed against the performance comparator with a return of 8.22%* during the reporting period. The Sub-Fund generated a net return of 9.19% on the Tranche F USD Accumulation over the same period.

The global high yield bond market generated positive total returns in 2025. Ongoing resilience in global macroeconomic conditions and broadly stable corporate fundamentals, alongside gradually easing inflation across major economies, supported solid returns throughout global high yield markets. Credit spreads tightened overall despite periods of regional volatility, helping drive performance as spreads ended the year near historically constructive levels amid a backdrop of resumed monetary easing in several key markets. New issuance remained healthy worldwide, supported by steady inflows and continued refinancing activity as issuers took advantage of favourable funding conditions and attractive all in yields.

During the year ending December 2025, the Sub-Fund outperformed its performance comparator. Strong selection within Telecommunications and Healthcare contributed to relative outperformance, partially offset by weak selection within Basic Industry. An underweight allocation to Real Estate also detracted. Across ratings, credit selection within the single-B and triple-C rating segments boosted performance, while an overweight position in triple-C securities modestly detracted from relative returns.

The Sub-Fund outperformed its performance comparator in 2025. Since its inception in April 2012, the Sub-Fund has outperformed its performance comparator.

Baring Asset Management Limited

Barings LLC

January 2026

*The Sub-Fund return uses the close New York prices, whereas the return of the performance comparator is calculated using global close prices.

Barings Emerging Markets Corporate Bond Fund

Performance

Barings Emerging Markets Corporate Bond Fund (the "Sub-Fund") generated a gross return of 8.25% on the Tranche A USD Accumulation and underperformed against the performance comparator with a return of 8.73%* during the reporting period. The Sub-Fund generated a net return of 7.76% on the Tranche A USD Accumulation over the same period.

The Sub-Fund's returns came largely from spread compression and carry among issuers at the lower end of the high yield spectrum in the first half of 2025, as markets adopted a risk-on posture after the initial turmoil of "Liberation Day" in April. During the second half of the year, returns came from the higher end of High Yield and some Investment Grade names. Returns were augmented by positive contribution from rates, mostly from Q2. US Treasuries were volatile in the first half of 2025 amid tariff uncertainty. 10-year US Treasuries ended the year at 4.16%, -41 basis points lower than the end of 2024. Most of the Sub-Fund's returns came from spread compression. The Sub-Fund's top performers included CCC-rated holdings in energy company Tullow Oil, Embraer and Vedanta Resources, an Indian mining company. The main detractors were Braskem, NMC Healthcare and Vanke Real Estate.

The Sub-Fund opened new positions in Telefonica Moviles, Wynn Macau and Czechoslovakia Group. The Sub-Fund sold out of Embraer, SUNAC China Holdings and Tullow Oil in Ghana during the financial year.

At the asset class level, the JP Morgan CEMBI Broad Diversified Index returned 8.73% in 2025. Emerging Markets ("EM") corporate spreads continue to grind tighter, compressing -18 bps in 2025, to levels not seen since 2017. High yield issuers outperformed Investment Grade in aggregate. In the first half of 2025 non-rated and CCC-rated issuers were the highest performing quality buckets, consistent with the risk-on sentiment in markets. For the second half of 2025 however, the best performers came from the highest end of the high yield market, namely BB and B-rated issuers.

The Sub-Fund underperformed its performance comparator in 2025. Since its inception in April 2014, the Sub-Fund has underperformed its performance comparator.

Market & Outlook

We expect the positive momentum to carry into 2026 as the macro and fundamental backdrop is still supportive for the asset class. Although spreads are at multi-year tights compared to historical averages, there are still many opportunities in the EM Hard Currency universe. EM Corporate fundamentals continue to trend in the right direction with EM corporate average revenue and EBITDA still showing positive growth. Looking ahead to 2026, credit spreads continue to be well supported by technicals leading to a Goldilocks-like environment. Technicals have been particularly strong as the asset class has benefited from crossover inflows which has contributed to spread compressions overall despite a heavy supply backdrop. An attractive new issuance pipeline has also resulted in a shift from asset class shrinking to growth and allowed a diverse set of investors to participate.

The volume of issuance from the US government may compete with significant issuance by the largest companies in the US. AI hyperscalers will increasingly need to tap debt markets to fund further investment in a hypercompetitive arms race they see as increasingly existential. This pressure on US Investment Grade spreads should benefit EM Corporate Investment Grade as an alternative high quality, fixed income asset. We like the macro set-up we are seeing and are confident that EM Debt will continue to be supported by asset inflows as investors increasingly look at allocating a larger percent of their marginal savings outside the Developed Markets ("DM") universe.

January 2026

*The Sub-Fund return uses the close New York prices, whereas the return of the performance comparator is calculated using global close prices.

Barings Emerging Markets Local Debt Fund

Performance

Barings Emerging Markets Local Debt Fund (the "Sub-Fund") generated a gross return of 22.88% on the Tranche A USD Accumulation and outperformed against the performance comparator with a return of 19.26%* during the reporting period. The Sub-Fund generated a net return of 22.15% on the Tranche A USD Accumulation over the same period.

The market level performance comes both from interest rates and currencies which has brought on the best performance year for the EM local asset class since 2009. The market environment has been nearly perfect for EM local to perform well as many Emerging Market countries interest rates were starting at high levels and the lower inflation prints have provided ample room for Central Banks to cut rates and for yields to compress. Couple that with the meaningfully weaker US Dollar which has provided a nice tailwind to EM currencies and that has led to the very strong returns for the asset class.

The Sub-Fund has benefited from that environment as well and has outperformed the index, both via rates and currencies. More than half of the outperformance comes from interest rate positioning where the portfolios high conviction overweight in South African rates has provided over 100 bps in outperformance as bond yields have gone from over 11% to below 9% since April 2025. Other duration overweights have also contributed to performance including Peru and Mexico. Not all of the Sub-Fund's duration positions benefited the Sub-Fund, as the persistent underweight in Thailand detracted from performance as yields have also compressed there despite our analysis finding better value elsewhere.

On the FX side, the portfolio was also able to add alpha via several positions. Overweights in Brazil and Hungary were the two main sources of that outperformance while underweights in Asian currencies detracted some – particularly China and Malaysia. Additionally, the portfolio has benefited from several off-benchmark frontier local market positions in 2025 including via the Nigerian Naira and Egyptian Pound.

The Sub-Fund outperformed its performance comparator in 2025. Since its inception in April 2014, the Sub-Fund has outperformed its performance comparator.

Market & Outlook

We expect the positive momentum to carry into 2026 as the macro and fundamental backdrop is still supportive for the asset class. EM Central Banks have cut interest rates meaningfully over the last couple of years, but in many cases still have room for further easing. While we don't expect a USD depreciation to the same magnitude as we saw in 2025, we do expect the Dollar to be structurally weaker/stable which will provide a nice tailwind for higher yielding EM currencies to perform quite nicely. Frontier local markets will still be on the top of investors' minds as more attractive opportunities are popping up. For experienced investors that can look past the index composition and have high conviction in some of these countries macro stabilization stories, these can be tremendous sources of alpha for the portfolio. With the portfolios yield ending the year in the high single digits, we think there is good reason to expect double digit returns in 2026. It's unlikely to be another repeat of record-breaking performance that we saw in 2025, however we don't believe this strong run for EM local to be a fluke and expect continued strength in the asset supported by asset inflows as more and more investors look at allocating towards Emerging Market Debt.

Barings Emerging Markets Debt Short Duration Fund

Performance

Barings Emerging Markets Debt Short Duration Fund (the "Sub-Fund") generated a gross return of 7.40% and a net return of 6.75% on the Tranche A USD Accumulation during the reporting period.

The Sub-Fund's returns came largely from spread compression and carry among issuers at the lower end of the high yield spectrum in the first half of 2025, as markets adopted a risk-on posture after the initial turmoil of "Liberation Day" in April. During the second half of the year, returns came from the higher end of High Yield and some Investment Grade names. Returns were augmented by positive contribution from rates, mostly from Q2. US Treasuries were volatile in the first half of 2025 amid tariff uncertainty. 10-year US Treasuries ended the year at 4.16%, -41 basis points lower than the end of 2024. Most of the Sub-Fund's returns came from spread compression. The Sub-Fund's top performers included CCC-rated holdings in energy company Tullow Oil, Embraer and Vedanta Resources, an Indian mining company. The main detractors were Braskem, NMC Healthcare and Vanke Real Estate.

In 2025 the Sub-Fund opened new positions in HTA Group in Tanzania, Azule Energy in Angola and Czechoslovakia Group. The Sub-Fund sold out of Tullow Oil in Ghana, Banco Do Brazil, Embraer, GMR Hyderabad International Airport and India Cleantech Energy during the financial year.

At the asset class level, the JP Morgan CEMBI Broad Diversified Index returned 8.73% in 2025. EM corporate spreads continue to grind tighter, compressing -18 bps in 2025, to levels not seen since 2017. High yield issuers outperformed Investment grade in aggregate. In the first half of 2025 non-rated and CCC-rated issuers were the highest performing quality buckets, consistent with the risk-on sentiment in markets. For the second half of 2025 however, the best performers came from the highest end of the high yield market, namely BB and B-rated issuers.

Market & Outlook

We expect the positive momentum to carry into 2026 as the macro and fundamental backdrop is still supportive for the asset class. Although spreads are at multi-year tights compared to historical averages, there are still many opportunities in the EM Hard Currency universe. EM Corporate fundamentals continue to trend in the right direction with EM corporate average revenue and EBITDA still showing positive growth. Looking ahead to 2026, credit spreads continue to be well supported by technicals leading to a Goldilocks-like environment. Technicals have been particularly strong as the asset class has benefited from crossover inflows which has contributed to spread compressions overall despite a heavy supply backdrop. An attractive new issuance pipeline has also resulted in a shift from asset class shrinking to growth and allowed a diverse set of investors to participate.

The volume of issuance from the US government may compete with significant issuance by the largest companies in the US. AI hyperscalers will increasingly need to tap debt markets to fund further investment in a hypercompetitive arms race they see as increasingly existential. This pressure on US Investment Grade spreads should benefit EM Corporate Investment Grade as an alternative high quality, fixed income asset. The short duration of the Sub-Fund will largely protect investors if US Treasurys sell-off at the longer end of the curve for the reasons noted above. We like the macro set-up we are seeing and are confident that EM Debt will continue to be supported by asset inflows as investors increasingly look at allocating a larger percent of their marginal savings outside the DM universe.

January 2026

Barings Income Navigator Fund

Performance

Barings Income Navigator Fund (the "Sub-Fund") generated a gross return of 8.53% on the Tranche I USD Accumulation and outperformed against the performance comparator with a return of 4.86%* during the reporting period. The Sub-Fund generated a net return of 7.93% on the Tranche I USD Accumulation over the same period.

The portfolio's duration contributed positively to relative performance against the performance comparator. Portfolio duration was maintained in lower range of 3.0 to 4.0 years compared to 6.17 years for the for the performance comparator for a majority of the period. The Sub-Fund continues to manage to a neutral duration target of 3.5 years.

The portfolio's allocation to corporate credit was a main contributor to positive relative performance over the period. The portfolio's allocation across investment grade corporate credit, high yield corporate credit, sovereign credit, and emerging market debt all contributed positively. The Sub-Fund favored allocations across Banking, Energy, Finance Companies and Insurance industries. The Banking allocation in the Sub-Fund was the top contributing industry allocation over the period. The Sub-Fund finished the period with a 54% market value allocation to investment grade corporate, a 19% market value allocation to high yield corporate, a 10% allocation to sovereign credit, and a 1% allocation to emerging market corporate debt. The balance is predominantly in Emerging Market Sovereign debt and securitized assets.

The Sub-Fund outperformed its performance comparator in 2025. Since its inception in November 2014, the Sub-Fund has outperformed its performance comparator.

Market & Outlook

In December, the U.S. Federal Reserve executed its final 25-basis point reduction of the federal funds target rate for 2025, establishing a new range of 3.50%–3.75%. The FOMC approved this adjustment by a 9-3 margin, representing the highest level of dissent since 2019, as policymakers weighed the trade-off between labor market stabilization and inflation containment. According to the meeting minutes released prior to year end, there was significant divergence regarding the trajectory and timing of subsequent monetary policy actions. Several governors advocated for maintaining the current policy rate to facilitate further assessment of macroeconomic indicators before considering additional moves. Chair Jerome Powell's tenure concludes in May 2026, with a new appointment anticipated from President Trump, subject to Senate confirmation. Entering 2026, market participants are closely monitoring the potential implications for central bank independence in light of recent executive branch commentary on the forthcoming Fed Chair nomination.

Baring Asset Management Limited

Barings LLC

January 2026

*The Sub-Fund return uses the close New York prices, whereas the return of the performance comparator is calculated using global close prices.

Barings Emerging Markets Debt Blended Total Return Fund

Performance

Barings Emerging Markets Blended Total Return Fund (the "Sub-Fund") generated a gross return of 19.15% on the Tranche A USD Accumulation and outperformed against the performance comparator with a return of 14.05%* during the reporting period. The Sub-Fund generated a net return of 18.68% on the Tranche A USD Accumulation over the same period.

The market level performance comes primarily from interest rates and currencies which has brought on the best performance year for the EM local asset class since 2009. The market environment has been nearly perfect for EM local to perform well as many Emerging Market countries interest rates were starting at high levels and the lower inflation prints have provided ample room for Central Banks to cut rates and for yields to compress. Couple that with the meaningfully weaker US Dollar which has provided a nice tailwind to EM currencies and that has led to the very strong returns for the asset class.

Hard currency returns were driven by spreads and carry as the former tightened significantly during the financial year, providing meaningful positive contribution to performance. Rates provided an additional boost to the asset class, with US Treasury's closing 2025 -41 bps lower than where they ended 2024. US Treasury 10-year yields ended the year at 4.16% off the lows of the year (which dropped below 4% briefly several times during 2025).

All EM sleeves were additive to performance including EM Sovereigns, local rates, EM Corporates and FX. Futures, used to hedge portfolio level duration detracted. From a relative perspective against the blended index, local rates and EM Sovereigns were the leading outperformers. Top contributors on a country level include Brazil (FX, rates, Sovereign and Corporates), South Africa (local rates), Mexico (FX, rates, Sovereign and Corporates), Hungary (FX) and Peru (FX and local rates). Detractors include China (short FX), South Korea (local rates) and Romania (sovereign).

The Sub-Fund outperformed its performance comparator in 2025. Since its inception in December 2014, the Sub-Fund has outperformed its performance comparator.

Market & Outlook

We expect the positive momentum to carry into 2026 as the macro and fundamental backdrop is still supportive for the asset class. EM Central Banks have cut interest rates meaningfully over the last couple of years, but in many cases still have room for further easing. While we don't expect a USD depreciation to the same magnitude as we saw in 2025, we do expect the Dollar to be structurally weaker/stable which will provide a nice tailwind for higher yielding EM currencies to perform quite nicely. Frontier local markets will still be on the top of investors minds as more attractive opportunities are popping up. For experienced investors that can look past the index composition and have high conviction in some of these countries macro stabilization stories, these can be tremendous sources of alpha for the portfolio. With the portfolios yield ending the year in the high single digits, we think there is good reason to expect double digit returns in 2026. It's unlikely to be another repeat of record breaking performance that we saw in 2025, however we don't believe this strong run for EM to be a fluke and expect continued strength in the asset supported by asset inflows as more and more investors look at allocating towards Emerging Market Debt.

Against this backdrop, extensive credit-by-credit analysis and rigorous, bottom-up credit and country selection are critical to not only to managing risks, but also identifying issuers that are better-positioned to navigate the coming months.

Baring Asset Management Limited

Barings LLC

January 2026

*The Sub-Fund return uses the close New York prices, whereas the return of the performance comparator is calculated using global close prices.

Barings Emerging Markets Sovereign Debt Fund

Performance
Barings Emerging Markets Sovereign Debt Fund (the "Sub-Fund") generated a gross return of 16.74% on the Tranche A USD Accumulation and outperformed the performance comparator with a return of 14.30%* during the reporting period. The Sub-Fund generated a net return of 16.35% on the Tranche A USD Accumulation over the same period.

Returns were driven by spreads and carry as the former tightened significantly during the financial year, providing meaningful positive contribution to performance. At the performance comparator level, spreads tightened -72 bps in 2025. Rates provided an additional boost to the asset class, with US Treasurys closing 2025 -41 bps lower than where they ended 2024. US Treasury 10-year yields ended the year at 4.16% off the lows of the year (which dropped below 4% briefly several times during 2025).

The top positive contributors for the Sub-Fund in 2025 were Paraguay, Costa Rica, Pakistan, Bahamas and Guatemala, all countries where the Sub-Fund had sizeable overweights. The largest detractors for the year were the Sub-Fund's voids and underweights since the market rallied substantially in what was largely a risk-on year. At the top of the list were voids in Panama, Venezuela and UAE, as well as underweights in Romania and Saudi Arabia. The Sub-Fund has avoided the Gulf Cooperation Council complex as the yields on offer are only marginally higher than US Treasurys and too low to warrant the additional risk.

The Sub-Fund outperformed its performance comparator in 2025. Since its inception in September 2015, the Sub-Fund has outperformed its performance comparator.

Market & Outlook
We expect the positive momentum to carry into 2026 as the macro and fundamental backdrop is still supportive for the asset class. Although spreads are at multi-year tights compared to historical averages, we still see scores of sovereign issuers in the EM Hard Currency universe where spreads continue to overcompensate investors for default risk. Looking at the performance comparator in aggregate obscures this opportunity. Our approach of deep, fundamental, bottom-up, case-by-case credit analysis allows us to determine where spreads offer an attractive risk reward and take substantial high conviction positions. We anticipate that we will continue to deliver capital appreciation via spread compression in 2026 while investors are also being well compensated investors with substantial carry. In addition, we anticipate that although US Treasury volatility is unlikely to compress much further, given that 2026 will be a mid-term election year, our clients will be well protected by our approach of hedging U.S. Treasury risk. This strategy enables investors to participate in capital appreciation from spread compression and benefit from carry while being protected from a potential UST sell-off. The Sub-Fund delivered exceptional performance in 2025, and we think 2026 looks promising too. We like the macro set-up we are seeing, have high conviction on our positioning and are confident that EM Debt will continue to be supported by asset inflows as more and more investors look at allocating a larger percent of their marginal savings outside the DM universe.

Barings LLC

January 2026

*The Sub-Fund return uses the close New York prices, whereas the return of the performance comparator is calculated using global close prices.

Barings U.S. High Yield Bond Fund

Performance

Barings U.S. High Yield Bond Fund (the "Sub-Fund") generated a gross return of 9.28% on the Tranche A USD Accumulation and outperformed against the performance comparator with a return of 8.62%* during the reporting period. The Sub-Fund generated a net return of 8.79% on the Tranche A USD Accumulation over the same period.

The U.S. high yield bond market generated positive total returns in 2025. Ongoing macroeconomic resilience and stable corporate fundamentals, alongside gradually easing inflation over the course of the year, supported solid returns across high yield markets. Credit spreads tightened overall despite periods of volatility, helping drive performance as spreads finished the year near historically constructive levels amid an environment of resumed rate cuts. New issuance remained healthy, supported by steady inflows and continued refinancing activity as issuers took advantage of favourable funding conditions and attractive all in yields.

During the year ending December 2025, the Sub-Fund outperformed its performance comparator. Strong selection within Consumer Non-Cyclical and Energy contributed to relative outperformance, though this was partially offset by weak selection in Basic Industry. Across ratings, strong credit selection amongst single-B rated bonds contributed to relative over-performance, while exposure to triple-B rated securities modestly detracted from relative returns.

The Sub-Fund outperformed its performance comparator in 2025. Since its inception in February 2016, the Sub-Fund has outperformed (on a gross basis) its performance comparator.

Market & Outlook

In an environment where the prospects of growing mergers and acquisition activity and broader earnings growth provide support, but risks around interest rates and geopolitics persist, high yield bonds should continue to offer an attractive total return opportunity. Overall, while spreads have compressed, the high yield bond market maintains a strong foundation with largely stable credit quality and reduced aggregate credit risk. In addition, the moderate duration profile of the market helps mitigate rate sensitivity. At the same time, all-in coupons remain at attractive levels. While these factors support a constructive outlook, the shifting macroenvironment, combined with evolving market technicals, suggests active, bottom-up investment remains key to managing risks.

Baring Asset Management Limited

Barings LLC

January 2026

*The Sub-Fund return uses the close New York prices, whereas the return of the performance comparator is calculated using global close prices.

Barings Developed and Emerging Markets High Yield Bond Fund

Performance

Barings Developed and Emerging Markets High Yield Bond Fund (the "Sub-Fund") generated a gross return of 7.82% on the Tranche I USD Accumulation and underperformed against the performance comparator with a return of 8.49%* during the reporting period. The Sub-Fund generated a net return of 7.05% on the Tranche I USD Accumulation over the same period.

The global high yield bond market generated positive total returns in 2025. Ongoing resilience in global macroeconomic conditions and broadly stable corporate fundamentals, alongside gradually easing inflation across major economies, supported solid returns throughout global high yield markets. Credit spreads tightened overall despite periods of regional volatility, helping drive performance as spreads ended the year near historically constructive levels amid a backdrop of resumed monetary easing in several key markets. New issuance remained healthy worldwide, supported by steady inflows and continued refinancing activity as issuers took advantage of favourable funding conditions and attractive all in yields.

During the year ending December 2025, the Sub-Fund underperformed its performance comparator. Strong credit selection in single-B rated positions and an overweight allocation across single-B rated credits benefited performance, although was offset by weak selection in triple-C. Across sectors, credit selection in Energy, Consumer Goods and Healthcare were notable contributors to performance, although were more than offset by negative credit selection in Services and Basic Industry. Regionally, security selection in Americas was additive to relative performance, though more than offset by weak security selection in European holdings.

Market & Outlook

In an environment where the prospects of growing mergers and acquisition activity and broader earnings growth provide support, but risks around interest rates and geopolitics persist, high yield bonds should continue to offer an attractive total return opportunity. Overall, while spreads have compressed, the high yield bond market maintains a strong foundation with largely stable credit quality and reduced aggregate credit risk. In addition, the moderate duration profile of the market helps mitigate rate sensitivity. At the same time, all-in coupons remain at attractive levels. While these factors support a constructive outlook, the shifting macroenvironment, combined with evolving market technicals, suggests active, bottom-up investment remains key to managing risks.

