## NOVEMBER 2025 / FACTSHEET

### KEY RISK

During exceptional market conditions there may be insufficient buyers and sellers to allow the Fund to buy and sell investments, which could affect the Fund's ability to meet investors' redemption requests. Losses may occur if an organisation through which we buy an asset fails to meet its obligations. Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care. Fund investments in derivatives are sensitive to changes in the value of the underlying asset on which they are based and their use may result in losses greater than the amount originally invested. Fund investments in overseas assets may lose value due to movements in foreign exchange rates. Fund investments in debt securities are sensitive to changes in interest rates and are subject to risks that the issuer will not meet its payment obligations (i.e., default). Low rated (high yield) or equivalent unrated debt securities generally offer a higher return than higher rated debt securities, but are subject to greater risks that the issuer will default. Fund investments in emerging markets may be subject to more risk due to economic, political or structural challenges. Further information on the Fund's risks can be found in the KIID and prospectus.

### OBJECTIVE

The Barings Emerging Markets Local Debt Fund ("The Fund) seeks a long-term total return through current income and capital appreciation by investing in a diversified portfolio of emerging markets local currency-denominated debt securities and global currencies.

<b>FUND PERFORMANCE (%)</b>	Class E USD Inc (Gross of Fees)	Class E USD Inc (Net of Fees)	Benchmark
Year to Date	20.64	19.17	17.51

09/30/2020 - 09/30/2021	2.73	1.37	2.63

PAST PERFORMANCE DOES NOT PREDICT FUTURE RETURNS. An investment entails a risk of loss. Returns for periods greater than one year are annualized. If you are investing in a different currency to the base currency of the fund, your returns may increase or decrease as a result of currency fluctuations. The Benchmark is used for risk management and performance comparison purposes. The investment manager has complete discretion in making investments and is not constrained by the Benchmark.

Source: Morningstar/Barings: Performance figures are shown in USD on a NAV per unit basis, with gross income reinvested.

Performance figures prior to August 17, 2018 are hypothetical. The hypothetical fund performance is based on the A USD Inc share class. This has been net down by 1.40% from the inception of the fund to 8/31/2015 and by 1.30% from 9/1/2017 to August 16, 2017 to create a proxy net E class calculated from the inception of the fund. The proxy net E class has been net down by the A class OCF

## MANAGEMENT FEE SCHEDULE

	Commitment	Management Fee (p.a.)	OCF <sup>1</sup>
Share Tranche E	\$100k (or equivalent)	1.20%	1.33%

Annual Expenses capped at 20 bps per annum. Please refer to Prospectus for more information. Be aware of currency risk. If you are buying this product in a different currency to your local currency you will receive payments in a different currency, so the final return you will get will depend on the exchange rates between the two currencies.

1. The OCF represents annual charges and other payments taken from the Fund, including the Management Fee. The OCF excludes the costs of buying and selling assets for the Fund. The OCF is based on ex-post expenses for the year ended October 29, 2021 and may vary from year to year.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Barings Emerging Markets Local Debt Fund class A USD Acc share class was rated against the numbers of EAA Fund Global Emerging Markets Bond - Local Currency investments over the following time periods: 828 investments in the last three years, 745 investments in the last five years, and 429 investments in the last ten years. **Past performance is no guarantee of future results.**

Morningstar Rating is for the A USD Inc share class only; other classes may have different performance characteristics.