* The amounts reflected are inclusive of all Funds in the Company, not just those marketed in Switzerland.

The accompanying notes are an integral part of the financial statements.

1. Basis of Measurement

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"), the interpretations adopted by the International Accounting Standards Board ("IASB") as adopted by the European Union ("EU") and in accordance with Irish statute comprising the Companies Act, 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and under the CBI (Supervision & Enforcement) Act 2013 (Section 48(1) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, (together, the "UCITS Regulations").

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, income and expenses.

The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimate is revised if the revision affects only that year, or in the year of the revision and future years if the revision affects both current and future years.

These financial statements of the Company were prepared on the going concern basis.

The registered number of the Company is 491487.

2. Material accounting policies

(a) New standards, amendments and interpretations issued and effective for the financial year beginning 1 January 2025

The following new and amended standards and interpretations are not expected to have a material impact on the Company's financial statements:

- Lack of Exchangeability (Amendments to IAS 21).

There are no other new standards, amendments or interpretations issued and effective for the financial year beginning 1 January 2025 that have a material impact on the Company's financial position, performance or disclosures in its financial statements.

(b) New standards, amendments and interpretations issued but not effective for the financial year beginning 1 January 2025 and not early adopted

A number of new standards, amendments to standards and interpretations but are not effective for financial year beginning 1 January 2025, and have not been early adopted in preparing these financial statements.

- IFRS 18: Presentation and Disclosure in Financial Statements was issued in April 2024 and applies to an annual reporting period beginning on or after 1 January 2027. IFRS 18 replaces IAS 1 "Presentation of Financial Statements". IFRS 18 aims to improve financial reporting by requiring additional defined subtotals in the statement of profit or loss, requiring disclosures about management-defined performance measures and adding new principles for grouping (aggregation and disaggregation) of information. The Company is still in the process of assessing the impact of the new accounting standard, particularly with respect to the structure of the Company's statement of profit or loss, the statement of cash flows and the additional disclosures required for management-defined performance. The Company is also assessing the impact on how information is grouped in the financial statements, including for items currently labelled as "other".

The following new and amended standards and interpretations are not expected to have a material impact on the Company's financial statements:

- First-time Adoption of International Financial Reporting Standards (Amendments to IFRS 1) (effective date: 1 January 2026).
- Financial Instruments: Disclosures and it's accompanying Guidance on implementing (Amendments to IFRS 7) (effective date: 1 January 2026).
- Financial Instruments (Amendments to IFRS 9) (effective date: 1 January 2026).
- Consolidated Financial Statements (Amendments to IFRS 10) (effective date: 1 January 2026).
- Statement of Cash flows (Amendments to IAS 7) (effective date: 1 January 2026).
- IFRS 19: Disclosures: Subsidiaries without Public Accountability (effective date: 1 January 2027).

There are no other standards, amendments or interpretations to existing standards that are not yet effective that would be expected to have a material impact on the Company.

2. Material accounting policies (continued)

(c) Foreign currency translation

Functional and presentation currency

The Company's financial statements are presented in US Dollars ("US$") which is the functional currency (the "functional currency"). The functional currency is the currency of the primary economic environment in which the entity operates. The Directors believe that US$ most faithfully represents the economic effects of the underlying transaction events and conditions. The functional currency of all the Sub-Funds is US$ with the exception of EHYB which is Euro (€).

Transactions and balances

Transactions in foreign currencies are translated at the foreign currency exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated to US$ at the foreign currency closing exchange rate ruling at the Statement of Financial Position date. Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of monetary assets and liabilities are recognised in the Statement of Comprehensive Income.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value through profit or loss are translated to US$ at the foreign currency exchange rates ruling at the dates that the values were determined.

Foreign currency exchange differences relating to derivative financial instruments are included in net gain/(loss) on derivatives. All other foreign currency exchange differences relating to monetary items, including cash and cash equivalents are included in the net gain/(loss) on foreign exchange in the Statement of Comprehensive Income. Foreign exchange gains/(losses) on financial assets at fair value through profit or loss are included in realised gain/(loss) on investments in the Statement of Comprehensive Income.

The combined financial statements of the Company are measured in the currency of the primary economic operating environment in which the Company operates, which is the US$. For the purpose of producing the Combined Statement of Financial Position of the Company, the Statements of Financial Position of the individual Sub-Funds are translated into US$ using exchange rates as at 31 December 2025 and accumulated for in the preparation of the combined financial statements.

For the purpose of producing the combined Statement of Comprehensive Income and the combined Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares from the accounts of the individual Sub-Funds, average exchange rates are used. The difference arising from the translation of the primary financial statements at different exchange rates, for the purpose of producing the combined financial statements, is included as a foreign currency translation adjustment in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. This notional adjustment does not have any impact on the NAV of any individual Sub-Fund in its base currency. For the financial year ended 31 December 2025 this adjustment* amounted to US$94,793,216 (31 December 2024: US$(43,740,990)).

*The amounts reflected are inclusive of all Funds in the Company, not just those marketed in Switzerland.

(d) Financial assets and financial liabilities

(i) Recognition and initial measurement

Financial assets and financial liabilities are initially recognised at fair value through profit or loss ("FVTPL") on the Company's Statement of Financial Position on the trade date, which is the date on which the Company becomes a party to the contractual provisions of the instrument. Other financial assets and financial liabilities are recognised at the date they are originated. From this date any gains and losses arising from changes in fair value of the financial assets or financial liabilities are recorded in the Statement of Comprehensive Income.

A financial asset or financial liability is measured initially at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. Transaction costs on financial assets and financial liabilities at fair value through profit or loss are expensed immediately, while on other financial instruments they are amortised.

(ii) Classification and subsequent measurement

(a) Classification of financial assets

On initial recognition, the Company classifies financial assets as measured at amortised cost or FVPTL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVPTL:

- It is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest ("SPPI").

All other financial assets of the Company are measured at FVTPL.

2. Material accounting policies (continued)

(d) Financial assets and financial liabilities (continued)
(ii) Classification and subsequent measurement (continued)
(a) Classification of financial assets (continued)
Business model assessment
In making an assessment of the objective of the business model in which a financial asset is held the Company considers all of the relevant information about how the business is managed, including:

- The documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the Company's management;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How the investment manager is compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.

The Company has determined that it has two business models:

- Held-to-collect business model: this includes cash and cash equivalents, receivable for shares issued, receivable for securities sold, coupon receivable, amounts due from broker and other assets. These financial assets are held to collect contractual cash flow.
- Other business model: this includes debt securities (except financial assets held by the money market fund – see below), equity investments, investments in unlisted open-ended investment funds and unlisted private equities. These financial assets are managed and their performance is evaluated, on a fair value basis, with frequent sales taking place.

Assessment whether contractual cash flows are SPPI
For the purpose of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are SPPI, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- Contingent events that would change the amount or timing of cash flows;
- Leverage features;
- Prepayment and extension features;
- Terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features); and
- Features that modify consideration of the time value of money (e.g. periodical reset of interest rates).

Reclassifications
Financial assets are not reclassified subsequent to their initial recognition unless the Company were to change its business model for managing financial assets, in which case all affected financial assets would be reclassified on the first day of the first reporting period following the change in the business model.

(b) Subsequent measurement of financial assets
Financial assets at FVTPL
These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income and expense and foreign exchange gains and losses, are recognised in the Statement of Comprehensive Income.

Financial assets at amortised cost
These assets are subsequently measured at amortised cost using the effective interest method. Interest income, if any, would be recognised in income from financial assets at fair value through profit or loss foreign exchange gains and losses are recognised in net gain/loss on foreign exchange in the Statement of Comprehensive Income. Any impairment and gain or loss on derecognition is also recognised in profit or loss.

2. Material accounting policies (continued)

(d) Financial assets and financial liabilities (continued)
(ii) Classification and subsequent measurement (continued)
(b) Subsequent measurement of financial assets (continued)
Cash and cash equivalents, receivable for shares issued, receivable for securities sold, coupon receivable, amounts due from broker and other assets are included in this category.

(c) Financial liabilities – Classification, subsequent measurement and gains and losses
Financial liabilities are classified as measured at amortised cost or FVTPL.

A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

Financial liabilities at FVTPL:

- Held-for-trading: derivative financial instruments.

Financial liabilities at amortised cost:

- This includes amounts due to brokers, payable for fund shares purchased, payable for securities purchased, subscriptions received in advance, other payables and accrued expenses, capital gains tax payable and redeemable participating shares.

(iii) Fair value measurement principles
Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Sub-Funds have access to at that date. The fair value of a liability reflects its non-performance risk.

The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the close of trading on the financial year end date. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If a quoted price is not available from a recognised market, or is unrepresentative in the opinion of the Directors or their delegate, such a security shall be valued, by estimating with care and in good faith the probable realisation value of the investment, by the Directors or their delegate or a competent person, which may be the Investment Managers (appointed by the Directors and each approved for the purpose by the Depositary) or valued at the probable realisation value estimated with care and in good faith by any other means, provided that the value is approved by the Depositary.

The value of any security, including debt and equity securities which is not normally quoted, listed or traded on or under the rules of a recognised exchange will be determined in accordance with the above provisions or obtained from an independent pricing source (if available).

The fair value of derivatives that are not exchange traded is estimated at the amount that the Company would receive or pay to terminate the contract, at the Statement of Financial Position date, taking into account current market conditions (volatility, appropriate yield curve) and the current creditworthiness of the counterparties.

(iv) Amortised cost measurement principles
The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance.

2. Material accounting policies (continued)

(d) Financial assets and financial liabilities (continued)

(v) Impairment

IFRS 9 requires an impairment assessment to be carried out on its financial assets. The Directors have assessed that impairment does not apply to financial assets classified as fair value through profit or loss. For financial assets measured at amortised cost, the Directors consider the probability of default to be close to zero, as these instruments have a low risk of default and the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised in the financial statements based on 12-month expected credit losses as any such impairment would be wholly insignificant to the Company.

(vi) Derecognition

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition in accordance with IFRS 9.

A financial liability is derecognised when the obligation specified in the contract is discharged, cancelled or expired. The Company uses the average cost method to determine realised gains and losses on derecognition.

(vii) Forward foreign currency exchange contracts

Forward foreign currency exchange contracts are recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at their fair value. All forwards are carried as assets when fair value is positive and as liabilities when fair value is negative. Any changes in fair value are recognised in the Statement of Comprehensive Income.

The fair value of forwards that are not exchange traded is estimated at the amount that the Company would receive or pay to terminate the contract at the year end date taking into account current market conditions and the current creditworthiness of the counterparties.

The unrealised gain or loss on open forward foreign currency exchange contracts is calculated as the difference between the contract price and the forward price as at financial year end.

(viii) Futures contracts

Futures contracts are commitments either to purchase or sell a designated financial instrument, currency, commodity or an index at a specified future date for a specified price and may be settled in cash or another financial asset. Futures are standardised exchange traded contracts. Initial margin requirements for futures are met in cash or other instruments, and changes in the futures contract values are settled daily. Futures are measured initially at fair value on the date on which the derivative contract is entered into and subsequently remeasured at fair value. Futures contracts have little credit risk because the counterparties are futures exchanges. Any changes in fair value are recognised in the Statement of Comprehensive Income.

(ix) Interest rate swaps

Interest rate swaps (″IRSs″) are used for trading purposes. IRSs are measured initially at fair value on the date on which the derivative contract is entered into and subsequently remeasured at fair value. Any changes in fair value are recognised in the Statement of Comprehensive Income. Fair values are obtained from counterparties or from quoted market prices in active markets, including recent market transactions, and from valuation techniques using discounted cash flow models and option pricing models as appropriate. IRSs are included in assets when the fair value is positive, and in liabilities when the fair value is negative.

(x) Credit default swaps

In a credit default swap (“CDS”), one party makes payments to another party in exchange for the right to receive a specified return (or to put a security) if a credit event (e.g. default or a similar event) occurs with respect to a reference entity or entities. The Company may use credit default swaps contracts to provide a measure of protection against defaults of sovereign or corporate issues (i.e. to reduce risk where the Sub-Fund owns or has exposure to the issuer) or to take an active long or short position with respect to the likelihood of a particular issuer’s default. The maximum exposure the Company has in selling credit protection is equal to the notional amount of such CDS contracts. CDS’s are measured initially at fair value on the date on which the derivative contract is entered into and subsequently remeasured at fair value.

For CDSs on asset-backed securities, a credit event may be triggered by various occurrences, which may include an issuer’s failure to pay principal, maturity extension, rating downgrade or write-down. For CDS contracts on corporate or sovereign issuers, a credit event may be triggered by occurrences such as an issuer bankruptcy, failure to pay interest or principal, repudiation/moratorium and/or restructuring. Any changes in fair value are recognised in the Statement of Comprehensive Income.

2. Material accounting policies (continued)

(d) Financial assets and financial liabilities (continued)

(xi) Currency swaps

A currency swap is an IRS in which the cash flows are in different currencies. Upon initiation of a currency swap, the counterparties make an initial exchange of notional principals in the two currencies. During the life of the currency swap, each party pays interest (in the currency of the principal received) to the other. At the maturity of the currency swap, the parties make a final exchange of the initial principal amounts, reversing the initial exchange at the same spot rate.

(xii) Options

Options are derivative financial instruments that give the buyer, in exchange for a premium payment, the right but not the obligation to either purchase from (call option) or sell to (put option) the writer a specified underlying instrument at a specified price on or before a specified date. Daily fluctuations in the value of the option contract are recorded for financial reporting purposes as unrealised gains or losses by the Funds and are recorded as a realised gain or loss when the position is closed.

The best evidence of fair value of a derivative at initial recognition is the transaction price. Subsequent changes in the fair value of any derivative instrument are recognised immediately in the Statement of Comprehensive Income.

(xiii) Swaptions

Swaptions are options that grant the right, with no obligation, to enter into an underlying swap (see below) on pre-agreed terms. When a swaption is exercised, the treatment of the premium is determined by the type of swaption. For purchased put and written call swaptions, the premium is included with the proceeds from the sale of the underlying swap in determining the realised gain or loss. For purchased call and written put swaptions, the premium is included in determining the initial fair value of the swap purchased. Premiums paid/received from the purchase/sale of swaptions which expire unexercised are treated as realised losses and gains respectively.

(xiv) Cash and cash equivalents

Cash comprises current deposits with banks. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes. Cash and cash equivalents are measured at amortised cost.

Amounts due from/(due to) brokers represents cash due from and to brokers and cash collateral.

(e) Income

(i) Income from financial assets at fair value through profit or loss

Coupon income on financial assets at fair value through profit or loss is included in the Statement of Comprehensive Income. Income not yet received is included in interest receivable in the Statement of Financial Position. Income which suffers a deduction of tax at source is shown gross of withholding tax. Non-recoverable withholding tax and capital gains tax are disclosed separately in the Statement of Comprehensive Income.

(ii) Bank interest and interest expense

Bank interest and interest expense is recognised on an effective interest method and includes interest income and expense from cash and cash equivalents. Bank interest income and expense are included in other income and bank interest in the Statement of Comprehensive Income, respectively. Bank interest income not yet received is included in other receivable in the Statement of Financial Position on an accruals basis.

(f) Expenses

All expenses, including management fees, administration fees and depositary fees, are recognised in the Statement of Comprehensive Income on an accruals basis.

(g) Taxation

The Company is an investment undertaking within the meaning of Section 739B of the Taxes Consolidation Act, 1997 and therefore is not chargeable to Irish tax on its relevant income or relevant gains other than on the occurrence of a chargeable event. The Company is resident for tax purposes in Ireland as it is centrally managed and controlled in Ireland.

Distributions of income and capital gains and interest on securities issued in countries other than Ireland may be subject to taxes including withholding taxes imposed by such countries. The Company may not be able to benefit from a reduction in the rate of withholding tax by virtue of the double taxation treaties in operation between Ireland and other countries.

2. Material accounting policies (continued)

(g) Taxation (continued)

Tax may arise for the Company ("Appropriate Tax") on the happening of a "Chargeable Event" in the Company. A Chargeable Event includes any payments to shareholders by the Company in respect of their shares or any encashment, redemption, cancellation or transfer of shares. On the happening of a Chargeable Event, the Company will deduct the Appropriate Tax on any payment made to the shareholder in respect of the Chargeable Event. On the occurrence of a Chargeable Event where no payment is made, the Company may appropriate or cancel the required number of shares to meet the tax liability.

A Chargeable Event also includes a deemed disposal by a shareholder of their shares at the end of a "relevant period". A relevant period means a period of eight years beginning with the acquisition of the shares and each subsequent period of eight years beginning immediately after the preceding relevant period.

In accounting for uncertainties in income tax, the Investment Manager applies a policy which is based upon the probability and materiality of a tax liability or refund crystallising if the manager were to realise all assets and wind up the fund T+0. The principals of our policy are detailed below.

- If there is a high probability of a tax position arising which represents a material value or devaluation of the investors interest then the manager will accrue for this in the balance sheet.
- If there is a low probability of a tax position arising, but the position would have a material effect on the value of the investors interests, the manager will provide a disclosure in the financial statements so as to ensure that investors are aware of the value at risk to their investment.
- If there is a low probability of a tax position arising and the position would not have a material effect on the value of the investors interests then the manager will not accrue for this in the balance sheet or make a disclosure in the financial statements.

The Prospectus provides a more detailed description of the taxation provisions relating to the Company.

(h) Redeemable participating shares

All redeemable participating shares issued by the Company provide the investors with the right to require redemption for cash at the value proportionate to the investor's share in the relevant Sub-Fund's net assets at the redemption date. In accordance with IAS 32, such instruments give rise to a financial liability for the present value of the redemption amount on the reporting date. Please refer to Note 5 of these financial statements for further details and for details on the swing pricing.

(i) Distributions

Both distribution tranche shares and accumulation tranche shares are available in respect of the active Sub-Funds.

Distribution Shares

The Company intends to declare distributions out of the net investment income and, at the discretion of the Directors, net realised and unrealised capital gains of the Sub-Fund attributable to the distribution tranche shares on or about the last day of each calendar quarter, with the exception of tranche G shares, which distribute on or about the last day of each calendar month. Such distributions will be paid to the shareholders of distribution tranche shares of record of the Sub-Fund within 10 Business Days thereof.

Each distribution declared by the Sub-Fund, on the outstanding shares of the Sub-Fund will, at the election of each shareholder, be paid in cash or in additional shares of the Sub-Fund. This election should initially be made on a shareholder's subscription agreement and may be changed upon written notice to the Sub-Fund at any time prior to the record date for a particular distribution. If no election is made, all dividend distributions will be paid in the form of additional shares. Such reinvestment will be made at the NAV per share of the Sub-Fund as of the dealing day in respect of which such distributions are paid.

Upon the declaration of any distributions to the holders of shares of the Sub-Fund, the NAV per share of the distribution shares of the Sub-Fund will be reduced by the amount of such distributions. Payment of the distributions shall be made as indicated on a shareholder's subscription agreement, as amended from time to time, to the address or account indicated on the register of shareholders.

Any distribution paid on a share of the Sub-Fund that has not been claimed within six years of its declaration shall be forfeited and shall be paid for the benefit of the relevant Sub-Fund. No interest shall be paid on any distribution. Distributions paid during the financial year ended 31 December 2025 and financial year ended 31 December 2024 are detailed in Note 8 of these financial statements.

Accumulation Shares

The Directors do not currently intend to declare any distributions in respect of the accumulation shares. Accordingly, net investment income on the Sub-Fund's investments attributable to the accumulation shares is expected to be retained by the Sub-Fund, which will result in an increase in the NAV per share of the accumulation shares.

2. Material accounting policies (continued)

(i) Distributions (continued)

The Directors nevertheless retain the right to declare distributions in respect of such net investment income on the Sub-Fund's investments attributable to the accumulation tranche shares in their sole discretion. In the event that the Directors have agreed to declare distributions in respect of the accumulation tranche shares in a Sub-Fund, shareholders will be notified in advance of any such change in the distribution policy (including the date by which distributions will be paid and the method by which distributions will be paid) and full details will be disclosed in an updated Supplement.

Distributions are recognised in the Statement of Comprehensive Income as finance costs when they are authorised and no longer at the discretion of the relevant Sub-Fund.

(j) Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on the purchase and sale of bonds are included in the purchase and sale price of the investment. They cannot be practically or reliably gathered as they are embedded in the cost of the investment and cannot be separately verified or disclosed. Transaction costs charged by the Depositary on the settlement of purchases and sales of investments are included in operating expenses in the Statement of Comprehensive Income for each Sub-Fund. These costs are separately identifiable and are disclosed in Note 9 of these financial statements.

(k) Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

3. Cash and cash equivalents

Cash and cash equivalents are held with the Depositary, State Street Custodial Services (Ireland) Limited. State Street Corporation, the parent company of the Depositary, had a Standard & Poor's credit rating of A as at 31 December 2025 (31 December 2024: A).

4. Amounts due (to)/from broker

Swap collateral is held by the following counterparties with the following publicly quoted credit ratings as per Standard & Poor's at 31 December 2025 and 31 December 2024:

	Public rating 31 December 2025	Public rating 31 December 2024
Bank of America	A+	A+
Barclays Bank	A+	A+
BNP Paribas	A+	A+
Citibank	A+	A+
Credit Agricole	A+	-
Deutsche Bank AG	A	-
Goldman Sachs	A+	A+
HSBC Bank	A+	A+
JP Morgan	AA-	AA-
Morgan Stanley	A+	A+
National Australia Bank	-	AA-
Standard Chartered Bank	-	A+
State Street Bank and Trust Co.	AA-	AA-

4. Amounts due (to)/from broker (continued)

The table below provides a breakdown of the Sub-Funds with amounts due from broker, due to broker and cash collateral for the financial year ended 31 December 2025:

	GSSB Fund 31 December 2025 US$	EHYB Fund 31 December 2025 €	GHYB Fund 31 December 2025 US$	EMCB Fund 31 December 2025 US$	EMLD Fund 31 December 2025 US$	IN Fund 31 December 2025 US$
Cash due from broker	-	-	-	19,914	8,021,789	81,025
Cash collateral	8,180,000	410,000	5,080,000	-	7,055,407	-
Cash due to broker	-	-	-	-	(8,258,644)	(4,683)
Cash collateral	(7,300,000)	-	(17,750,000)	-	(5,770,000)	-

	EMDBTR Fund 31 December 2025 US$	EMSD Fund 31 December 2025 US$	DEMHYB Fund 31 December 2025 US$	Total* 31 December 2025 US$
Cash due from broker	587,296	3,462,399	-	12,687,365
Cash collateral	1,540,000	-	400,000	23,247,250
Cash due to broker	(571,595)	(1,245,997)	-	(10,108,629)
Cash collateral	(2,060,000)	(7,130,000)	-	(41,300,000)

The table below provides a breakdown of the Sub-Funds with amounts due from broker, due to broker and cash collateral for the financial year ended 31 December 2024:

	GSSB Fund 31 December 2024 US$	EHYB Fund 31 December 2024 €	GHYB Fund 31 December 2024 US$	EMCB Fund 31 December 2024 US$	EMLD Fund 31 December 2024 US$	IN Fund 31 December 2024 US$
Cash due from broker	-	-	-	218,265	5,589,460	254,915

Cash due from broker	1,682,245	813,860	-	9,290,487
Cash collateral	12,790,000	8,680,000	-	67,609,940
Cash due to broker	(1,859,453)	(9,475)	-	(7,672,941)
Cash collateral	(2,910,000)	(8,768,673)	(530,000)	(22,658,673)

* The amounts reflected are inclusive of all Funds in the Company, not just those marketed in Switzerland.

5. Redeemable participating shares

The authorised maximum share capital of the Company is 500,000,000,000 shares of no par value.

The minimum issued share capital of the Company shall be 300,002 represented by 300,002 subscriber shares of no par value issued for €1 each. As at the financial year end, two subscriber shares of €1 each were in issue, with one subscriber share each being legally and beneficially owned by Barings (U.K.) Limited and Barings LLC. The subscriber shares do not form part of the NAV of the Company and are thus disclosed in the financial statements by way of this note only.

The issued redeemable share capital is at all times equal to the net assets attributable to holders of redeemable participating shares. Redeemable participating shares are redeemable at the shareholders' option and are classified as financial liabilities.

5. Redeemable participating shares (continued)

Each of the shares entitles the holder to attend and vote at meetings of the Company and of the Sub-Funds represented by those shares. Each shareholder shall be entitled to such number of votes as shall be produced by dividing the aggregate NAV of that shareholder's shareholding (expressed or converted in base currency, calculated as of the relevant record date and excluding, where appropriate, the impact of any tranche currency hedging) by one. Where a separate written resolution or general meeting of a particular tranche is held, in such circumstances, the shareholder's votes shall be calculated by reference only to the NAV of each shareholder's shareholding in that particular tranche, as appropriate. The subscriber shares entitle the shareholders holding them to attend and vote at all meetings of the Company, but do not entitle the holders to participate in the dividends or net assets of any Sub-Fund.

The Company's capital is represented by the redeemable participating shares outstanding.

Shareholders may request that shares of a Sub-Fund be redeemed on any dealing day by completing and submitting a redemption application to the Administrator to arrive no later than the redemption cut-off time in order to be effective on a dealing day.

A dealing day is deemed to be each business day (unless the determination of the NAV of the Sub-Fund has been suspended for the reasons specified in the Prospectus and provided that if the day is a business day other than one which is as defined in the relevant Supplement, the Company will provide advance notice of this fact to all Shareholders in the Sub-Fund), or any other day which the Directors have determined, subject to advance notice to all shareholders in the Sub-Fund and provided there is at least one dealing day per fortnight.

Swing pricing is applied to a Sub-Fund once net subscriptions or redemptions for a Sub-Fund relating to a Sub-Fund's NAV for a given dealing day is determined by the Administrator to exceed certain predetermined percentage thresholds. In calculating the swing pricing, the NAV of a Sub-Fund is swung by a "swing factor", the Directors may, in respect of net redemptions, adjust downward the NAV per Share and may also, in respect of net subscriptions, adjust upward the NAV per Share.

In addition, the calculation of such prices and the amount of such adjustment may take into account any provision for the estimated market spreads, duties and charges and other dealing costs related to the adjustment or disposal of investments and to preserve the value of the underlying assets of the relevant Sub-Fund. The Directors' intention is only to exercise this discretion to preserve the value of the holdings of the continuing shareholders in the event of substantial or recurring net redemptions or subscriptions of Shares in the relevant Sub-Fund. If the NAV of a Sub-Fund is swung on a specific dealing day the official price for a Sub-Fund will be the derived swing price. In addition, all dealing activity for this dealing day will be dealt at the swing price. Swing pricing applied to a Sub-Fund during the financial year is recognised within the share transactions figure on the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. As at 31 December 2025 and 31 December 2024, no swing pricing was applied to the Sub-Funds. During the financial year ended 31 December 2025, swing pricing was applied to Barings Emerging Markets Corporate Bond Fund and Barings Emerging Markets Debt Blended Total Return Fund at various dealing days when net subscriptions or redemptions exceeded certain predetermined percentage thresholds.

The Sub-Funds operate equalisation in relation to the Distribution Tranche Shares. A Shareholder who has purchased Distribution Tranche Shares during a distribution period will receive a dividend made up of (a) income which has accrued from the date of purchase; and (b) capital which represents the return of the equalisation element calculated by the Administrator on behalf of the Sub-Fund. The effect is that income is distributed to Shareholders in proportion to the duration of their ownership of the Distribution Tranche Shares in the relevant distribution period.

Equalisation is included in Issue of redeemable participating shares during the financial year and Redemption of redeemable participating shares during the financial year, in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

A summary of the shareholder activity during the current year and the previous year is detailed hereunder:

5. Redeemable participating shares (continued)

Financial year ended 31 December 2025

GSSB Fund	Balance at 1 January 2025	Issued	Redeemed	Balance at 31 December 2025	Subscriptions US$	Redemptions US$

Investment Manager's fees* of US$75,817,051 (31 December 2024: US$65,795,461) have been charged for the financial year ended 31 December 2025, of which US$6,646,504 (31 December 2024: US$5,682,219) was still outstanding as at 31 December 2025. The Investment Manager's fees and the balance outstanding for each Sub-Fund is disclosed in the Statement of Comprehensive Income and Note 6 of these financial statements, respectively.

As part of the investment management agreement, certain expenses of the Sub-Funds are capped at 20 basis points ("bps") of the net assets attributable to holders of redeemable participating shares, with the exception of IN Fund which is capped at 10 bps, thus resulting in an expense reimbursement from the Investment Managers. A management fee reimbursement of US$466,249 (31 December 2024: US$413,922) has been charged for the financial year ended 31 December 2025, of which US$54,329 (31 December 2024: US$37,915) was still outstanding as at 31 December 2025. The management fee reimbursement for the financial year and the balance outstanding at the financial year end for each Sub-Fund is disclosed in the Statement of Comprehensive Income under Other Income - Management fee reimbursement category and Statement of Financial Position under Other assets category.

*The amounts reflected are inclusive of all Funds in the Company, not just those marketed in Switzerland.

Distributors

The Company has appointed Barings (U.K.) Limited, Barings Australia Pty Limited, Barings Securities LLC, Baring Asset Management Limited, Baring International Fund Managers (Ireland) Limited, Baring SICE (Taiwan) Limited, Baring France SAS, Baring Asset Management Switzerland S.a.r.l., Baring Asset Management (Asia) Limited, Baring International Investment Limited and Barings LLC as Distributors.

Tranche N Distributor fees rate is 0.70% for all Sub-Funds, with exception of EMDSD Fund and IN Fund for which rate is 0.60%.

9. Significant agreements and fees (continued)

Distributors (continued)
Distributor fees* of US$1,758,383 (31 December 2024: US$1,458,194) have been charged for the financial year ended 31 December 2025, of which US$183,148 (31 December 2024: US$121,000) was still outstanding as at 31 December 2025.

Distributor fees are included within Other operating expenses in Note 7 of these financial statements.

*The amounts reflected are inclusive of all Funds in the Company, not just those marketed in Switzerland.

Administration, Depositary and Operating fees
The aggregate fees and expenses of the Administrator and Depositary which shall accrue daily and be payable monthly in arrears out of the assets of the Sub-Funds will not exceed 0.20%, (except for IN Fund which will not exceed 0.10%) per annum of the NAV of the relevant Sub-Fund as detailed in the relevant Supplement of the Prospectus. Please refer to the Investment Manager's disclosure above for actions taken if the combined expenses are above or below 0.20% or 0.10% per annum of the NAV of the relevant Sub-Fund.

Administrator fees* of US$5,630,182 have been charged for the financial year ended 31 December 2025 (31 December 2024: US$4,912,112), of which US$504,854 was still outstanding as at 31 December 2025 (31 December 2024: US$463,861).

Depositary fees* of US$605,022 have been charged for the financial year ended 31 December 2025 (31 December 2024: US$513,760), of which US$41,760 is still outstanding as at 31 December 2025 (31 December 2024: US$49,731).

*The amounts reflected are inclusive of all Funds in the Company, not just those marketed in Switzerland.

Directors' fees
Directors' fees* of US$94,608 (31 December 2024: US$78,529) have been charged for the financial year of which US$8,209 is still outstanding as at 31 December 2025 (31 December 2024: US$6,517). All of these fees were emoluments in respect of services to the Company. The Directors' fees for each Sub-Fund are disclosed in Note 7 of these financial statements. The listing of the members of the Board is shown on page 2.

*The amounts reflected are inclusive of all Funds in the Company, not just those marketed in Switzerland.

Auditor fees
The table below provides a breakdown of the total fee (inclusive of out of pocket expenses) exclusive of VAT accrued to the statutory auditor during the financial years ended 31 December 2025 and 31 December 2024.

	Company Total* 31 December 2025 US$	Company Total* 31 December 2024 US$
Statutory audit fee	(360,303)	(345,950)
Tax advisory services	(52,073)	(38,489)
	(412,376)	(384,439)

*The amounts reflected are inclusive of all Funds in the Company, not just those marketed in Switzerland.

Transaction costs
The table below provides a breakdown of the Sub-Funds that incurred transaction costs on the purchase and sale of investments during the financial years ended 31 December 2025 and 31 December 2024:

Sub-Fund	31 December 2025	31 December 2024
GSSB Fund	US$221	-
EHYB Fund	US$2,072	US$4
GHYB Fund	US$450	US$4
EMCB Fund	US$348	US$3,270
EMLD Fund	US$4,270	US$128,792
IN Fund	US$2,382	US$7,130
EMDBTR Fund	US$14,486	US$91,227
EMSD Fund	US$66,589	US$85,903
DEMHYB Fund	US$59	-

9. Significant agreements and fees (continued)

Transaction costs (continued)
Due to operational challenges in extracting the transaction costs on the purchase and sale of forward foreign currency exchange contracts, transaction costs on these instruments cannot be identified separately in this note. Purchases and sales transaction costs are included in "Realised gain/(loss) on investments" in the Statement of Comprehensive Income.

10. Related party transactions

Investment by Ultimate Parent of the Investment Manager
Massachusetts Mutual Life Insurance Company (the ultimate parent company of Barings (U.K.) Limited and Barings LLC) held the following percentage of shares in issuance in the Sub-Funds at 31 December 2025 and 31 December 2024:

In-specie
There were no in-specie transactions during the financial year ended 31 December 2025.

On 6 December 2024, non-cash assets amounting to US$80,942,836 and cash amounting to US$703,512 were received by Barings Global High Yield Bond Fund from UBS Group AG, as part of US$81,646,348 in-specie subscription.

Investment by the Investment Manager
Barings LLC held the following percentage of shares in issuance in the Sub-Funds at 31 December 2025 and 31 December 2024:

Sub-Fund	Investment Managers	31 December 2025	31 December 2024
GSSB Fund	Barings LLC	0.00%	0.01%
EHYB Fund	Barings LLC	0.02%	0.03%
GHYB Fund	Barings LLC	0.02%	0.03%
EMCB Fund	Barings LLC	58.12%	64.44%
EMLD Fund	Barings LLC	0.01%	0.01%
EMDSD Fund	Barings LLC	0.20%	0.12%
IN Fund	Barings LLC	40.77%	45.90%
EMDBTR Fund	Barings LLC	72.41%	0.07%
EMSD Fund	Barings LLC	0.05%	0.05%
USHYB Fund	Barings LLC	59.32%	62.25%
DEMHYB Fund	Barings LLC	0.00%	0.00%

At 31 December 2025 the following Sub-Funds were consolidated with Barings LLC as they are controlled by Barings:
- Barings Emerging Markets Corporate Bond Fund ("EMCB Fund")
- Barings U.S High Yield Bond Fund ("USHYB Fund").
- Barings Income Navigator Fund ("IN Fund").
- Barings Emerging Markets Debt Blended Total Return Fund ("EMDBTR Fund").

Investment by other related parties
Baring SICE (Taiwan) Limited, Distributor to the Company, held the following percentage of shares in issuance in the Sub-Funds at 31 December 2025 and 31 December 2024:

Sub-Fund	Distributors	31 December 2025	31 December 2024
GSSB Fund	Baring SICE (Taiwan) Limited	0.90%	3.19%
GHYB Fund	Baring SICE (Taiwan) Limited	1.46%	1.66%

Investment by other related parties - affiliated entities
At 31 December 2025, Barings Global Senior Secured Bond Private Fund 1 held 1.64% (31 December 2024: 3.71%) of the shares in issuance of the Barings Global Senior Secured Bond Fund.

At 31 December 2025, Barings Global Senior Secured Bond Private Fund 2 held 1.53% (31 December 2024: 2.21%) of the shares in issuance of the Barings Global Senior Secured Bond Fund.

At 31 December 2025, Barings Global High Yield Bond Private Fund held 1.51% (31 December 2024: 1.45%) of the shares in issuance of the Barings Global High Yield Bond Fund.

At 31 December 2025, Barings Global High Yield Bond Private Fund 2 held 0.94% (31 December 2024: 0.66%) of the shares in issuance of the Barings Global High Yield Bond Fund.

10. Related party transactions (continued)

Investment by other related parties (continued)
Investment by other related parties - affiliated entities (continued)
At 31 December 2025, Barings Global High Yield Bond Private Fund 3 holds 0.56% (31 December 2024: 0.92%) of the shares in issuance of the Barings Global High Yield Bond Fund.

At 31 December 2025, Barings Global High Yield Bond Private Fund 5 holds 6.59% (31 December 2024: 11.66%) of the shares in issuance of the Barings Global High Yield Bond Fund.

At 31 December 2025, Barings Global High Yield Bond Private Fund 6 holds 6.11% (31 December 2024: 2.76%) of the shares in issuance of the Barings Global High Yield Bond Fund.

Cross investments within the Company
At 31 December 2025 and 31 December 2024, there were no cross investments between any of the Sub-Funds.

Transactions with entities with significant influence
Subscriber Shares
Barings (U.K.) Limited and Barings LLC each own one subscriber share in the Company.

Directors' relationships
Mr. Alan Behen and Mr. Paul Smyth are employees of the Baring International Fund Managers (Ireland) Limited, the Manager.

Each of the Directors are directors of Baring International Fund Managers (Ireland) Limited, the Manager.

For the financial years ended 31 December 2025 and 31 December 2024, these Directors waived their Directors' fees. While these Directors don't receive fees from the Company directly for their role as Directors, they are paid through their employment with Barings LLC, its subsidiaries and the Manager. The Investment Managers receive fees as outlined in Note 9 of these financial statements. The remaining Directors earned Directors' fees as outlined in Notes 7 and Note 9 of these financial statements.

Transactions
The following related party transactions took place with other funds managed by the Investment Managers whereby the Sub-Funds within the Company bought assets from other funds managed by the Investment Managers. These transactions were not within the umbrella of the Company and therefore they were not eliminated on consolidation. There were no related party transactions with other funds, managed by the same Investment Managers, which were not within the umbrella during the financial year ended 31 December 2025.

Trade details during the financial year ended 31 December 2024:	Purchases Trade Value	Sales Trade Value
GSSB Fund	US$8,498,661	US$1,536,621
EHYB Fund	€5,017,956	-
GHYB Fund	US$18,700,142	-

11. Financial risk management

In accordance with IFRS 7 Financial Instruments: Disclosure, this note details the way in which the Company manages risks associated with the use of financial instruments.

The Sub-Funds of the Company are exposed to a variety of financial risks in pursuing their stated investment objectives and policies. These risks include, but are not limited to, credit risk, liquidity risk and market risk (which includes foreign currency risk, interest rate risk and market price risk). The Sub-Funds assume exposure to these risks to generate investment returns on their portfolios, although these risks can also potentially result in a reduction in the Sub-Funds' net assets.

The Investment Managers will use their best endeavours to minimise the potentially adverse effects of these risks on the Sub-Funds' performance where it can do so, while still managing the investments of the Sub-Funds in a way that is consistent with the Sub-Funds' investment objectives and policies. Asset selection, asset allocation and cash management are determined by the Investment Managers who manage the distribution of the assets to achieve the investment objectives. The composition of the portfolios are monitored by the Investment Managers on an intraday basis.

The investment objectives of the Sub-Funds are disclosed in the Prospectus and in the introduction to the financial statements. The risks, and the measures adopted by the Sub-Funds for managing these risks, are detailed below.

The nature and extent of the financial instruments outstanding at the Statement of Financial Position date and the risk management policies employed by the Company are discussed below. These policies have remained substantially unchanged since the beginning of the financial year to which these financial statements relate.

11. Financial risk management (continued)

The Sub-Funds' investment portfolios comprise of debt instruments that they each intend to hold for an indefinite period of time. The Sub-Funds also maintain positions in derivative financial instruments, for the purpose of efficient portfolio management.

Market risk

Market risk embodies the potential for both losses and gains and includes foreign currency risk, interest rate risk and price risk, which are discussed in detail under separate headings within this note.

The Sub-Funds' exposure to market risk is that the value of assets will generally fluctuate with, among other things, general economic conditions, the condition of certain financial markets, international political events, developments or trends in any particular industry and the financial condition of the issuers of the bonds that the Sub-Funds invest in.

The Sub-Funds' market risk is managed on a daily basis by the Investment Managers in accordance with policies and procedures in place. The Sub-Funds' overall market positions are reported to the Board on a quarterly basis.

As the majority of the financial instruments are carried at fair value through the profit or loss, all changes in market conditions will directly impact the net assets of the Sub-Funds.

Foreign currency risk

Foreign currency risk is defined in IFRS 7 as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. This risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

Forward foreign currency exchange contracts are entered into by the GSSB Fund, GHYB Fund, EMCB Fund, EMLD Fund, EMDSD Fund, IN Fund, EMDBTR Fund, EMSD Fund, USHYB Fund and DEMHYB Fund to hedge non-US$ denominated assets back into US$, the Sub-Funds' base currency. Forward foreign currency exchange contracts are entered into by EHYB Fund to hedge non-€ denominated assets back into €, the Sub-Fund's base currency. The Investment Managers have appointed State Street Bank Europe Limited to implement and manage this FX process. The Investment Managers regularly review such positions to ensure that they are in line with the Sub-Funds' investment policies.

The Sub-Funds are exposed to foreign currency risk, as assets and liabilities of the Sub-Funds may be denominated in a currency other than the functional currencies of the Sub-Funds, which is Euro and US Dollar. The fluctuations in the rate of exchange between the currency in which the asset or liability is denominated and the functional currency could result in an appreciation or depreciation in the fair value of those assets and liabilities. The Investment Managers are permitted but not obliged to use hedging techniques to attempt to offset market and foreign currency risk.

Foreign exchange transactions and other currency contracts may also be used to provide protection against exchange risks or to actively overlay currency views onto the Sub-Funds' currency exposure resulting from investing in foreign markets. Such contracts may, at the discretion of the Investment Managers, be used to hedge some or all of the foreign currency risk arising as a result of the fluctuation between the denominated currency of the Sub-Funds and the currencies in which the Sub-Funds' investments are denominated, or to pursue an active currency overlay strategy.

A Sub-Fund may (but is not obliged to) enter into certain currency-related transactions in order to hedge the currency exposure of the assets of a Sub-Fund attributable to a particular tranche into the currency of denomination of the relevant tranche.

Any currency exposure of a tranche may not be combined with or offset against that of any other tranche of a Sub-Fund. The currency exposure of the assets attributable to a tranche may not be allocated to other tranches. A tranche will not be leveraged as a result of currency hedging transactions, so that the use of such hedging instruments shall in no case exceed 100% of the NAV attributable to the relevant tranche of a Sub-Fund.

In accordance with the Company's policy, the Investment Managers monitor the Sub-Funds' currency exposures on a daily basis and reports regularly to the Board of the Company, which reviews the information provided by the Investment Managers on any significant exposures at its periodic meetings.

11. Financial risk management (continued)

Foreign currency risk (continued)

The following tables set out each Sub-Fund's exposure to foreign currency risk and the net exposure to foreign currencies of the monetary assets and liabilities as at 31 December 2025.

GSSB Fund:

Sensitivity analysis

The below currency sensitivity analysis information is a relative estimate of risk and is not intended to be a precise and accurate number. The calculations are based on historical data. Future rate movements and correlations between currencies could vary significantly from those experienced in the past.

11. Financial risk management (continued)

Foreign currency risk (continued)

Sensitivity analysis (continued)

At 31 December 2025, had the exchange rate between the US Dollar or Euro and other currencies increased or decreased by 5% (31 December 2024: 5%) with all other variables held constant, the increase or decrease in the value of the net assets attributable to holders of redeemable participating shares would be as follows:

* The amounts reflected are inclusive of all Funds in the Company, not just those marketed in Switzerland.

Interest rate risk
This risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. This risk arises on financial instruments whose fair value or future cash flows are affected by changes in interest rates. The Company is exposed to interest rate risk through the fixed income portion of its assets.

Interest rate risks are managed by the Investment Managers, whose management of interest rate risk is monitored through regular performance reviews with senior managers as well as through monthly peer reviews of the Sub-Funds' positioning held with senior managers.

All other financial assets and financial liabilities held by the Sub-Funds, with the exception of cash at bank balances and overdrawn cash, are not directly exposed to interest rate risk. The Sub-Funds are exposed to interest rate risk on the interest earned on their cash and bank balances and paid on overdrawn cash. This exposure is not considered to be significant.

11. Financial risk management (continued)

Interest rate risk (continued)

The following table details each Sub-Fund's exposure to interest rate risk. It includes the Sub-Funds' assets and trading liabilities at fair values, categorised by maturity date and measured by the carrying value of the assets and liabilities at 31 December 2025:

GSSB Fund Assets	Within 1 year US$	1-5 years US$	Greater than 5 years US$	Non-interest bearing US$	Total US$
Financial assets at fair value through profit or loss:

Sensitivity analysis

The below interest rate sensitivity analysis information is a relative estimate of risk and is not intended to be a precise and accurate number. The calculations are based on historical data. Future interest rate movements could vary significantly from those experienced in the past.

11. Financial risk management (continued)

Interest rate risk (continued)

Sensitivity analysis (continued)

Based on the portfolios' composition as at 31 December 2025, the corresponding (decrease)/increase in net assets attributable to holders of redeemable participating shares, from an increase/(decrease) in average interest rates would be as follows:

Interest rate change %	GSSB Fund 31 December 2025 % Effect on NAV	EHYB Fund 31 December 2025 % Effect on NAV	GHYB Fund 31 December 2025 % Effect on NAV	USHYB Fund 31 December 2025 % Effect on NAV	DEMHYB Fund 31 December 2025 % Effect on NAV
-1.00%	+2.24%	+2.36%	+2.40%	+2.73%	+2.74%
-1.50%	+3.35%	+3.54%	+3.60%	+4.09%	+4.10%
-2.00%	+4.47%	+4.72%	+4.81%	+5.45%	+5.47%

Interest rate change %	GSSB Fund 31 December 2025 % Effect on NAV	EHYB Fund 31 December 2025 % Effect on NAV	GHYB Fund 31 December 2025 % Effect on NAV	USHYB Fund 31 December 2025 % Effect on NAV	DEMHYB Fund 31 December 2025 % Effect on NAV
+1.00%	-2.24%	-2.36%	-2.40%	-2.73%	-2.74%
+1.50%	-3.35%	-3.54%	-3.60%	-4.09%	-4.10%
+2.00%	-4.47%	-4.72%	-4.81%	-5.45%	-5.47%

Based on the portfolios' composition as at 31 December 2024, the corresponding (decrease)/increase in net assets attributable to holders of redeemable participating shares, from an increase/(decrease) in average interest rates would be as follows:

Interest rate change %	GSSB Fund 31 December 2024 % Effect on NAV	EHYB Fund 31 December 2024 % Effect on NAV	GHYB Fund 31 December 2024 % Effect on NAV	USHYB Fund 31 December 2024 % Effect on NAV	DEMHYB Fund 31 December 2024 % Effect on NAV
-1.00%	+2.59%	+2.51%	+2.91%	+3.10%	+3.00%
-1.50%	+3.89%	+3.77%	+4.37%	+4.66%	+4.50%
-2.00%	+5.19%	+5.02%	+5.82%	+6.21%	+5.99%

Interest rate change %	GSSB Fund 31 December 2024 % Effect on NAV	EHYB Fund 31 December 2024 % Effect on NAV	GHYB Fund 31 December 2024 % Effect on NAV	USHYB Fund 31 December 2024 % Effect on NAV	DEMHYB Fund 31 December 2024 % Effect on NAV
+1.00%	-2.59%	-2.51%	-2.91%	-3.10%	-3.00%
+1.50%	-3.89%	-3.77%	-4.37%	-4.66%	-4.50%
+2.00%	-5.19%	-5.02%	-5.82%	-6.21%	-5.99%

Accordingly, an increase/decrease of 200 bps in average interest rates as at the reporting date would have decreased/increased the net assets attributable to holders of redeemable participating shares by:

Fund	31 December 2025	31 December 2024
GSSB Fund	US$148,710,894	US$116,738,434
EHYB Fund	€32,241,646	€34,092,545
GHYB Fund	US$214,565,762	US$245,531,262
USHYB Fund	US$3,327,289	US$3,337,541
DEMHYB Fund	US$15,334,903	US$17,758,004

Price risk

Market price risk is defined as the risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices.

11. Financial risk management (continued)

Price risk (continued)
The Sub-Funds' assets consist principally of bonds, equity instruments, investment funds, futures, options, forward foreign currency exchange contracts and swaps. The values of these instruments are determined by market forces, and there is accordingly a risk that market prices can change in a way that is adverse to the Sub-Funds' performance. These financial instruments are carried at fair value in the Statement of Financial Position. For certain other financial instruments, including other debtors, accounts payable and accrued expenses, the carrying amounts approximate fair value due to the immediate or short-term nature of these financial instruments. The Sub-Funds have adopted a number of investment restrictions, which are set out in the Company's Prospectus, which limit the exposure of the Sub-Funds to adverse changes in the price of any individual financial asset.

In accordance with the Sub-Funds' policies, the Investment Managers monitor the Sub-Funds' positions on a daily basis and reports regularly to the Board of Directors of the Manager, which reviews the information on the Sub-Funds' overall market exposures provided by the Investment Managers at its periodic meetings.

The Investment Managers use three techniques to help in the risk management process: monitoring of compliance and quantitative limits, prevention of limit breaches and trade monitoring. These techniques allow the Investment Managers to ensure that the Sub-Funds remain in compliance with the restrictions in the Prospectus and with the undertakings for the UCITS Regulations by which the Sub-Funds are governed.

In addition, the Investment Managers manages the exposure of the portfolio to the risk of adverse changes in the general level of market prices, as determined by market forces, through adhering to its formal risk management process, which includes the use of systems and technology to monitor overall market and position risk on a daily basis.

The maximum risk arising from an investment (except for derivatives) is determined by the fair value of the financial instruments. The overall market exposures and concentration of risk can be seen in the Schedule of Investments and Statement of Financial Position of each Sub-Fund.

Sensitivity analysis
The below price sensitivity analysis information is a relative estimate of risk and is not intended to be a precise and accurate number. The calculations are based on historical data. Future price movements could vary significantly from those experienced in the past.

A 5% increase or decrease in investment prices at 31 December 2025 and 31 December 2024 would have increased or decreased the value of investments at fair value through profit or loss as follows:

GSSB Fund 31 December 2025	EHYB Fund 31 December 2025	GHYB Fund 31 December 2025	EMCB Fund 31 December 2025	EMLD Fund 31 December 2025

* The amounts reflected are inclusive of all Funds in the Company, not just those marketed in Switzerland.

Credit Risk
This is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. This includes counterparty risk and issuer risk. In relation to the Company, it can arise from receivables due from another party, placing deposits with other entities, purchases of debt securities and entering into derivative contracts.

11. Financial risk management (continued)

Credit Risk (continued)

The Sub-Funds minimise concentrations of credit risk by undertaking transactions with a large number of counterparties. The Company's Prospectus and the UCITS regulations list various investment restrictions with regard to issuer and counterparty concentration limits and minimum counterparty credit ratings.

Issuer risk is associated with transacting in exchange traded debt securities and is monitored by use of credit ratings. For Sub-Funds investing in debt securities, the investment objective and policy provides details of the credit rating restrictions imposed on that Sub-Fund.

The Sub-Funds' credit risk concentration is spread between a number of issuers. At 31 December 2025, the top ten holdings in the Company represented 4.63% (31 December 2024: 5.65%) of the Company's assets.

The carrying amounts of financial assets best represent the maximum credit risk exposure at the financial year end date. The Investment Managers through their investment strategy will endeavour to avoid losses relating to defaults on the underlying assets. In-house research is used to identify asset allocation opportunities amongst various fixed income asset classes and to take advantage of episodes of market mispricing. The Sub-Funds may utilise different financial instruments to seek to hedge against declines in the value of the Sub-Fund's positions as a result of changes in currency exchange rates. The Sub-Funds are exposed to credit risk associated with the counterparties to the forward foreign currency exchange contracts with whom it trades and will also bear the risk of settlement default.

At 31 December 2025, the Sub-Funds held investments in bonds with the following publicly quoted credit ratings as per Standard & Poor's:

Public rating	GSSB Fund 31 December 2025 % of Market Value	EHYB Fund 31 December 2025 % of Market Value	GHYB Fund 31 December 2025 % of Market Value	EMCB Fund 31 December 2025 % of Market Value	EMLD Fund 31 December 2025 % of Market Value	EMDSD Fund 31 December 2025 % of Market Value

Credit risk arising on transactions with brokers relates to transactions awaiting settlement. The Sub-Funds monitor the credit rating and financial positions of the brokers used to mitigate this risk. The Investment Managers also monitor the settlement process on a regular basis.

At the reporting date, the Sub-Funds' financial assets exposed to credit risk are as follows:

	GSSB Fund 31 December 2025 US$	EHYB Fund 31 December 2025 €	GHYB Fund 31 December 2025 US$	EMCB Fund 31 December 2025 US$	EMLD Fund 31 December 2025 US$	EMDSD Fund 31 December 2025 US$

11. Financial risk management (continued)

Credit Risk (continued)

Substantially all of the assets of the Sub-Funds (including cash) are held by the Depositary, State Street Custodial Services (Ireland) Limited. Bankruptcy or insolvency of the Depositary may cause the Sub-Funds' rights with respect to securities held by the Depositary to be delayed or limited. The Sub-Funds monitor their risk by monitoring the credit quality and financial positions of the Depositary. The long-term credit rating of State Street Corporation, the parent company of the Depositary was A as at 31 December 2025 (31 December 2024: A). The Sub-Funds' assets and cash are maintained within the Depositary's custodial network in segregated accounts. The Depositary will ensure that any agent it appoints to assist in safekeeping the assets of the Sub-Funds will segregate these assets. Thus, in the event of insolvency or bankruptcy of the Depositary, the Sub-Funds' assets are segregated and protected and this further reduces counterparty risk.

The Sub-Funds' Investment Managers analyse credit concentration based on the counterparty, industry and geographical location of the financial assets that the Sub-Funds hold. The Sub-Funds' financial assets exposed to credit risk were concentrated in the following industries:

	GSSB Fund 31 December 2025 % of Market Value	EHYB Fund 31 December 2025 % of Market Value	GHYB Fund 31 December 2025 % of Market Value	EMCB Fund 31 December 2025 % of Market Value	EMLD Fund 31 December 2025 % of Market Value	EMDSD Fund 31 December 2025 % of Market Value

Credit risk also incorporates counterparty risk which covers the likelihood of a counterparty failing which would principally arise on transactions with brokers that are awaiting settlement. Risk relating to unsettled transactions is considered small due to the approval process of the brokers used and an active settlement process employed from the outset by the Investment Managers.

At 31 December 2025 the Sub-Funds' financial assets exposed to credit risk were concentrated in the following geographical areas:

	GSSB Fund 31 December 2025 % of Market Value	EHYB Fund 31 December 2025 % of Market Value	GHYB Fund 31 December 2025 % of Market Value	EMCB Fund 31 December 2025 % of Market Value	EMLD Fund 31 December 2025 % of Market Value	EMDSD Fund 31 December 2025 % of Market Value

11. Financial risk management (continued)

Credit Risk (continued)

None of the financial assets and financial liabilities are offset in the Statement of Financial Position. Certain financial assets and financial liabilities are subject to an enforceable master netting arrangement or similar agreement that covers similar financial instruments. While the terms and conditions of these agreements may vary, all transactions under any such agreement constitute a single contractual relationship. Each party's obligation to make any payments, deliveries or other transfers in respect of any transaction under such an agreement may be netted against the other party's obligations under such agreement. A default by a party in performance with respect to one transaction under such an agreement would give the other party the right to terminate all transactions under such agreement and calculate one net amount owed from one party to the other. The following tables present information about the offsetting of derivative instruments.

The Company further mitigates its counterparty credit risk on certain derivative transactions by exchanging collateral in the form of stock or cash with certain counterparties with which it trades under ISDA documentation. Stock collateral is held with State Street Custodial Services (Ireland) Limited, but does not form part of the Sub-Funds' NAV at 31 December 2025. The value of collateral pledged by the various counterparties is disclosed at the end of each Sub-Funds' Schedule of Investments. Cash collateral received by the Sub-Funds is reflected as an asset and liability in relevant Sub-Fund's Statement of Financial Position. The Company has not re-pledged either stock or cash collateral for any other use.

At 31 December 2025, the Company's derivative assets and liabilities are as follows:

GSSB Fund Counterparty	Value of derivative assets US$	Financial Instruments not offset US$	Cash Collateral Received US$	Non-cash Collateral Received US$	Net US$

The counterparties to the swap contracts had a Standard and Poor's credit rating as at 31 December 2025 as follows: Bank of America: A+ (31 December 2024: A+), Citibank: A+ (31 December 2024: A+), Goldman Sachs: A+ (31 December 2024: A+), JP Morgan: AA- (31 December 2024: AA-) and Morgan Stanley: A+ (31 December 2024: A+).

The broker for the open futures contracts is Morgan Stanley which is rated A+ by Standard and Poor's (31 December 2024: A+).

Liquidity risk
Liquidity risk is defined as the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

The Sub-Funds are exposed to daily cash redemptions of shares; however, the Board is entitled, with the approval of the Depositary, to limit the number of shares of any tranche realised on any dealing day to 10% of the total number of shares of that tranche in issue. There are also a number of circumstances where the Board may, with the approval of the Depositary, temporarily suspend the right of shareholders to require the realisation of shares of any tranche and/or may delay the payment of any monies in respect of any such realisation.

The Sub-Funds invest the majority of their assets in securities and other instruments that are traded on an active market and which are considered to be liquid, as they can be readily disposed of in the event that cash needs to be raised to meet redemptions or to pay expenses.

In accordance with the Sub-Funds' policies, the Investment Managers monitor the Sub-Funds' liquidity on a daily basis and reports regularly to the Board, which reviews the information provided by the Investment Managers on significant exposures at its periodic meetings. The Sub-Funds have agreed to a temporary overdraft facility (if required) with the Depositary to allow for temporary timing/matching differences on trades and subscriptions and redemptions.

In addition, there is a risk associated with the ability of the Sub-Funds to redeem out of the underlying investments in order to meet those redemptions. The investment fund positions held at 31 December 2025 are not exposed to any gates, redemption terms and or any lockup conditions (31 December 2024: same).

As at 31 December 2025 and 31 December 2024, the Sub-Funds' liabilities as disclosed on the Statement of Financial Position were all due within one to three months, with the exception of forward foreign currency exchange contracts and options contracts, which are due within one year and swap contracts, which are due within one year and more than one year period.

The Sub-Funds avoid entering into derivative contractual arrangements that produce an exposure not covered by sufficient liquid assets or a total investment exposure in excess of total shareholders' funds.

The tables below set out the Sub-Funds' gross-settled derivative financial instruments and net assets attributable to holders of redeemable participating shares at 31 December 2025.

Global Exposure

Risk monitoring of Global Exposure is detailed in Note 12 of these financial statements.

11. Financial risk management (continued)

Fair value hierarchy

In accordance with IFRS 13 the Company classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The fair value hierarchy has the following levels:

- Level 1 - Quoted market price in an active market for an identical instrument.
- Level 2 - Valuation techniques based on observable inputs. This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3 - Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs could have a significant impact on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Valuation Framework

The Company has an established control framework with respect to measurement of fair values. This framework includes a Valuations Committee which is independent of front office management. Specific controls include:

- Review and approval of valuation methodologies;
- Review and approval process for changes to pricing models;
- Review of unobservable inputs and valuation adjustments;
- Review of independent third party pricing sources; and
- Review of prices where no third party pricing source is available.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market. The majority of holdings as at 31 December 2025 was based on broker quotes received from Markit Group Limited (broker quotes are estimates; actual values could differ significantly). The remainder was priced from market makers and other pricing providers providing quotes directly to the Investment Managers or the Administrator and were classified as Level 2. Where only single broker quotes are obtained for particular holdings, these holdings are classified as either Level 2 or Level 3 depending on trading and inputs into the price. The Investment Managers independently review the prices received as single broker quotes and ensure that they are in line with expectations.

If a quoted market price is not available on a recognised stock exchange or from a broker/dealer for non-exchange traded financial instruments, the fair value of the instrument is estimated using valuation techniques, including use of recent arm's length market transactions, (i.e. an exit price) reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions. Where other pricing models are used, inputs are based on market data at the Statement of Financial Position date.

Fair value for unquoted equity investments is estimated, if possible, using applicable price/earnings ratios for similar listed companies adjusted to reflect the specific circumstances of the issuer if a quoted price is not available from a recognised market, or is unrepresentative in the opinion of the Directors or their delegate, such a security shall be valued, by estimating with care and in good faith the probable realisable value of the investment, by the Directors or their delegate or a competent person, which may be one of the Investment Managers (appointed by the Directors and each approved for the purpose by the Depositary) or valued at the probable realisation value estimated with care and in good faith by any other means provided that the value is approved by the Depositary.

The Company's Level 3 investments have been valued using unadjusted inputs that have not been internally developed by the Company which involved using single broker quotations for these securities.

The Company determines the fair value for corporate bond instruments using independent, unadjusted indicative broker quotes. A broker quote is generally not a binding offer. The categorisation of corporate bond instruments is dependent if the broker quotes reflect actual current market conditions, or if they are indicative prices based on brokers valuation models, depending on the significance and observability of the inputs to the model.

For corporate bond instruments that have been categorised as Level 2, fair value has been determined using independent broker quotes based on observable inputs. If it could not be verified that the valuation is based significantly on observable inputs, then the investments would fall into Level 3.

The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

DEMHYB Fund	Corporate Bonds	US$5,999,186	Broker Quotes	0.00-131.45	131.28

Sensitivity of Level 3 assets measured at fair value to changes in assumptions
The results of using reasonably possible alternative assumptions for valuing the Level 3 assets may result in the fair value estimate and recoverability of the assets being subject to uncertainty and a range of possible outcomes are likely. Such differences, if any, may have a material effect on the overall portfolio as at 31 December 2025 or as at 31 December 2024.

If the value of Level 3 securities increased/(decreased)* by 5%, the effect on the Company's NAV would be US$7,558,186 (31 December 2024: US$8,558,835).

*The amounts reflected are inclusive of all Funds in the Company, not just those marketed in Switzerland.

Transfers between levels of the fair value hierarchy are deemed to have occurred at the end of the financial year and are deemed to have occurred when the pricing source or methodology used to price an investment has changed which triggers a change in level as defined under IFRS 13. There were transfers from Level 2 to Level 3 at the financial year end as shown in the reconciliation above.

11. Financial risk management (continued)

Fair value hierarchy (continued)

Sensitivity of Level 3 assets measured at fair value to changes in assumptions (continued)

For each class of assets and liabilities not measured at fair value in the Statement of Financial Position but for which fair value is disclosed, IFRS 13 requires the Company to disclose the level within the fair value hierarchy which the fair value measurement would be categorised and a description of the valuation technique and inputs used in the technique.

Cash and cash equivalents include deposits held with banks and other short-term investments in an active market and they are categorised as Level 1. Cash held at broker (including positive cash collateral) and cash due to broker (including negative cash collateral) are categorised as Level 2.

Receivable for securities sold and other receivables include the contractual amounts for settlement of trades and other obligations due to the Company. Payable for securities purchased and other payables represent the contractual amounts and obligations due by the Company for settlement of trades and expenses. All receivable and payable balances are categorised as Level 2.

The puttable value of redeemable participating shares is calculated based on the net difference between total assets and all other liabilities of each Sub-Fund within the Company in accordance with the Company's offering memorandum. A demand feature is attached to these shares, as they are redeemable at the holders' option and can be put back to the Sub-Funds at any dealing date for cash equal to a proportionate share of the Sub-Fund's NAV attributable to the share tranche. The fair value is based on the amount payable on demand. As such, Level 2 is deemed to be the most appropriate categorisation for net assets attributable to holders of redeemable participating shares, as they are largely based on inputs other than quoted market prices included within Level 1 that are observable either directly or indirectly.

ESG Integration

The Investment Managers integrate ESG ("Environmental Social & Governance") information into the investment process across all asset classes. Through fundamental analysis, the Investment Managers seek to gain a comprehensive understanding of the factors that influence the sustainability of investments. The Investment Manager consider ESG information alongside other crucial variables that may impact an investment's risks and returns over time. In particular, the Investment Managers consider ESG criteria in relation to specific industry and sector trends and characteristics to identify the risks of an investment. Once invested, the Investment Managers continue to monitor each investment to ensure their thesis, including that on ESG matters, remains intact and that an investment's risk and return profile remains attractive relative to other opportunities available in the market. Sustainability risks that the Investment Managers may consider are environmental, social or governance events or conditions that, if they occur, could cause an actual or a potential material negative impact on the value of the investment, examples of which include physical environmental risks, transition risk (e.g. investee company assets losing their financial value because of tightening of environmental legislation) or liability risk (e.g. risk of liability due to a breach of human/employee rights considering the jurisdiction of the investee company).

All Sub-Funds integrate ESG into their investment process but the following Sub-Funds will also promote ESG by investing or seeking to positively influence practices to improve ESG characteristics and have been brought into scope of Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR") and can be categorised as "Light Green" ESG products:

- Barings Global Senior Secured Bond Fund
- Barings European High Yield Bond Fund
- Barings Global High Yield Bond Fund
- Barings Emerging Markets Local Debt Fund
- Barings Emerging Markets Corporate Bond Fund
- Barings Emerging Markets Debt Short Duration Fund
- Barings Income Navigator Fund
- Barings Emerging Markets Debt Blended Total Return Fund
- Barings Emerging Markets Sovereign Debt Fund
- Barings U.S. High Yield Bond Fund
- Barings Developed and Emerging Markets High Yield Bond Fund

Please refer to the Prospectus for further details on ESG integration. Third-party data and research form one input to the Investment Managers ESG integration and stewardship work. While third-party data providers, peer research, or direct interactions with companies and stakeholders may be used to inform the Investment Managers ESG scoring and analysis, greater importance is placed on the Investment Mangers own fundamental, qualitative, and quantitative analysis and research.

11. Financial risk management (continued)

ESG Integration (continued)

The Investment Manager's dedicated data governance team performs quality checks on internal and third-party ESG data. The team runs data quality checks on monthly reported portfolio-level data, where outliers are flagged based on month-over-month changes and further research is done at the holdings level to determine the cause of change. The team also runs monthly data quality checks on internal data. The Investment Managers portfolio solutions and analytics team also supports data governance efforts by providing several quality checks to validate the completeness of the proprietary ESG scores. These checks may include checking ESG score values, monitoring changes in updated scores, and whether scores have been updated in a timely fashion.

The investments underlying the other Sub-Funds do not take into account the EU criteria for environmentally sustainable economic activities.

12. Efficient Portfolio Management

Each of the Sub-Funds may use Financial Derivative Instruments ("FDIs") for efficient portfolio management. The efficient portfolio management purposes for which the Company intends to employ FDIs are reduction of risk, reduction of cost and the generation of additional capital or income for the relevant Sub-Fund with an appropriate level of risk, taking into account the risk profile of the Sub-Fund and the general provisions of the UCITS Regulations. The Company may use various types of derivatives for these purposes, including, without limitation, forwards, futures, options, swaps (including but not limited to total return swaps, credit default swaps, swaptions and interest rate swaps) and contracts for differences for these purposes.

The foreign currency risk that exists to investors in the non-base currency share tranches is mitigated by a share tranche hedging programme.

During the financial year the Company entered into forward foreign currency exchange contracts, futures contracts, interest rate swaps, credit default swaps and cross currency swaps for efficient portfolio management purposes. Forward foreign currency exchange contracts are entered into by GSSB Fund, GHYB Fund, EMCB Fund, EMLD Fund, EMDSD Fund, IN Fund, EMDBTR Fund, EMSD Fund, USHYB Fund and DEMHYB Fund to hedge non-US$ denominated assets back to US$, the Sub-Funds' base currency. Forward foreign currency exchange contracts are entered into by EHYB Fund to hedge non-€ denominated assets back into €, the Sub-Fund's base currency. EMDBTR Fund uses forward foreign currency exchange contracts to take active foreign exchange exposure. Futures contracts are entered into by EMCB Fund, IN Fund and EMSD Fund. Details of the gains/(losses) relating to these derivative instruments are contained in the Statement of Comprehensive Income.

The Company shall comply with the conditions and limits laid down from time to time by the CBI under the UCITS Regulations.

Forward foreign currency exchange contracts are recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at their fair value. All forward foreign currency exchange contracts are carried as assets when fair value is positive and as liabilities when fair value is negative. Any changes in fair value are recognised in the Statement of Comprehensive Income.

The fair value of forward foreign currency exchange contracts that are not exchange traded is estimated at the amount that the Sub-Fund would receive or pay to terminate the contract at the period/year end date taking into account current market conditions and the current creditworthiness of the counterparties.

The unrealised gain or loss on open forward foreign currency exchange contracts is calculated as the difference between the contract price and the forward price as at financial year end.

Futures contracts are commitments either to purchase or sell a designated financial instrument, currency, commodity or an index at a specified future date for a specified price and may be settled in cash or another financial asset. Futures are standardised exchange traded contracts. Initial margin requirements for futures are met in cash or other instruments, and changes in the futures contract values are settled daily. Futures are measured initially at fair value on the date on which the derivative contract is entered into and subsequently remeasured at fair value. Futures contracts have little credit risk because the counterparties are futures exchanges. Any changes in fair value are recognised in the Statement of Comprehensive Income.

IRSs are used for trading purposes. IRSs are measured initially at fair value on the date on which the derivative contract is entered into and subsequently remeasured at fair value. Fair values are obtained from counterparties or from quoted market prices in active markets, including recent market transactions, and from valuation techniques using discounted cash flow models and option pricing models as appropriate. IRSs are included in assets when the fair value is positive, and in liabilities when the fair value is negative.

12. Efficient Portfolio Management (continued)

In a CDS, one party makes payments to another party in exchange for the right to receive a specified return (or to put a security) if a credit event (e.g. default or a similar event) occurs with respect to a reference entity or entities. The Company may use credit default swaps contracts to provide a measure of protection against defaults of sovereign or corporate issues (i.e. to reduce risk where the Sub-Fund owns or has exposure to the issuer) or to take an active long or short position with respect to the likelihood of a particular issuer's default. The maximum exposure the Company has in selling credit protection is equal to the notional amount of such CDS contracts. CDS's are measured initially at fair value on the date on which the derivative contract is entered into and subsequently remeasured at fair value.

For CDSs on asset-backed securities, a credit event may be triggered by various occurrences, which may include an issuer's failure to pay principal, maturity extension, rating downgrade or write-down. For CDS contracts on corporate or sovereign issuers, a credit event may be triggered by occurrences such as an issuer bankruptcy, failure to pay interest or principal, repudiation/moratorium and/or restructuring. Any changes in fair value are recognised in the Statement of Comprehensive Income.

A currency swap is an interest rate swap in which the cash flows are in different currencies. Upon initiation of a currency swap, the counterparties make an initial exchange of notional principals in the two currencies. During the life of the swap, each party pays interest (in the currency of the principal received) to the other. At the maturity of the swap, the parties make a final exchange of the initial principal amounts, reversing the initial exchange at the same spot rate.

Options are derivative financial instruments that give the buyer, in exchange for a premium payment, the right but not the obligation to either purchase from (call option) or sell to (put option) the writer a specified underlying instrument at a specified price on or before a specified date. Daily fluctuations in the value of the option contract are recorded for financial reporting purposes as unrealised gains or losses by the Sub-Funds and are recorded as a realised gain or loss when the position is closed.

The best evidence of fair value of a derivative at initial recognition is the transaction price. Subsequent changes in the fair value of any derivative instrument are recognised immediately in the Statement of Comprehensive Income.

Risk Monitoring of Global Exposure

GSSB Fund, EHYB Fund, GHYB Fund, USHYB Fund and DEMHYB Fund (together the "Commitment Approach Funds") have been classified as non-sophisticated users of FDI and, as permitted by the CBI UCITS Regulations, the Company has adopted a commitment approach ("the Commitment Approach") in the calculation of global exposure for these Sub-Funds during the financial year.

In accordance with the CBI UCITS Regulations, the Commitment Approach has been calculated, in the case of forward foreign currency exchange contracts ("FCCs"), by converting the FCC position into an equivalent position based on the market value of the underlying asset. As the FDI are used for hedging purposes in the Commitment Approach Funds, the exposure of the FDI has been calculated and then netted against the instrument being hedged. The Global Exposure calculation is performed on a daily basis.

EMCB Fund, EMLD Fund, EMDSD Fund, IN Fund, EMDBTR Fund and EMSD Fund have the ability to use FDI more extensively and as such, have been designated as "VaR Approach Funds" as the value at risk ("VaR") approach is being utilised to calculate their Global Exposure. The Investment Managers have appointed State Street UCITS Risk Management Service to perform these calculations. All output is reviewed in detail by the Investment Manager's Risk team.

Due to the risk profile and investment strategies of the Sub-Funds, certain VaR Approach Funds used a Relative VaR approach as a risk measure. These are:

- EMLD Fund
- EMSD Fund

Relative VaR is defined as the VaR of the UCITS divided by the VaR of the performance comparator. The Relative VaR on the UCITS portfolio (for applicable Relative VaR Approach Funds) shall not exceed twice the VaR on the comparable performance comparator portfolio. The following parameters are used when determining VaR of the UCITS and their performance comparator:

- A one-tailed confidence level of 99%;
- A holding period equivalent to 20 business days (1 month);
- A historical observation period of at least 250 business days (1 year), unless a shorter observation period is justified by a significant increase in price volatility;
- Daily data set updates of the VaR model.

The other VaR Approach Funds used an Absolute VaR approach, being:

- EMCB Fund
- EMDSD Fund
- IN Fund
- EMDBTR Fund

12. Efficient Portfolio Management (continued)

Risk Monitoring of Global Exposure (continued)
The Absolute VaR shall not exceed 20% of the NAV's of the applicable Absolute VaR Approach Fund. The same above parameters are used when determining VaR of the UCITS.

Both Relative VaR and Absolute VaR is being calculated on a daily basis. Further, comprehensive stress testing is performed using a scenario-based analysis in accordance with the qualitative and quantitative requirements of the CBI. Back testing is performed to assess the accuracy and quality of the VaR model. Any daily loss exceeding the 99th percentile VaR in the trailing 250 days constitutes a VAR overshoot.

The lowest, the highest and the average VaR calculated during the financial year, and the level of leverage employed during the financial year, for the relevant Sub-Funds was:

31 December 2025

Fund	Absolute/ Relative VaR	Performance comparator	Minimum VaR	Maximum VaR	Average VaR	Leverage	VaR 31 December 2025*
EMCB Fund	Absolute	JPM CEMBI Broad Diversified Index	1.91%	3.07%	2.52%	18.00%	2.10%
EMLD Fund	Relative	JPM GBI-EM Global Diversified Index	137.45%	176.09%	155.82%	81.00%	171.50%

14. Interests in unconsolidated structured entities

The Company meets the definition of an Investment Entity under IFRS 10 and therefore does not consolidate any investments. IFRS 12 requires disclosures around “Unconsolidated Structured Entities”.

14. Interests in unconsolidated structured entities (continued)

IFRS 12 defines a structured entity as an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to the administrative tasks only and the relevant activities are directed by means of contractual agreements. Disclosures are required where an interest is held in a structured entity and where, for example, the investor has been involved in the setting up of the structured entity and the investor would have exposure to potential losses or costs over and above the amount actually invested.

Where it is within their investment objectives, at 31 December 2025 and 31 December 2024 the Sub-Funds held various investments in ABS, mortgage backed securities ("MBS") and investment funds. The nominal value and fair value of each of these investments is listed in each applicable Sub-Fund's Schedule of Investments. The fair value of these investments is recorded in the "Investments at fair value" line in the Statement of Financial Position. The carrying value of these investments is equivalent to fair value, and the Sub-Fund's maximum exposure to loss from these investments is equal to their total fair value. Once a Sub-Fund has disposed of its holding in any of these investments, the Sub-Fund ceases to be exposed to any risk from that investment. The Sub-Funds have not provided, and would not be required to provide any financial support to these investees.

The Sub-Funds have concluded that ABS, MBS and open-ended investment funds in which they invest, but that they do not consolidate, meet the definition of structured entities because:

- the voting rights in these entities are not the dominant rights in deciding who controls them, as they relate to administrative tasks only;
- each entity's activities are restricted by its Prospectus; and
- the entities have narrow and well-defined objectives to provide investment opportunities to investors.

These investments are detailed in the following table as they have been established by the Sub-Funds' Investment Managers. The maximum exposure to loss is the carrying amount of the financial assets held.

The table below sets out the interests held by the Sub-Funds in unconsolidated structured entities at 31 December 2025:

	Currency of Sub-Fund	No. of Investments	Total Net Assets of the underlying Structured Entity*	Carrying amount included in Financial assets at fair value through profit or loss	% of Total Net Assets of the underlying Structured Entity*	% of Total Net Assets
Investment in open-ended investment funds

DKK	7.4692	7.4573
GBP	0.8718	0.8274
USD	1.1752	1.0358

Income and expenses were converted at an average rate for the financial year ended 31 December 2025 and for the financial year ended 31 December 2024:

US$	Average exchange rates for the year 1 January 2025 to 31 December 2025	Average exchange rates for the year 1 January 2024 to 31 December 2024
Euro (€)	0.8857	0.9272

Euro (€)	Average exchange rates for the year 1 January 2025 to 31 December 2025	Average exchange rates for the year 1 January 2024 to 31 December 2024
US$	1.1313	1.0789

16. Soft commissions and Directed brokerage

There were no soft commission arrangements entered into by the Investment Managers, on behalf of the Company, during the financial year ended 31 December 2025 (31 December 2024: Nil).

There were no directed brokerage fees paid or received by the Sub-Funds during the financial year ended 31 December 2025 (31 December 2024: Nil).

17. Cross liability

While the provisions of the Companies Act, 2014 provide for segregated liability between Sub-Funds, these provisions have yet to be tested in foreign courts, in particular in satisfying local creditors' claims. Accordingly, it is not free from doubt that the assets of each Sub-Fund and tranche may not be exposed to the liabilities of the other Sub-Funds and tranches within the Company. At 31 December 2025, the Directors are not aware of any such existing or contingent liability.

18. Contingent liabilities

There are no contingent liabilities at 31 December 2025 (31 December 2024: Nil).

19. Taxation

Under current Irish law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997 as amended. On that basis, it is not chargeable to Irish tax on its income and gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight-year period beginning with the acquisition of such shares. No Irish tax will arise on the Company in respect of chargeable events in respect of:

(i) a shareholder who is not an Irish resident and not ordinarily resident in Ireland for tax purposes at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997 as amended, are held by the Company or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and

(ii) certain exempted Irish tax resident investors who have provided the Company with the necessary signed statutory declarations.

Dividend income, interest and capital gains (if any) received on investments made by the Company may be subject to withholding and capital gains taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

Pillar Two rules are effective from 1 January 2024 in Ireland, where the Company is domiciled. Pillar Two is an Organization for Economic Co-operation and Development ("OECD") initiative which implements a global minimum effective tax rate of 15% for an entity. It is considered that the Company meets the definition of an Investment Fund under the Irish enactment of the Pillar Two rules. Investment funds are outside the scope of Irish domestic top up tax and the Company would also not itself be subject to any other liability for top up taxes under Pillar 2.

20. Total Expense Ratio and Performance Data

Total Expense Ratio

The Total Expense Ratio ("TER") table shows the actual expenses incurred by the Sub-Funds, expressed as an annualised percentage of the average ("avg.") NAV of the Sub-Fund for the corresponding year.

20. Total Expense Ratio and Performance Data (continued)

Performance Data (continued)
Historical performance is no indicator of current or future performance. The performance data does not take account of any commissions and costs charged when subscribing and redeeming shares.

21. Material changes to the Prospectus

The Prospectus of the Company was updated with effect from 5 February 2025.

The following material changes were made to the Prospectus:

- Additional tranches for Barings Global Senior Secured Bond Fund, Barings Global High Yield Bond Fund and Barings Emerging Markets Sovereign Debt Fund, as well as flexibility to pay distributions from capital Tranche I, AI, N and IA Shares were incorporated.
- Repurpose and name change of Barings Active Short Duration Fund as the Barings Income Navigator Fund was incorporated.
- Updates to SFDR classification upgrades from Article 6 to Article 8 for Barings Emerging Markets Debt Blended Total Return Fund and Barings Developed and Emerging Markets High Yield Bond Fund. Relevant investment policy disclosures have been updated.
- Cap on securities rated below B- reduced from 20% to 3% of NAV for Barings Emerging Markets Corporate Bond Fund.
- Incorporation of existing First, Second and Third Addenda.

First Addendum to the Prospectus was issued on 29 May 2025 and included the following updates:

- Details in 'Available Share Tranches' tables within the Supplements for Barings Global Senior Secured Bond Fund, Barings Global High Yield Bond Fund and Barings Income Navigator Fund have been updated. Additional tranche BM was incorporated for these Sub-Funds. The purpose of these updates is to provide for new monthly and quarterly distributing Gross Income Distribution Tranche Shares and Tranche BM Shares.

Second Addendum to the Prospectus was issued on 17 December 2025 and included the following updates:

- A benchmark has been introduced for the Barings Emerging Markets Debt Blended Total Return Fund: the JP Morgan Emerging Markets Blended Index (JEMB Equal Weighted).
- Update of investment objective for Barings Emerging Markets Debt Blended Total Return Fund.
- The minimum subscription and holding amounts for the Tranche A Share Class have been reduced for Barings Emerging Markets Debt Blended Total Return Fund.

There were other immaterial changes to the Prospectus that are not listed above.

22. Significant events during the financial year

The Prospectus of the Company was updated on 5 February 2025 and there were two addenda issued on 29 May 2025 and 17 December 2025. The material changes to the Prospectus are outlined in Note 21 of these financial statements.

The following Sub-Funds closed share tranches during the financial year:

	Termination date
GSSB Fund	
Tranche E AUD Distribution	7 April 2025
GHYB Fund

EMLD Fund	
Tranche B GBP Accumulation	24 September 2025

There were no other significant events affecting the Company during the financial year, which require adjustment to, or disclosure in the financial statements.

23. Subsequent events

The Investment Manager is closely monitoring global market developments and geopolitical events such as the Russian invasion of Ukraine, ongoing Iran-US conflict, and heightened geopolitical uncertainty. While these events have contributed to heightened uncertainty across financial markets, as at 13 April 2026, the Company has not experienced any material impact on performance or investor redemptions. The Investment Manager remains vigilant and continues to assess potential implications for portfolio positioning and risk management.

The following distributions were declared by the Sub-Funds subsequent to year end:

GSSB Fund	Value US$	Per Share US$
Tranche A GBP Distribution	155,231	1.95

24. Russia/Ukraine conflict

The ongoing conflict between Russia and Ukraine has led to significant disruption and volatility in the global stock market. As a result of this, the fair value of Russian securities held within the Sub-Funds have experienced a sharp decline since early 2022. As a consequence of this, management made the determination to value all Russian sovereign local bonds, sovereign hard currency debt (USD / EUR) and corporate bonds on a bid basis and Ukrainian sovereign local bonds on either a bid basis or straight vendor marks. This was based on the current restrictions on trading due to sanctions and market liquidity. Exposure details at 31 December 2025 and 31 December 2024 are outlined in the table below. The ongoing ramifications of the conflict may not be limited to Russia and Russian companies or Ukraine but may spill over to other regional and global economic markets, and the extent of the resulting impact remains uncertain. Barings continues to monitor the situation in Ukraine and consider appropriate measures for the affected Sub-Funds.

Fund	% of Net Assets 31 December 2025 Russia	% of Net Assets 31 December 2025 Ukraine	% of Net Assets 31 December 2024 Russia	% of Net Assets 31 December 2024 Ukraine
EMCB	0.21%	-	0.37%	-
EMLD	-	-	-	0.21%
EMDSD	0.22%	-	0.23%	-
EMDBTR	0.61%	-	0.30%	-
EMSD	0.03%	1.06%	0.03%	1.31%

25. Charges

The Principal Brokers hold a number of charges granting first priority security interest in relation to collateral and principal broker securities relating to the Sub-Funds account.

26. Comparatives

Comparative information is as at 31 December 2024 for the Statement of Financial Position and for the financial year ended 31 December 2024 for the Statement of Comprehensive Income, the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and the Statement of Cash Flows.

27. Approval of the financial statements

The Board approved these financial statements on 13 April 2026.

Barings Umbrella Fund Plc

Appendix 2 - Additional Information for Investors in the Federal Republic of Germany (Unaudited)

This additional information (the "Country Supplement") forms part of, and should be read in conjunction with, the prospectus for Barings Umbrella Fund plc (the "Company") dated 5 February 2025 (the "Prospectus"). All capitalised terms used herein shall have the same meaning in this Country Supplement as in the Prospectus unless otherwise indicated.

Facilities in accordance with Art. 92 Paragraph 1 of Directive 2009/65/EC in the version of Directive (EU) 2019/1160:

Société Générale Luxembourg, 11, avenue Emile Reuter, L 2420 Luxembourg
Operational Center: 28/32 Place de la Gare, L 1616 Luxembourg
Email: list.lux-global-distribution-hub@socgen.com

- Applications for subscriptions, redemptions and conversions can be submitted to this facility.
- All payments intended for a Shareholder, including the redemption proceeds and any distributions, can be routed through this facility at his request.
- The Prospectus, the Key Information Documents (the "KIDs"), the Memorandum and Articles of Association of the Company, the latest published annual report and any subsequent semiannual report, as well as other information and documents are available free of charge from this facility.
- The net asset value per share, the issue, redemption and conversion prices are available free of charge from this facility.

The issue, redemption and exchange prices and any other information and documents which are required to be published in Ireland will be notified to Euronext Dublin immediately upon calculation and shall be available on the website www.euronext.com/en/markets/dublin. Furthermore, documents available for investors in Ireland solely for inspection at an office specified in the "General" section in the Prospectus (registered office of the Manager of the Company), will be made available for the investors in the Federal Republic of Germany solely for inspection, free of charge, at the office of the above facility.

Investors should also refer to the "Fees and Expenses" section in the Prospectus.

In addition, in the following cases, information will be provided to investors in Germany through investors' letters by the Manager:

- suspension of the redemption of Shares;
- termination of the management of the Company or its winding-up;
- amendments to the Memorandum and Articles of Association of the Company, which are inconsistent with existing investment principles, affect material investor rights, or relate to remuneration or the reimbursement of expenses, that may be taken out of the assets of the Company, including the reasons for the amendments and the rights of investors;
- the merger of a Sub-Fund with one or more other funds;
- the conversion of a Sub-Fund into a feeder fund or any change to a master fund.

Tax regulations and the practices of financial authorities are constantly subject to change. Because of the complexity of German tax law, it is recommended that investors contact a tax adviser regarding the effect on their individual tax situation before they decide about an investment in the Company.

The Barings Global Senior Secured Bond Fund, Barings European High Yield Bond Fund, Barings Global High Yield Bond Fund, Barings Income Navigator Fund, Barings Emerging Markets Sovereign Debt Fund and Barings Developed and Emerging Markets High Yield Bond Fund have been registered for sale in Hong Kong. The other Sub-Funds within this report are not authorised in Hong Kong and are not available to Hong Kong residents.

Transactions with Connected Persons for the Sub-Funds distributed in Hong Kong

Connected Persons of the Manager, the Investment Managers, the Depositary and the Directors of the Company are those as defined in the SFC Code. All transactions entered into during the financial year between the authorised Sub-Funds and the Manager, the Investment Managers, the Depositary and the Directors of the Company and their respective Connected Persons were carried out in the normal course of business and on normal commercial terms.

Security investments and currency transactions through a broker who is a Connected Person of the Manager, the Investment Advisors, the Depositary and the Directors of the Company were as follows for the financial year ended 31 December 2025:

Sub-Fund	Total Purchases & Sales through a broker who is a Connected Person US$ ('000)	% of Total Purchases & Sales	Commissions US$ ('000)	Average Rate of Commissions in %
GSSB Fund	16,341,868	53.11	-	-
GHYB Fund	22,284,917	53.26	-	-
IN Fund	357	0.30	-	-
EMSD Fund	252,467	7.11	-	-
DEMHYB Fund	1,901,304	79.47	-	-

There was no commission charged on the transactions in the above table for the financial year ended 31 December 2025.

The Directors of the Company held no shares in any of the SFC-authorised Sub-Funds for the financial year ended 31 December 2025. Details of fees paid to the Directors of the Company for the financial year ended 31 December 2025 are disclosed in Note 5 of these financial statements.

Details of the value of the outstanding shares owned by Connected Persons of the Manager and the Investment Managers over 20% of the Net Assets of the SFC-authorised Sub-Funds as at 31 December 2025 are disclosed in Note 6 of these financial statements. Details of fees paid to the Manager and the Investment Managers are disclosed in Note 5 of these financial statements.

Directors and Officers of the Depositary did not hold shares in any of the SFC-authorised Sub-Funds for the financial year ended 31 December 2025. As disclosed in Note 5 of these financial statements, the fees and expenses of the Depositary are paid by the Sub-Funds.

Remuneration Disclosure

Baring International Fund Managers (Ireland) Limited's ("BIFMI") Remuneration Policy ensures the remuneration arrangements as defined in ESMA's "Guidelines on Sound Remuneration Policy under the UCITS directive and AIFMD" (ESMA 2016/575) (the 'ESMA Guidelines'), (as amended) are:

(i) consistent with and promote sound and effective risk management;

(ii) do not encourage risk-taking which is inconsistent with the risk profile, rules or instruments of incorporation of BIFMI or any Fund which BIFMI is the manager of;

(iii) do not impair BIFMI's compliance with its duty to act in the best interests of the Sub-Funds; and

(iv) are consistent with the business strategy, objectives, values and interests of BIFMI, the Sub-Funds, the investors in such Sub-Funds and includes measures to avoid conflicts of interest.

(v) When providing individual portfolio management services to institutional clients, BIFMI must also ensure that its Remuneration Codes are designed in such a way so as not to create a conflict of interest or incentive that may lead staff to favour their own interests or BIFMI's interests to the potential detriment of any client.

In line with the principles of proportionality, BIFMI complies with the remuneration principles in a way and to the extent appropriate to its size and business.

Remuneration Committee

Due to the size and nature of BIFMI's activities, the Board of Directors considers it is appropriate and proportionate to dis-apply the requirement to appoint a remuneration committee.

Whilst the Board of Directors have concluded it is not required to maintain a remuneration committee, BIFMI is part of the Barings Europe Limited (UK) group of companies ("BEL") and follows the BEL approach to remuneration governance which relies on committees. Remuneration for the BEL group companies is governed by the Human Resources Committee and where appropriate the Remuneration Panel, which is responsible for the setting, implementing and ongoing review of Barings Group remuneration policy and review of employee annual compensation awards. BIFMI ensures that the Barings group policy is consistent with its remuneration policy.

Remuneration Code Staff

BIFMI has determined its Remuneration Code Staff as the following:

1. Senior management

Senior Management comprises the Board of Directors.

2. Control Functions

All CBI Pre Approved Control Functions ("PCFs") are included within the definition of Remuneration Code Staff.

3. Risk Takers

Risk Takers are defined as the investment managers of the UCITS and AIFs. Investment management is delegated to firms subject to an equivalent remuneration regime and therefore BIFMI currently has no risk takers outside of senior management.

4. Employees in the same remuneration bracket as risk takers

BIFMI will not treat a person as Remuneration Code Staff if a person's professional activities do not have a material impact on the risk profiles of the firm or the Sub-Funds.

5. Staff responsible for heading the investment management, administration, marketing and human resources

There are no staff in this category, that are not captured in other categories.

Remuneration Disclosure

The disclosure below details fixed and variable remuneration paid to BIFMI Remuneration Code Staff (for the financial year ended 31 December 2025).

	Number of beneficiaries	Total Remuneration	Total Fixed Remuneration	Total Variable Remuneration***
Total remuneration paid by BIFMI in relation to the Sub-Funds*	9	€366,485	€240,520	€125,965
Total Senior Management Remuneration paid by BIFMI**	5	€842,005	€534,039	€307,967
Risk Takers remuneration	0	€0	€0	€0
Employees in the same remuneration bracket as Risk Takers	0	€0	€0	€0

BIFMI's Remuneration Policy is reviewed annually both in respect of the general principles and implementation. No material changes have been made throughout the year or as a result of the review; no irregularities were identified.

The above disclosures are made in line with Barings' interpretation of currently available regulatory guidance on quantitative remuneration disclosures. As market or regulatory practice develops, Barings may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated. Where such changes are made, this may result in disclosures in relation to a fund not being comparable to the disclosures made in the prior year, or in relation to other Barings fund disclosures in that same year.

Notes:

*The Manager does not make any direct payments to staff, who are paid by other Barings Group entities. Figures shown are apportioned on a fund AUM basis as a proportion of Barings total AUM as at 31 December 2025. Accordingly, the figures are not representative of any individual's actual remuneration.

**Senior management remuneration is apportioned on the basis of the BIFMI's total AUM as a proportion of Barings total AUM.

***Variable remuneration consists of Short Term Incentive awards, Long Term Incentive awards and any other variable payments.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Barings Global Senior Secured Bond Fund **Legal entity identifier:** 549300WGJ63R7O9KXV70

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** ___% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

- **To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub-Fund promotes positive or improving resource intensity, environmental footprint, employee satisfaction and societal impacts of products/services. The Sub-Fund will achieve this by investing at least 50% of its Net Asset Value in issuers which exhibit any of these characteristics.

As at 31 December 2025, the Sub-Fund met its environmental and/or social characteristics as the percentage of its Net Asset Value in issuers which exhibit any of the above characteristics was 67.95%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The sustainability indicator used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund was the percentage of the Sub-Fund's Net Asset Value invested in issuers that exhibit positive or improving resource intensity, environmental footprint, employee satisfaction or societal impacts of its products/services. Issuers are assessed through the Investment Manager's proprietary ESG scoring framework.

As at 31 December 2025, the Sub-Fund's percentage of its Net Asset Value in issuers that exhibit such characteristics was 67.95%, which was 17.95% above the minimum threshold.

- **And compared to previous periods?**

The following table provides information about the performance of the sustainability indicator used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund, as further detailed in the prospectus.

Sustainability Indicator	Metric	2024	2023	2022
Issuers promote positive or improving resource intensity, environmental footprint, employee satisfaction and societal impacts of products/services	% of its Net Asset Value in assets which exhibit positive or improving ESG characteristics	69.04%	73.34%	73.81%*

*The metric used to measure the attainment of the sustainability indicator was redefined in 2023. Therefore, in 2022 the percentage was calculated based on the investments in the portfolio, whereas in subsequent years it is calculated based on Net Asset Value.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

- **How did this financial product consider principal adverse impacts on sustainability factors?**

Barings' ESG integration process is designed to ensure that the Investment Manager assesses the sustainability risk factors that are material to the overall credit risk of an investment. Subject to the availability of data and materiality, the principal adverse sustainability indicators that are deemed mandatory as they relate to 'investments in companies' (as per Annex 1, Table 1 of the Regulatory Technical Standards) along with the principal adverse impact of 'Environmental Indicator 4. Investments in companies without carbon emission reduction initiatives' and 'Social Indicator 14. Number of identified cases of severe human rights issues and incidents' on sustainability factors, were considered as part of the pre-investment due diligence. The significance of indicators varied according to the business activities of the issuer being evaluated. The consideration of the relevant indicators was incorporated into the Investment Manager's investment committee recommendations and ESG scores.

- **What were the top investments of this financial product?***

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2025.

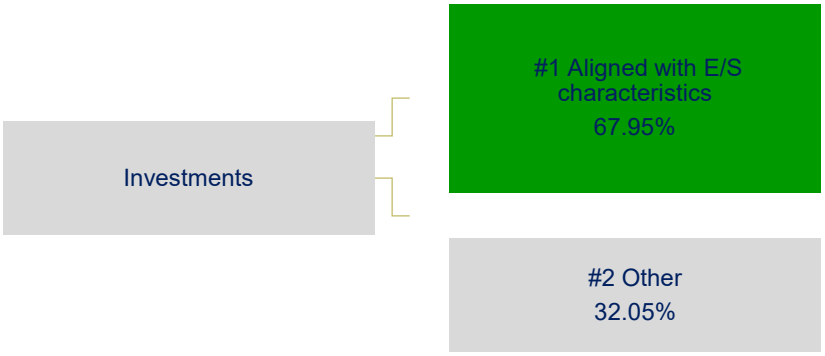
* The listed top investments of the Sub-Fund are as at 31 December 2025. The Sector source is the Merrill Class 3 industry classification.

- **What was the proportion of sustainability-related investments?**
- ***What was the asset allocation?***

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

- ***In which economic sectors were the investments made?***

The following table details the economic sectors that the Sub-Fund was exposed to as at 31 December 2025.

Sector	% of Investments
Healthcare	15.22%
Telecommunications	12.56%
Leisure	9.97%
Technology & Electronics	6.91%
Basic Industry	6.73%
Services	6.02%
Capital Goods	5.53%
Energy	4.93%
Media	4.72%
Financial Services	4.50%
Insurance	3.61%
Consumer goods	3.41%
Transportation	3.09%
Retail	2.85%
Investment Funds	2.78%
Real Estate	2.48%
Utility	2.32%
Automotive	2.00%
Electric	0.37%

The Sector source is the Merrill Class 3 industry classification.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by. the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

- **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Sub-Fund's investments are sustainable investments with an environmental objective that align with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

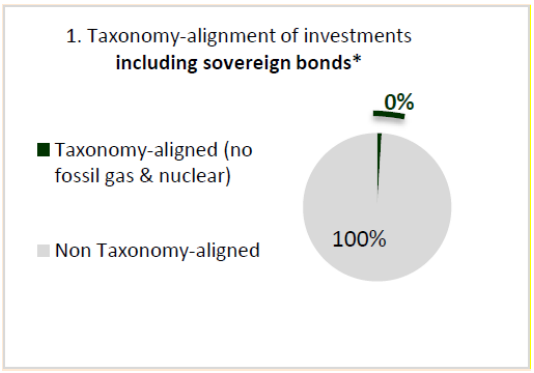
☐ **Yes:**

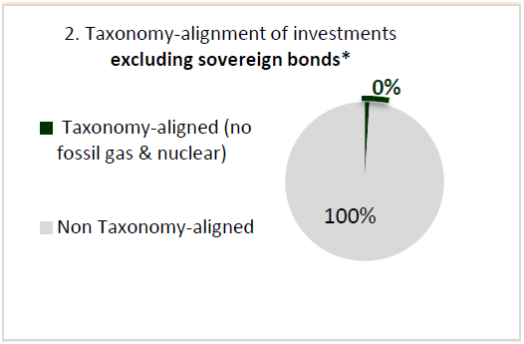
☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The Sub-Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy during the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "Other" comprised of issuers which were approved by the Investment Manager but which either had a weak ESG starting position with potential for improved ESG performance, or which had low ESG scores, but their fundamental credit profile indicated that the investment offers an attractive risk / reward profile for the Sub-Fund.

Additionally, the investments included under "Other" were cash, cash equivalents and derivative instruments which were used for liquidity management and hedging where internal ESG score cannot be determined. These types of holdings were not classified as 'positive or improving' and were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Issuers were selected for the ESG profile according to the Investment Manager's proprietary ESG scoring methodology. When assessing an investment, the Investment Manager utilised their direct access to management, banking group and financial sponsors in addition to information published by issuers. The team also sought to understand market consensus on ESG profile of each issuer, through its access to third party ESG research providers. This information and interaction allowed thorough due diligence to be undertaken on the ESG risk profile of an issuer. For each asset, the Investment Manager examined the scores of the indicators to determine an issuer's ESG credentials and also considered a momentum indicator scoring which captures relevant shocks that may impact the scoring in the future. Scoring indicators included environmental (resource intensity, environmental footprint,) social (societal impacts of products and services, employee satisfaction) and governance (effectiveness of management boards, credibility of auditing arrangements and accountability of management) assessments to screen companies where ESG standards are positive or improving. The Investment Manager undertook ESG scoring of issuers that are owned or being monitored. ESG scores were compiled based on an analyst assessment and reviewed by investment committees within the Investment Manager when applicable. ESG ratings were reassessed as material ESG developments occurred and updated in line with the issuers reporting cycles. A review process ensured ratings are accurately maintained.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Barings European High Yield Bond Fund
Legal entity identifier: 54930004TKTB3JK50H28

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** ___% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

- **To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub-Fund promotes positive or improving resource intensity, environmental footprint, employee satisfaction and societal impacts of products/services. The Sub-Fund will achieve this by investing at least 50% of its Net Asset Value in issuers which exhibit any of these characteristics

As at 31 December 2025, the Sub-Fund met its environmental and/or social characteristics as the percentage of its Net Asset Value in issuers which exhibit any of the above characteristics was 76.92%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The sustainability indicator used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund was the percentage of the Sub-Fund's Net Asset Value invested in issuers that exhibit positive or improving resource intensity, environmental footprint, employee satisfaction or societal impacts of its products/services. Issuers are assessed through the Investment Manager's proprietary ESG scoring framework.

As at 31 December 2025, the Sub-Fund's percentage of its Net Asset Value in issuers that exhibit such characteristics was 76.92%, which was 26.92% above the minimum threshold.

- **And compared to previous periods?**

The following table provides information about the performance of the sustainability indicator used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund, as further detailed in the prospectus.

Sustainability Indicator	Metric	2024	2023	2022
Issuers promote positive or improving resource intensity, environmental footprint, employee satisfaction and societal impacts of products/services	% of its Net Asset Value in assets which exhibit positive or improving ESG characteristics	72.74%	77.46%	74.56%*

*The metric used to measure the attainment of the sustainability indicator was redefined in 2023. Therefore, in 2022 the percentage was calculated based on the investments in the portfolio, whereas in subsequent years it is calculated based on Net Asset Value.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

- **How did this financial product consider principal adverse impacts on sustainability factors?**

Barings' ESG integration process is designed to ensure that the Investment Manager assesses the sustainability risk factors that are material to the overall credit risk of an investment. Subject to the availability of data and materiality, the principal adverse sustainability indicators that are deemed mandatory as they relate to 'investments in companies' (as per Annex 1, Table 1 of the Regulatory Technical Standards) along with the principal adverse impact of 'Environmental Indicator 4. Investments in companies without carbon emission reduction initiatives' and 'Social Indicator 14. Number of identified cases of severe human rights issues and incidents' on sustainability factors, were considered as part of the pre-investment due diligence. The significance of indicators varied according to the business activities of the issuer being evaluated. The consideration of the relevant indicators was incorporated into the Investment Manager's investment committee recommendations and ESG scores.

The Sector source is the Merrill Class 3 industry classification.

- **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Sub-Fund's investments are sustainable investments with an environmental objective that align with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by. the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ **Yes:**

☐ **In fossil gas** ☐ **In nuclear energy**

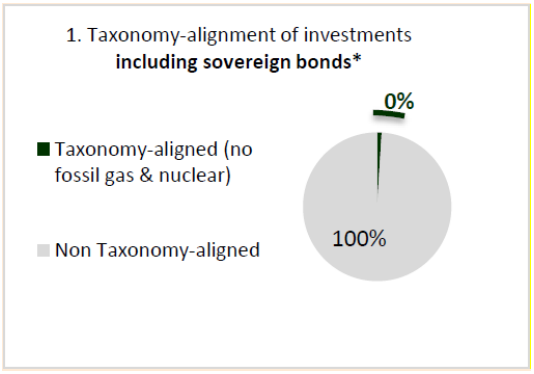
☒ **No**

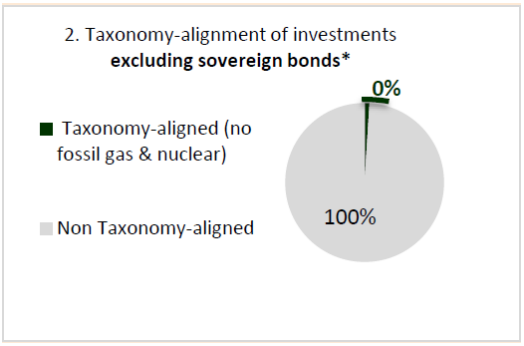
[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- ***What was the share of investments made in transitional and enabling activities?***

The Sub-Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy during the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "Other" comprised of issuers which were approved by the Investment Manager but which either had a weak ESG starting position with potential for improved ESG performance, or which had low ESG scores, but their fundamental credit profile indicated that the investment offers an attractive risk / reward profile for the Sub-Fund. Additionally, the investments included under "Other" were cash, cash equivalents and derivative instruments which were used for liquidity management and hedging where internal ESG score cannot be determined. These types of holdings were not classified as 'positive or improving' and were not subject to any minimum environmental or social safeguards.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Issuers were selected for the ESG profile according to the Investment Manager's proprietary ESG scoring methodology. When assessing an investment, the Investment Manager utilised their direct access to management, banking group and financial sponsors in addition to information published by issuers. The team also sought to understand market consensus on ESG profile of each issuer, through its access to third party ESG research providers. This information and interaction allowed thorough due diligence to be undertaken on the ESG risk profile of an issuer. For each asset, the Investment Manager examined the scores of the indicators to determine an issuer's ESG credentials and also considered a momentum indicator scoring which captures relevant shocks that may impact the scoring in the future. Scoring indicators included environmental (resource intensity, environmental footprint,) social (societal impacts of products and services, employee satisfaction) and governance (effectiveness of management boards, credibility of auditing arrangements and accountability of management) assessments to screen companies where ESG standards are positive or improving. Electric	0.68%

The Sector source is the Merrill Class 3 industry classification.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by. the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

- **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Sub-Fund's investments are sustainable investments with an environmental objective that align with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

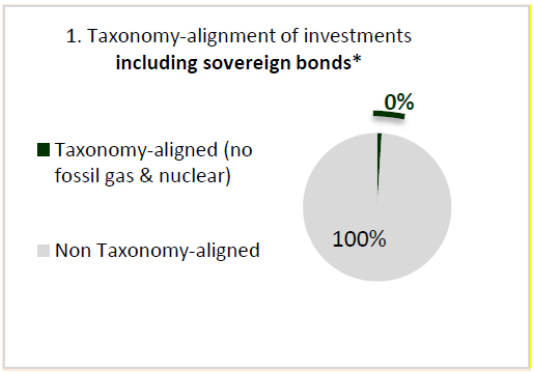
☐ **Yes:**

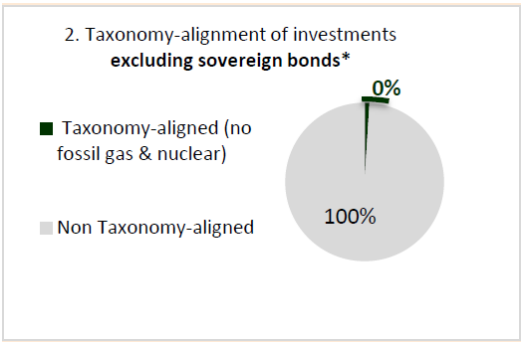
☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments made in transitional and enabling activities?***

The Sub-Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy during the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

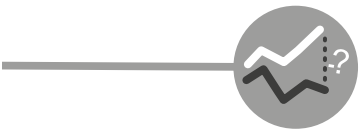
What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "Other" comprised of issuers which were approved by the Investment Manager but which either had a weak ESG starting position with potential for improved ESG performance, or which had low ESG scores, but their fundamental credit profile indicated that the investment offers an attractive risk / reward profile for the Sub-Fund.

Additionally, the investments included under "Other" were cash, cash equivalents and derivative instruments which were used for liquidity management and hedging where internal ESG score cannot be determined. These types of holdings were not classified as 'positive or improving' and were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Issuers were selected for the ESG profile according to the Investment Manager's proprietary ESG scoring methodology. When assessing an investment, the Investment Manager utilised their direct access to management, banking group and financial sponsors in addition to information published by issuers. The team also sought to understand market consensus on ESG profile of each issuer, through its access to third party ESG research providers. This information and interaction allowed thorough due diligence to be undertaken on the ESG risk profile of an issuer. For each asset, the Investment Manager examined the scores of the indicators to determine an issuer's ESG credentials and also considered a momentum indicator scoring which captures relevant shocks that may impact the scoring in the future. Scoring indicators included environmental (resource intensity, environmental footprint,) social (societal impacts of products and services, employee satisfaction) and governance (effectiveness of management boards, credibility of auditing arrangements and accountability of management) assessments to screen companies where ESG standards are positive or improving. The Investment Manager undertook ESG scoring of issuers that are owned or being monitored. ESG scores were compiled based on an analyst assessment and reviewed by investment committees within the Investment Manager when applicable. ESG ratings were reassessed as material ESG developments occurred and updated in line with the issuers reporting cycles. A review process ensured ratings are accurately maintained.



- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Barings Emerging Markets Corporate Bond Fund
Legal entity identifier: 5493006H2BF0K47X4M05

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** ___% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

- **To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub-Fund promotes positive or improving resource intensity, environmental footprint, employee satisfaction and societal impacts of products/services. The Sub-Fund will achieve this by investing at least 50% of its Net Asset Value in issuers which exhibit any of these characteristics

As at 31 December 2025, the Sub-Fund met its environmental and/or social characteristics as the percentage of its Net Asset Value in issuers which exhibit any of the above characteristics was 66.37%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The sustainability indicator used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund was the percentage of the Sub-Fund's Net Asset Value invested in issuers that exhibit positive or improving resource intensity, environmental footprint, employee satisfaction or societal impacts of its products/services. Issuers are assessed through the Investment Manager's proprietary ESG scoring framework.

As at 31 December 2025, the Sub-Fund's percentage of its Net Asset Value in issuers that exhibit such characteristics was 66.37%, which was 16.37% above the minimum threshold.

- **And compared to previous periods?**

The following table provides information about the performance of the sustainability indicator used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund, as further detailed in the prospectus.

Sustainability Indicator	Metric	2024	2023	2022
Issuers promote positive or improving resource intensity, environmental footprint, employee satisfaction and societal impacts of products/services	% of its Net Asset Value in assets which exhibit positive or improving ESG characteristics	70.33%	75.49%	72.20%*

*The metric used to measure the attainment of the sustainability indicator was redefined in 2023. Therefore, in 2022 the percentage was calculated based on the investments in the portfolio, whereas in subsequent years it is calculated based on Net Asset Value.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

- **How did this financial product consider principal adverse impacts on sustainability factors?**

Barings' ESG integration process is designed to ensure that the Investment Manager assesses the sustainability risk factors that are material to the overall credit risk of an investment. Subject to the availability of data and materiality, the principal adverse sustainability indicators that are deemed mandatory as they relate to 'investments in companies' (as per Annex 1, Table 1 of the Regulatory Technical Standards) along with the principal adverse impact of 'Environmental Indicator 4. Investments in companies without carbon emission reduction initiatives' and 'Social Indicator 14. Number of identified cases of severe human rights issues and incidents' on sustainability factors, were considered as part of the pre-investment due diligence. The significance of indicators varied according to the business activities of the issuer being evaluated. The consideration of the relevant indicators was incorporated into the Investment Manager's investment committee recommendations and ESG scores.

- **What were the top investments of this financial product?***

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2025.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** ___% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

- **To what extent were the environmental and/or social characteristics promoted by this financial product met?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Sub-Fund promotes positive or improving rule of law, fiscal transparency, policy effectiveness, sustainable social development, and climate stewardship. The Sub-Fund will achieve this by investing at least 50% of its Net Asset Value in issuers which exhibit positive or improving environmental ("E") and/or social ("S") characteristics as represented by a proprietary aggregated ESG current state and outlook score. The Sub-Fund will invest at least 50% of its Net Asset Value in issuers which exhibit positive or improving environmental and/or social characteristics as represented by a proprietary aggregated ESG current state and outlook score.

The Sub-Fund will also invest at least 75% of its Net Asset Value in countries that exhibit strong or improving human development conditions, as measured by the United Nations Human Development Index ("HDI") and calculated as the average of the five-year period as of two years prior to the investment period.

As at 31 December 2025, the Sub-Fund met its environmental and/or social characteristics as the percentage of its Net Asset Value in issuers which exhibit positive or improving environmental and/or social characteristics as represented by a proprietary aggregated ESG current state and outlook score was 82.12% and the percentage of its Net Asset Value in countries that exhibit strong or improving human development conditions was 84.54%.

- **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund were:

1. The percentage of the Sub-Fund's Net Asset Value invested in issues that exhibit positive or improving ESG characteristics; and

2. The percentage of the Sub-Fund's Net Asset Value in countries that exhibit strong or improving human development conditions, as measured by the United Nations HDI and calculated as an average of the five-year period as of two years prior to the investment period.

As at 31 December 2025, the Sub-Fund's percentage of its Net Asset Value invested in assets that exhibit positive or improving ESG characteristics was 82.12%, which was 32.12% above the minimum threshold.

As at 31 December 2025, the Sub-Fund's percentage of its Net Asset Value in countries that exhibit strong or improving human development conditions was 84.54%, which was 9.54% above the minimum threshold.

- **And compared to previous periods?**

The following table provides information about the performance of the sustainability indicators used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund, as further detailed in the prospectus.

Sustainability Indicator	Metric	2024	2023	2022
Issuers promote positive or improving resource intensity, environmental footprint, employee satisfaction and societal impacts of products/services	% of its Net Asset Value in assets which exhibit positive or improving ESG characteristics	91.72%	90.23%	96.68%*
The Sub-Fund invests in countries that exhibit strong or improving human development conditions	% of its Net Asset Value in countries that exhibit strong or improving human development conditions	86.97%	94.13%	95.31%

*The metric used to measure the attainment of the sustainability indicator was redefined in 2023. Therefore, in 2022 the percentage was calculated based on the investments in the portfolio, whereas in subsequent years it is calculated based on Net Asset Value.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

- **How did this financial product consider principal adverse impacts on sustainability factors?**

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Barings' ESG integration process is designed to ensure that the Investment Manager assesses the sustainability risk factors that are material to the overall credit risk of an investment. Subject to the availability of data and materiality, the principal adverse sustainability indicators that are deemed mandatory as they relate to 'investments in companies' (as per Annex 1, Table 1 of the Regulatory Technical Standards) along with the principal adverse impact of 'Environmental Indicators 5 Share of energy consumption and production from non-renewable sources, 7. Activities negatively affecting biodiversity sensitive areas' and 'Sovereign Indicators 15 and 16'. Number and percent of countries subject to social violations of identified cases of severe human rights issues and incidents on sustainability factors, were considered as part of the pre-investment due diligence. The significance of indicators varied according to the business activities of the issuer being evaluated. The consideration of the relevant indicators was incorporated into the Investment Manager's investment committee recommendations and ESG scores.

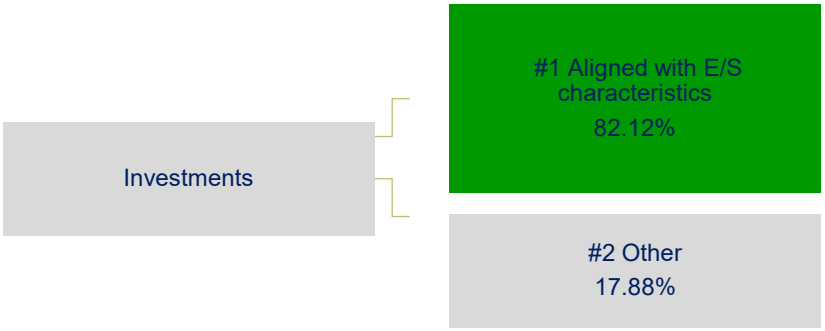
* The listed top investments of the Sub-Fund are as at 31 December 2025. The Sector source is the Merrill Class 3 industry classification.

What was the proportion of sustainability-related investments?

- ***What was the asset allocation?***



Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, have no minimum environmental or social safeguards, nor are qualified as sustainable investments.

- ***In which economic sectors were the investments made?***

The following table details the economic sectors that the Sub-Fund was exposed to as at 31 December 2025.

Sector	% of Investments
Sovereign	86.66%
Supranational	10.19%
Financial Services	3.15%

The Sector source is the Merrill Class 3 industry classification.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by. the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Sub-Fund's investments are sustainable investments with an environmental objective that align with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

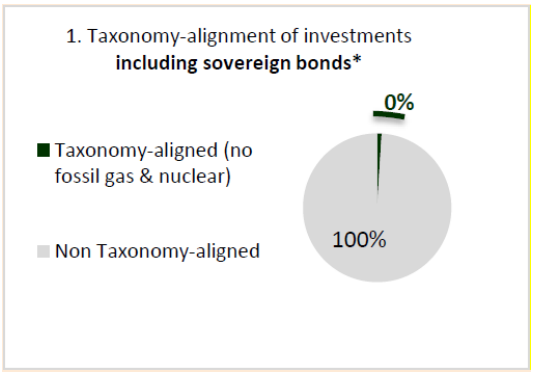
☐ **Yes:**

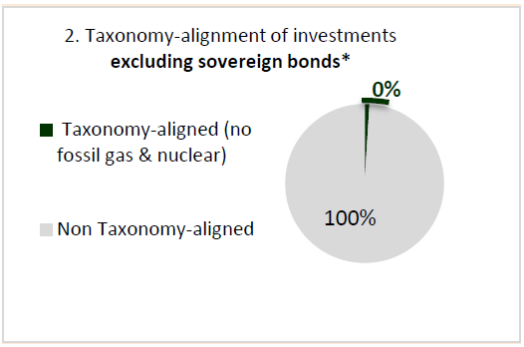
☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- ***What was the share of investments made in transitional and enabling activities?***

The Sub-Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy during the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "Other" comprised of issuers which were approved by the Investment Manager but which either had a weak ESG starting position with potential for improved ESG performance, or which had low ESG scores, but their fundamental credit profile indicated that the investment offers an attractive risk / reward profile for the Sub-Fund.

Additionally, the investments included under "Other" were cash, cash equivalents and derivative instruments which were used for liquidity management and hedging where internal ESG score cannot be determined. These types of holdings were not classified as 'positive or improving'.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager undertook initial and ongoing due diligence of the governance structure of issuers. This analysis was presented to investment committees and incorporated into the governance component of the ESG scores. The Investment Manager analysed key governance risk factors on a case-by- case basis. Governance risks assessed can include institutional strength and openness, rule of law, transparency, and government capacity. If an issuer was rated 5 (unfavourable) under Barings' ESG current state score for governance, it was formally excluded for investment. The Investment Manager tracked and monitored governance controversies and took engagement action when they occurred. An issuer with a low (but acceptable) governance score would also have been tracked for commitments towards improvement over time as part of the internal ESG scoring process. Where the Investment Manager determined that a holding in the Sub-Fund's portfolio did not meet its good governance thresholds, the Investment Manager engaged with the relevant issuer in order to seek to bring it into compliance. If engagement with the relevant issuer was not deemed appropriate or engagement subsequently proved unsuccessful, the Investment Manager considered its position.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Barings Emerging Markets Debt Short Duration Fund
Legal entity identifier: 5493002PYX2DGGGHMM78

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** ___% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

- **To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub-Fund promotes positive or improving resource intensity, environmental footprint, employee satisfaction and societal impacts of products/services. The Sub-Fund will achieve this by investing at least 50% of its Net Asset Value in issuers which exhibit any of these characteristics.

As at 31 December 2025, the Sub-Fund met its environmental and/or social characteristics as the percentage of its Net Asset Value in issuers which exhibit any of the above characteristics was 72.35%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The sustainability indicator used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund was the percentage of the Sub-Fund's Net Asset Value invested in issuers that exhibit positive or improving resource intensity, environmental footprint, employee satisfaction or societal impacts of its products/services. Issuers are assessed through the Investment Manager's proprietary ESG scoring framework.

As at 31 December 2025, the Sub-Fund's percentage of its Net Asset Value in issuers that exhibit such characteristics was 72.35%, which was 22.35% above the minimum threshold.

- **And compared to previous periods?**

The following table provides information about the performance of the sustainability indicator used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund, as further detailed in the prospectus.

Sustainability Indicator	Metric	2024	2023	2022
Issuers promote positive or improving resource intensity, environmental footprint, employee satisfaction and societal impacts of products/services	% of its Net Asset Value in assets which exhibit positive or improving ESG characteristics	76.94%	77.80%	74.28%*

*The metric used to measure the attainment of the sustainability indicator was redefined in 2023. Therefore, in 2022 the percentage was calculated based on the investments in the portfolio, whereas in subsequent years it is calculated based on Net Asset Value.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

- **How did this financial product consider principal adverse impacts on sustainability factors?**

Barings' ESG integration process is designed to ensure that the Investment Manager assesses the sustainability risk factors that are material to the overall credit risk of an investment. Subject to the availability of data and materiality, the principal adverse sustainability indicators that are deemed mandatory as they relate to 'investments in companies' (as per Annex 1, Table 1 of the Regulatory Technical Standards) along with the principal adverse impact of 'Environmental Indicator 4. Investments in companies without carbon emission reduction initiatives' and 'Social Indicator 14. Number of identified cases of severe human rights issues and incidents' on sustainability factors, were considered as part of the pre-investment due diligence. The significance of indicators varied according to the business activities of the issuer being evaluated. The consideration of the relevant indicators was incorporated into the Investment Manager's investment committee recommendations and ESG scores.

- **What were the top investments of this financial product?***

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2025.

Largest investments	Sector	% Assets	Country
Abu Dhabi Commercial Bank PJSC 8.000% 31/12/2099	Banking	4.33%	United Arab Emirates

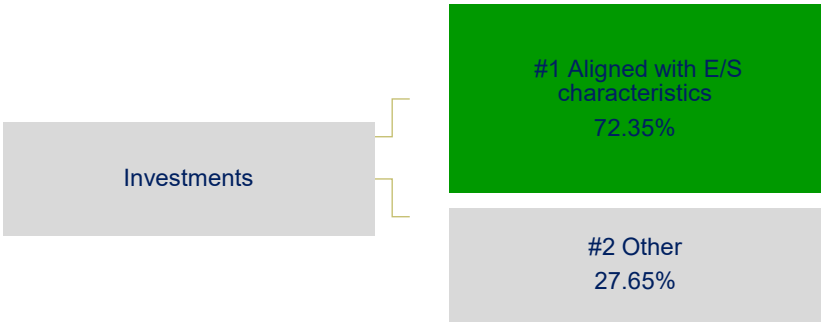
* The listed top investments of the Sub-Fund are as at 31 December 2025. The Sector source is the Merrill Class 3 industry classification.

- **What was the proportion of sustainability-related investments?**
- ***What was the asset allocation?***

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

- ***In which economic sectors were the investments made?***

The following table details the economic sectors that the Sub-Fund was exposed to as at 31 December 2025.

Sector	% of Investments
Banking	41.96%
Energy	14.20%
Basic Industry	9.49%
Telecommunications	8.46%
Technology & Electronics	4.14%
Real Estate	3.91%
Capital Goods	3.42%
Sovereign	2.79%
Transportation	2.50%
Media	2.36%
Leisure	2.08%
Financial Services	1.21%
Insurance	1.03%
Consumer goods	0.96%
Automotive	0.81%
Healthcare	0.37%
Investment Funds	0.31%

The Sector source is the Merrill Class 3 industry classification.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by. the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

- **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Sub-Fund's investments are sustainable investments with an environmental objective that align with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ **Yes:**

☐ **In fossil gas** ☐ **In nuclear energy**

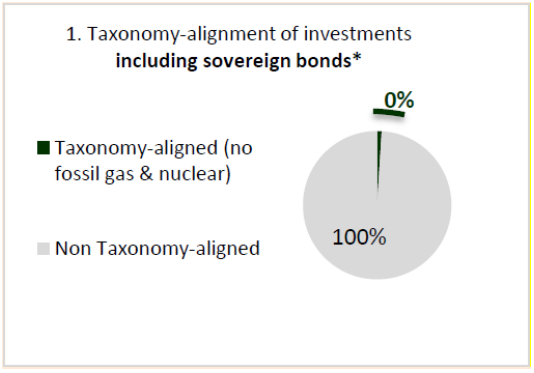
☒ **No**

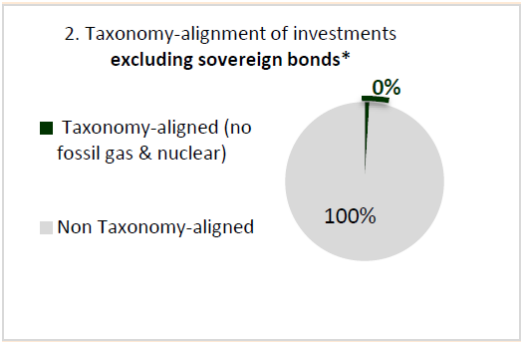
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

- ***What was the share of investments made in transitional and enabling activities?***

The Sub-Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy during the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "Other" comprised of issuers which were approved by the Investment Manager but which either had a weak ESG starting position with potential for improved ESG performance, or which had low ESG scores, but their fundamental credit profile indicated that the investment offers an attractive risk / reward profile for the Sub-Fund.

Additionally, the investments included under "Other" were cash, cash equivalents and derivative instruments which were used for liquidity management and hedging where internal ESG score cannot be determined. These types of holdings were not classified as 'positive or improving' and were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Issuers were selected for the ESG profile according to the Investment Manager's proprietary ESG scoring methodology. When assessing an investment, the Investment Manager utilised their direct access to management, banking group and financial sponsors in addition to information published by issuers. The team also sought to understand market consensus on ESG profile of each issuer, through its access to third party ESG research providers. This information and interaction allowed thorough due diligence to be undertaken on the ESG risk profile of an issuer. For each asset, the Investment Manager examined the scores of the indicators to determine an issuer's ESG credentials and also considered a momentum indicator scoring which captures relevant shocks that may impact the scoring in the future. Scoring indicators included environmental (resource intensity, environmental footprint,) social (societal impacts of products and services, employee satisfaction) and governance (effectiveness of management boards, credibility of auditing arrangements and accountability of management) assessments to screen companies where ESG standards are positive or improving. The Investment Manager undertook ESG scoring of issuers that are owned or being monitored. ESG scores were compiled based on an analyst assessment and reviewed by investment committees within the Investment Manager when applicable. ESG ratings were reassessed as material ESG developments occurred and updated in line with the issuers reporting cycles. A review process ensured ratings are accurately maintained.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Barings Emerging Markets Debt Blended Total Return Fund
Legal entity identifier: 5493006S4O01V3LR8846
*

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** ___% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

- **To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub-Fund invests in both emerging market sovereign and corporate debt. The investment team utilizes separate approaches when actively managing the characteristics the Sub-Fund promotes.

For sovereign debt positions the Sub-Fund promotes positive or improving rule of law, fiscal transparency, policy effectiveness, sustainable social development, and climate stewardship. The Sub-Fund will achieve this by investing at least 50% of its Net Asset Value in issuers which exhibit positive or improving environmental ("E") and/or social ("S") characteristics as represented by a proprietary aggregated ESG current state and outlook score.

For corporate debt positions the Sub-Fund promotes positive or improving resource intensity, environmental footprint, employee satisfaction and societal impacts of products/services. The Sub-Fund will achieve this by investing at least 50% of its Net Asset Value in issuers which exhibit any of these characteristics.

As at 31 December 2025, the Sub-Fund met its environmental and/or social characteristics as the percentage of its Net Asset Value in issuers which exhibit the above characteristics was 73.13%.

- **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

For sovereign debt the sustainability indicator used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund was the percentage of the Sub-Fund's Net Asset Value invested in assets that exhibit positive or improving ESG characteristics as represented by a proprietary aggregated ESG current state and outlook score. For sovereign debt this is approached in both a quantitative and qualitative manner.

For corporate debt the sustainability indicator used to measure the attainment of the E and S characteristics promoted by the Sub-Fund was the percentage of the Sub-Fund's Net Asset Value invested in issuers that exhibit positive or improving resource intensity, environmental footprint, employee satisfaction or societal impacts of its products/services. Issuers are assessed through the Investment Manager's proprietary ESG scoring methodology.

As at 31 December 2025, the Sub-Fund's percentage of Net Asset Value invested in assets that exhibit the above characteristics was 73.13%, which was 23.13% above the minimum threshold.

- **And compared to previous periods?**

This is the first periodic report prepared for the Sub-Fund in accordance with Regulation (EU) 2022/1288.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

- **How did this financial product consider principal adverse impacts on sustainability factors?**

Barings' ESG integration process is designed to ensure that the Investment Manager assesses the sustainability risk factors that are material to the overall credit risk of an investment. Subject to the availability of data and materiality, the principal adverse sustainability indicators that were deemed mandatory as they relate to 'investments in companies' (as per Annex 1, Table 1 of the Regulatory Technical Standards) along with the principal adverse impact of 'Environmental Indicators 5 Share of energy consumption and production from non-renewable sources, 7. Activities negatively affecting biodiversity sensitive areas' and 'Sovereign Indicators 15 and 16'. Number and percent of countries subject to social violations of identified cases of severe human rights issues and incidents on sustainability factors, were considered as part of the pre-investment due diligence. The significance of indicators varied according to the business activities of the issuer being evaluated. The consideration of the relevant indicators was incorporated into the Investment Manager's investment committee recommendations and ESG scores.

- **What were the top investments of this financial product?***

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2025.

Largest investments	Sector	% Assets	Country
Peru Government Bonds 6.850% 12/02/2042	Sovereign	4.51%	Peru

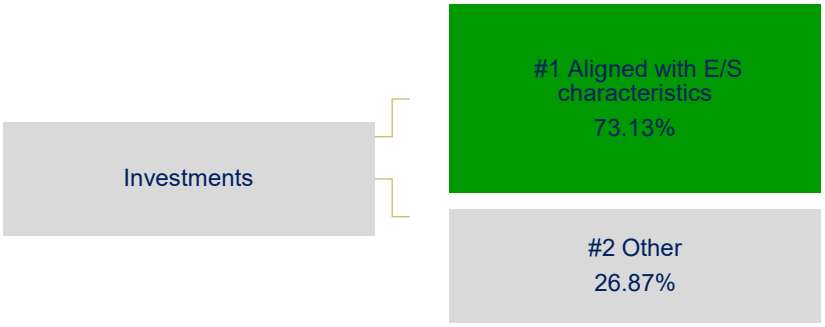
* The listed top investments of the Sub-Fund are as at 31 December 2025. The Sector source is the Merrill Class 3 industry classification.

- **What was the proportion of sustainability-related investments?**
- ***What was the asset allocation?***

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, have no minimum environmental or social safeguards, nor are qualified as sustainable investments.

- ***In which economic sectors were the investments made?***

The following table details the economic sectors that the Sub-Fund was exposed to as at 31 December 2025.

Sector	% of Investments
Sovereign	63.65%
Banking	10.54%
Supranational	6.32%
Energy	5.51%
Basic Industry	4.97%
Telecommunications	2.19%
Consumer goods	1.90%
Financial Services	1.35%
Technology & Electronics	1.30%
Media	0.72%
Electric	0.67%
Transportation	0.45%
Real Estate	0.43%

The Sector source is the Merrill Class 3 industry classification.

- **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Sub-Fund's investments are sustainable investments with an environmental objective that align with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by. the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

☐ **Yes:**

☐ **In fossil gas** ☐ **In nuclear energy**

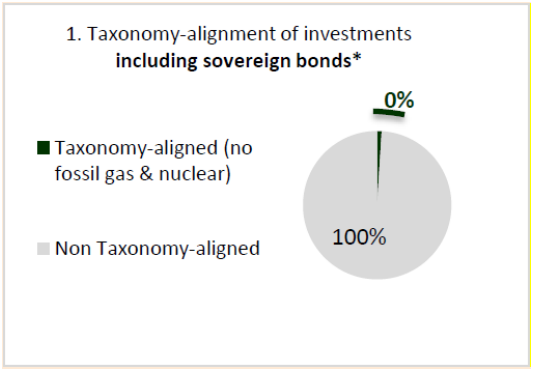
☒ **No**

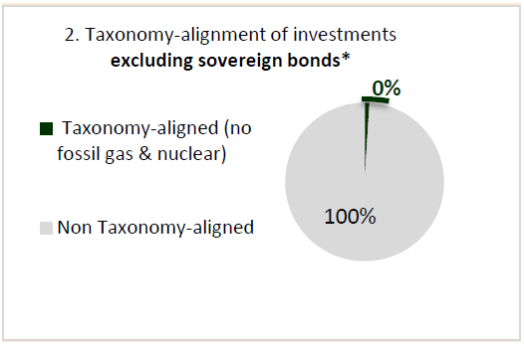
[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- ***What was the share of investments made in transitional and enabling activities?***

The Sub-Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy during the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "Other" comprised of assets which were approved by the Investment Manager, but which either had a weak ESG starting position with potential for improved ESG performance, or which had low ESG scores, but their fundamental credit profile indicated that the investment offers an attractive risk / reward profile for the Sub-Fund. Additionally, the investments included under "Other" were cash, cash equivalents and derivative instruments which were used for liquidity management and hedging where internal ESG score cannot be determined. These types of holdings were not classified as 'positive or improving'.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager monitored the environmental and/or social characteristics of the Sub-Fund's portfolio during the reference period.

For the sovereign sleeve:

Countries that exhibit positive or improving ESG characteristics were selected through the Investment Manager's proprietary research which was supported with the use of third party issuer-specific ESG data; the approach consisted of a threefold analysis determining a government's capacity and willingness to provide for its population, its resilience to shocks and its ability to grow sustainably, using both a standard set of indicators and qualitative analysis. For each asset, the Investment Manager examined the scores of the indicators to determine a country's sustainability over time and considered relevant shocks that may have impacted the scoring. These indicators, as well as the Investment Manager's specialised country expertise, were placed into the capacity and willingness framework to determine the country's current sustainability as well as potential trends that should be considered from an ESG perspective. The frequency of update for each country depended on its significance in the portfolio and the benchmark, but ESG scores were reviewed for all countries under coverage at least once per year by the Sovereign ESG Committee which comprises all sovereign analysts on the Investment Manager's team. Issuers that exhibit positive or improving ESG characteristics were selected through the Investment Manager's proprietary ESG scoring methodology, which was supported with the use of third-party issuer specific ESG data where coverage allowed. When assessing an investment, the Investment Manager utilised its access to management and financial sponsors in addition to information published by issuers and through access to third party ESG research providers, where coverage allowed. This information and interaction enabled due diligence to be undertaken on the ESG risk profile of an issuer.

For the corporate sleeve:

For each asset, the Investment Manager analysed an issuer's ESG profile over time and considered relevant shocks that may impact the scoring. The Investment Manager undertook ESG scoring of issuers that were owned or being monitored. ESG scores were compiled based on an analyst assessment and presented in investment underwriting memos. Issuers were assigned both an ESG current state score and an ESG outlook score for environmental, social, and governance categories. The ESG current state score assessed the current sustainability profile of the issuer relative to the investment universe. ESG outlook scores analysed momentum of the issuer on ESG topics in comparison to expected ESG development in the market. Investee issuers were considered as being "positive" if they had a better ESG current state score. Investee issuers were considered as being "improving" if they had a moderate ESG current state score and an improving outlook score. ESG scores were reassessed as material ESG developments occurred and updated in line with issuer reporting cycles and updated/verified at least annually. The Investment Manager adopted an active management policy in relation to ESG topics and had a preference to focus on engagement to improve material issuer transparency and behaviour. Engagement activity was focused on key ESG credit risk areas.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Barings Emerging Markets Sovereign Debt Fund
Legal entity identifier: 549300O9R5YBD5R5TR77

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** ___% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

- **To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub-Fund promotes positive or improving resource intensity, environmental footprint, employee satisfaction and societal impacts of products/services. The Sub-Fund will achieve this by investing at least 50% of its Net Asset Value in issuers which exhibit any of these characteristics.

As at 31 December 2025, the Sub-Fund met its environmental and/or social characteristics as the percentage of its Net Asset Value in issuers which exhibit any of the above characteristics was 67.85%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The sustainability indicator used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund was the percentage of the Sub-Fund's Net Asset Value invested in issuers that exhibit positive or improving resource intensity, environmental footprint, employee satisfaction or societal impacts of its products/services. Issuers are assessed through the Investment Manager's proprietary ESG scoring framework.

As at 31 December 2025, the Sub-Fund's percentage of its Net Asset Value in issuers that exhibit such characteristics was 67.85%, which was 17.85% above the minimum threshold.

- **And compared to previous periods?**

The following table provides information about the performance of the sustainability indicator used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund, as further detailed in the prospectus.

Sustainability Indicator	Metric	2024	2023	2022
Issuers promote positive or improving resource intensity, environmental footprint, employee satisfaction and societal impacts of products/services	% of its Net Asset Value in assets which exhibit positive or improving ESG characteristics	73.13%	86.57%	84.76%*

*The metric used to measure the attainment of the sustainability indicator was redefined in 2023. Therefore, in 2022 the percentage was calculated based on the investments in the portfolio, whereas in subsequent years it is calculated based on Net Asset Value.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

- **How did this financial product consider principal adverse impacts on sustainability factors?**

Barings' ESG integration process is designed to ensure that the Investment Manager assesses the sustainability risk factors that are material to the overall credit risk of an investment. Subject to the availability of data and materiality, the principal adverse sustainability indicators that are deemed mandatory as they relate to 'investments in companies' (as per Annex 1, Table 1 of the Regulatory Technical Standards) along with the principal adverse impact of 'Environmental Indicators 5 Share of energy consumption and production from non-renewable sources, 7. Activities negatively affecting biodiversity sensitive areas' and 'Sovereign Indicators 15 and 16'. Number and percent of countries subject to social violations of identified cases of severe human rights issues and incidents on sustainability factors, were considered as part of the pre-investment due diligence. The significance of indicators varied according to the business activities of the issuer being evaluated. The consideration of the relevant indicators was incorporated into the Investment Manager's investment committee recommendations and ESG scores.

- **What were the top investments of this financial product?***

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2025.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

- **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Sub-Fund's investments are sustainable investments with an environmental objective that align with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

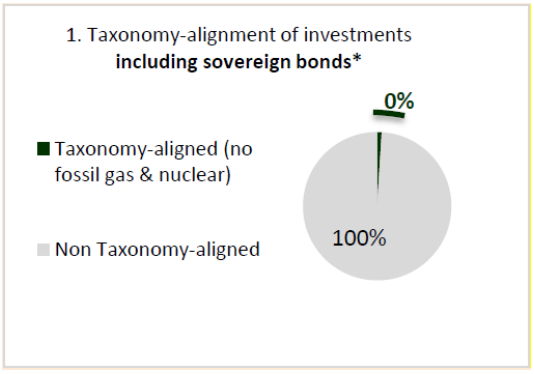
☐ **Yes:**

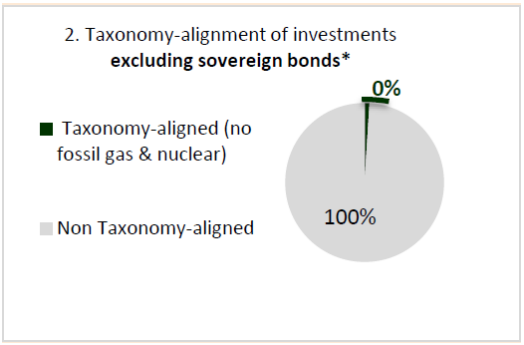
☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- ***What was the share of investments made in transitional and enabling activities?***

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

The Sub-Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy during the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "Other" comprised of issuers which were approved by the Investment Manager but which either had a weak ESG starting position with potential for improved ESG performance, or which had low ESG scores, but their fundamental credit profile indicated that the investment offers an attractive risk / reward profile for the Sub-Fund.

Additionally, the investments included under "Other" were cash, cash equivalents and derivative instruments which were used for liquidity management and hedging where internal ESG score cannot be determined. These types of holdings were not classified as 'positive or improving' and were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager undertook initial and ongoing due diligence of the governance structure of issuers. This analysis was presented to investment committees and incorporated into the governance component of the ESG scores. The Investment Manager analysed key governance risk factors on a case-by- case basis. Governance factors assessed can include institutional strength and openness, rule of law, transparency, and government capacity. If an issuer was rated 5 (unfavourable) under Barings' ESG current state score for governance, it was formally excluded for investment. The Investment Manager tracked and monitored governance controversies and took engagement action when they occurred. An issuer with a low (but acceptable) governance score would also have been tracked for commitments towards improvement over time as part of the internal ESG scoring process. Where the Investment Manager determined that a holding in the Sub-Fund's portfolio did not meet its good governance thresholds, the Investment Manager engaged with the relevant issuer in order to enhance transparency and accountability. If engagement with the relevant issuer was not deemed appropriate or engagement subsequently proved unsuccessful, the Investment Manager considered its position and if necessary and to the extent possible based upon market conditions and any specific investment considerations, attempted to divest the holding from the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Barings U.S. High Yield Bond Fund **Legal entity identifier:** 549300GDBPPGHVEXGJ48

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** ___% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

- **To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub-Fund promotes positive or improving resource intensity, environmental footprint, employee satisfaction and societal impacts of products/services. The Sub-Fund will achieve this by investing at least 50% of its Net Asset Value in issuers which exhibit any of these characteristics.

As at 31 December 2025, the Sub-Fund met its environmental and/or social characteristics as the percentage of its Net Asset Value in issuers which exhibit any of the above characteristics was 62.33%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The sustainability indicator used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund was the percentage of the Sub-Fund's Net Asset Value invested in issuers that exhibit positive or improving resource intensity, environmental footprint, employee satisfaction or societal impacts of its products/services. Issuers are assessed through the Investment Manager's proprietary ESG scoring framework.

As at 31 December 2025, the Sub-Fund's percentage of its Net Asset Value in issuers that exhibit such characteristics was 62.33%, which was 12.33% above the minimum threshold.

- **And compared to previous periods?**

The following table provides information about the performance of the sustainability indicator used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund, as further detailed in the prospectus.

Sustainability Indicator	Metric	2024	2023	2022
Issuers promote positive or improving resource intensity, environmental footprint, employee satisfaction and societal impacts of products/services	% of its Net Asset Value in assets which exhibit positive or improving ESG characteristics	65.17%	64.31%	67.71%*

*The metric used to measure the attainment of the sustainability indicator was redefined in 2023. Therefore, in 2022 the percentage was calculated based on the investments in the portfolio, whereas in subsequent years it is calculated based on Net Asset Value.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

- **How did this financial product consider principal adverse impacts on sustainability factors?**

Barings' ESG integration process is designed to ensure that the Investment Manager assesses the sustainability risk factors that are material to the overall credit risk of an investment. Subject to the availability of data and materiality, the principal adverse sustainability indicators that are deemed mandatory as they relate to 'investments in companies' (as per Annex 1, Table 1 of the Regulatory Technical Standards) along with the principal adverse impact of 'Environmental Indicator 4. Investments in companies without carbon emission reduction initiatives' and 'Social Indicator 14. Number of identified cases of severe human rights issues and incidents' on sustainability factors, were considered as part of the pre-investment due diligence. The significance of indicators varied according to the business activities of the issuer being evaluated. The consideration of the relevant indicators was incorporated into the Investment Manager's investment committee recommendations and ESG scores.

- **What were the top investments of this financial product?***

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: as at 31 December 2025.

Largest investments	Sector	% Assets	Country

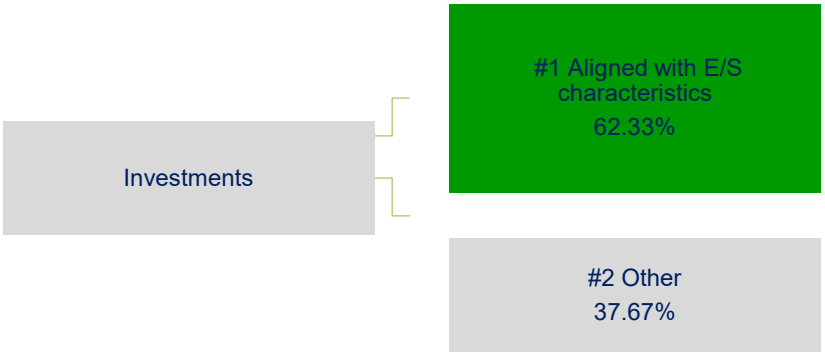
* The listed top investments of the Sub-Fund are as at 31 December 2025. The Sector source is the Merrill Class 3 industry classification.

- **What was the proportion of sustainability-related investments?**
- ***What was the asset allocation?***

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics nor are qualified as sustainable investments.

- ***In which economic sectors were the investments made?***

The following table details the economic sectors that the Sub-Fund was exposed to as at 31 December 2025.

Sector	% of Investments
Energy	13.60%
Healthcare	11.76%
Basic Industry	11.65%
Capital Goods	9.17%
Financial Services	8.69%
Media	6.52%
Telecommunications	6.15%
Leisure	4.99%
Utility	4.77%
Transportation	4.11%
Services	3.88%
Technology & Electronics	3.50%
Retail	2.44%
Real Estate	2.10%
Consumer goods	1.91%
Communications	1.69%
Electric	1.50%
Automotive	1.26%
Insurance	0.31%

The Sector source is the Merrill Class 3 industry classification.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by. the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Sub-Fund's investments are sustainable investments with an environmental objective that align with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

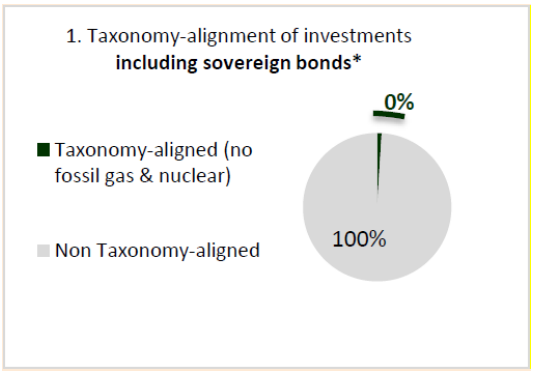
☐ **Yes:**

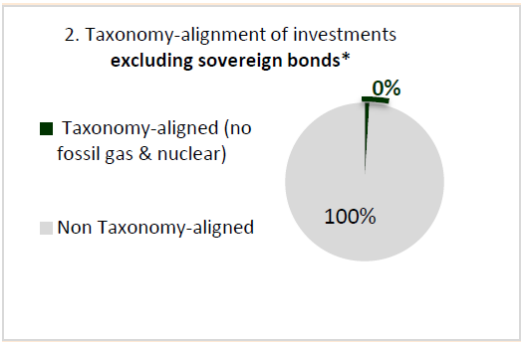
☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- ***What was the share of investments made in transitional and enabling activities?***

The Sub-Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy during the reference period.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

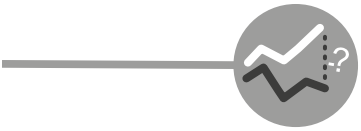
The investments included under "Other" comprised of issuers which were approved by the Investment Manager but which either had a weak ESG starting position with potential for improved ESG performance, or which had low ESG scores, but their fundamental credit profile indicated that the investment offers an attractive risk / reward profile for the Sub-Fund.

Additionally, the investments included under "Other" were cash, cash equivalents and derivative instruments which were used for liquidity management and hedging where internal ESG score cannot be determined. These types of holdings were not classified as 'positive or improving' and were not subject to any minimum environmental or social safeguards.

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Issuers were selected for the ESG profile according to the Investment Manager's proprietary ESG scoring methodology. When assessing an investment, the Investment Manager utilised their direct access to management, banking group and financial sponsors in addition to information published by issuers. The team also sought to understand market consensus on ESG profile of each issuer, through its access to third party ESG research providers. This information and interaction allowed thorough due diligence to be undertaken on the ESG risk profile of an issuer. For each asset, the Investment Manager examined the scores of the indicators to determine an issuer's ESG credentials and also considered a momentum indicator scoring which captures relevant shocks that may impact the scoring in the future. Scoring indicators included environmental (resource intensity, environmental footprint,) social (societal impacts of products and services, employee satisfaction) and governance (effectiveness of management boards, credibility of auditing arrangements and accountability of management) assessments to screen companies where ESG standards are positive or improving. The Investment Manager undertook ESG scoring of issuers that are owned or being monitored. ESG scores were compiled based on an analyst assessment and reviewed by investment committees within the Investment Manager when applicable. ESG ratings were reassessed as material ESG developments occurred and updated in line with the issuers reporting cycles. A review process ensured ratings are accurately maintained.



- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Barings Developed and Emerging Markets High Yield Bond Fund
Legal entity identifier: 549300NDDQ34YUYG0C44

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** ___% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

- **To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Sub-Fund promotes positive or improving resource intensity, environmental footprint, employee satisfaction and societal impacts of products/services. The Sub-Fund will achieve this by investing at least 50% of its Net Asset Value in issuers which exhibit any of these characteristics.

As at 31 December 2025, the Sub-Fund met its environmental and/or social characteristics as the percentage of its Net Asset Value in issuers which exhibit any of the above characteristics was 64.25%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The sustainability indicator used to measure the attainment of the environmental and social characteristics promoted by the Sub-Fund was the percentage of the Sub-Fund's Net Asset Value invested in issuers that exhibit positive or improving resource intensity, environmental footprint, employee satisfaction or societal impacts of its products/services. Issuers are assessed through the Investment Manager's proprietary ESG scoring framework.

As at 31 December 2025, the Sub-Fund's percentage of Net Asset Value invested in issuers that exhibit such characteristics was 64.25%, which was 14.25% above the minimum threshold.

- **And compared to previous periods?**

This is the first periodic report prepared for the Sub-Fund in accordance with Regulation (EU) 2022/1288.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

- **How did this financial product consider principal adverse impacts on sustainability factors?**

Barings' ESG integration process is designed to ensure that the Investment Manager assesses the sustainability risk factors that are material to the overall credit risk of an investment. Subject to the availability of data and materiality, the principal adverse sustainability indicators that are deemed mandatory as they relate to 'investments in companies' (as per Annex 1, Table 1 of the Regulatory Technical Standards) along with the principal adverse impact of 'Environmental Indicator 4. Investments in companies without carbon emission reduction initiatives' and 'Social Indicator 14. Number of identified cases of severe human rights issues and incidents' on sustainability factors, were considered as part of the pre-investment due diligence. The significance of indicators varied according to the business activities of the issuer being evaluated. The consideration of the relevant indicators was incorporated into the Investment Manager's investment committee recommendations and ESG scores.

Services	4.77%
Technology & Electronics	4.37%
Utility	3.73%
Banking	3.49%
Transportation	3.10%
Retail	2.57%
Real Estate	2.30%
Automotive	1.82%
Electric	0.77%
Insurance	0.65%
Government	0.19%
Investment Funds	0.14%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by. the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The Sector source is the Merrill Class 3 industry classification.

- **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Sub-Fund's investments are sustainable investments with an environmental objective that align with the EU Taxonomy.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?**

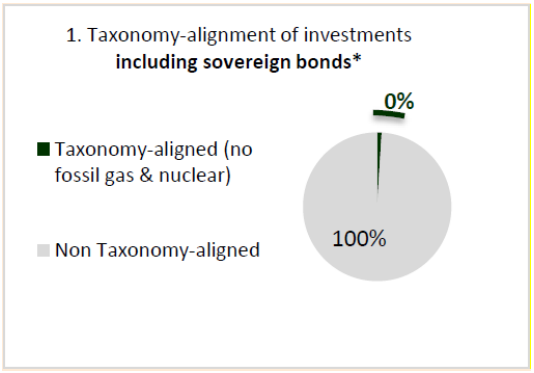
☐ **Yes:**

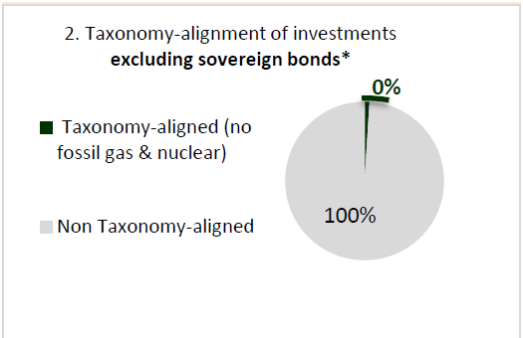
☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*





For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- ***What was the share of investments made in transitional and enabling activities?***

The Sub-Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy during the reference period.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "Other" comprised of assets which were approved by the Investment Manager, but which either had a weak ESG starting position with potential for improved ESG performance, or which had low ESG scores, but their valuations indicated that the investment offers a strong risk / reward profile for the Sub-Fund.

Additionally, the investments included under "Other" were cash, cash equivalents and derivative instruments which were used for liquidity management and hedging where internal ESG score cannot be determined. These types of holdings were not classified as 'positive or improving' and were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Issuers were selected for the ESG profile according to the Investment Manager's proprietary ESG scoring methodology. When assessing an investment, the Investment Manager utilised their direct access to management, banking group and financial sponsors in addition to information published by issuers. The team also sought to understand market consensus on ESG profile of each issuer, through its access to third party ESG research providers. This information and interaction allowed thorough due diligence to be undertaken on the ESG risk profile of an issuer. For each asset, the Investment Manager examined the scores of the indicators to determine an issuer's ESG credentials and also considered a momentum indicator scoring which captures relevant shocks that may impact the scoring in the future. Scoring indicators included environmental (resource intensity, environmental footprint,) social (societal impacts of products and services, employee satisfaction) and governance (effectiveness of management boards, credibility of auditing arrangements and accountability of management) assessments to screen companies where ESG standards are positive or improving. The Investment Manager undertook ESG scoring of issuers that are owned or being monitored. ESG scores were compiled based on an analyst assessment and reviewed by investment committees within the Investment Manager when applicable. ESG ratings were reassessed as material ESG developments occurred and updated in line with the issuers reporting cycles. A review process ensured ratings are accurately maintained.
