

Barings Emerging Markets Sovereign Debt Fund

This is a marketing communication

OBJECTIVE AND INVESTMENT POLICY

Objective: To seek maximum total return, consistent with preservation of capital, through high income generation and, where appropriate, capital appreciation.

Investment Policy: The Fund invests at least 80% of its net assets in a diversified portfolio of fixed income instruments that are economically tied to or issued by issuers in emerging markets around the world. Emerging markets are regions of the world that are still developing their economies. The fixed income instruments in which the Fund invests may include corporate bonds and notes, sovereign issues, covered bonds, commercial paper and other income securities. The Fund invests at least 60% of its net assets in sovereign issues. Up to 20% of the Fund's net assets can be invested in securities rated lower than B- by Standard & Poors (S&P) or another internationally recognised rating agency or, if unrated, determined by the investment manager to be of a comparable quality. Debt securities are rated to indicate the probability that the issuer will repay the loan. Up to 20% of the Fund's net assets may be invested in convertible securities. The Fund will invest at least 50% of its Net Asset Value in assets which exhibit positive or improving environmental ("E") and/or social ("S") characteristics as represented by a proprietary aggregated ESG current state and outlook score. The Fund is also permitted to invest in mortgage-backed securities, asset-backed securities and unleveraged loan participation securities, other Funds, cash and cash-equivalent securities and money market instruments. The Fund may use derivative instruments for both investment and hedging purposes. The return on a derivative is linked to movements in an underlying instrument referenced by the derivative such as currency or interest rates. The base currency of the Fund is USD.

PERFORMANCE CHART (%)*

PAST PERFORMANCE DOES NOT PREDICT FUTURE RETURNS. An investment entails a risk of loss. If you are investing in a different currency to the base currency of the fund, your returns may increase or decrease as a result of currency fluctuations. All data is as of 30/04/2026, unless otherwise stated. Performance figures are shown in USD on a NAV per unit basis, with gross income reinvested. Performance reflects the deduction of fees and expenses based upon the lowest fee share class available within the periods provided. Please note that this does not reflect what a new investor will experience, as their returns will be reduced by the deduction of such fees and expenses of the applicable share class. Returns for periods greater than one year are annualized. The Benchmark is used for risk management and performance comparison purposes. The difference between the Fund's duration and the Benchmark will be no more than 2.5 years. The investment manager has complete discretion in making investments and is otherwise not constrained by the Benchmark.

1. The Index is J.P. Morgan EMBI Global Diversified Index.

* This chart shows how an investment of USD 100 in the Fund on its inception date would have performed.

Lower Risk			Higher Risk

For full risk details, please consult the KID.

KEY RISK

- Your capital is at risk.
- During exceptional market conditions there may be insufficient buyers and sellers to allow the Fund to buy and sell investments, which could affect the Fund's ability to meet investors' redemption requests.
- Losses may occur if an organisation through which we buy an asset fails to meet its obligations.
- Fund investments in derivatives are sensitive to changes in the value of the underlying asset on which they are based and their use may result in losses greater than the amount originally invested. Fund investments in overseas assets may lose value due to movements in foreign exchange rates.
- Fund investments in debt securities are sensitive to changes in interest rates and are subject to risks that the issuer will not meet its payment obligations (i.e., default). Low rated (high yield) or equivalent unrated debt securities generally offer a higher return than higher rated debt securities, but are subject to greater risks that the issuer will default.
- Fund investments in emerging markets may be subject to more risk due to economic, political or structural challenges.
- Please refer to the Prospectus, Supplement and KIID for detailed information about the Fund, including objective, investment policy and risks on Barings.com**

RATING ALLOCATION (%)

CURRENCY ALLOCATION

1. Barings' Global Sovereign Debt team uses a custom methodology to calculate average rating for the portfolio. Weighting is based off of market value, with unrated securities excluded from the weights. Non-USD denominated sovereign bonds are assigned a rating according to the following waterfall, leading from highest priority to lowest priority: 1) Moody's LT Currency Rating 2) S&P LT Currency Rating 3) Moody's Issue Rating 4) S&P Issue Rating. Corporate bonds and USD denominated sovereign bonds are assigned the median observation from S&P, Moody's, and Fitch ratings; if all three agencies have not reported a rating, the security will be assigned an internal rating on a PD scale. Cash is assigned a rating of AAA. Methodology for derivatives will differ depending on the type.

2. Where applicable, portfolio level yield metrics include the yield impact of FX hedging on non-base currency positions.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Barings EM Sovereign Debt Tr A USD Acc was rated against the following numbers of Global Emerging Markets Bond investments as of 31/03/2026 over the following time periods: 1471 investments in the last three years, 1289 investments in the last five years, and 609 investments in the last ten years. Past performance is no guarantee of future results.

Morningstar Rating is for the Barings EM Sovereign Debt Tr A USD Acc share class only; other classes may have different performance characteristics.

NO OFFER:

The document is for informational purposes only and is not an offer or solicitation for the purchase or sale of any financial instrument or service in any jurisdiction. The material herein was prepared without any consideration of the investment objectives, financial situation or particular needs of anyone who may receive it. This document is not, and must not be treated as, investment advice, an investment recommendation, investment research, or a recommendation about the suitability or appropriateness of any security, commodity, investment, or particular investment strategy, and must not be construed as a projections or predictions.

In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved and before making any investment decision, it is recommended that prospective investors seek independent investment, legal, tax, accounting or other professional advice as appropriate.

Unless otherwise mentioned, the views contained in this document are those of Barings. These views are made in good faith in relation to the facts known at the time of preparation and are subject to change without notice. Individual portfolio management teams may hold different views than the views expressed herein and may make different investment decisions for different clients. Parts of this document may be based on information received from sources we believe to be reliable. Although every effort is taken to ensure that the information contained in this document is accurate, Barings makes no representation or warranty, express or implied, regarding the accuracy, completeness or adequacy of the information.

Target and projected returns are derived from Barings' proprietary model, which contain a number of assumptions and judgements about (including future projections of one month term SOFR rates as projected by forward curves at time of preparation, prepayment of a certain percentage of the overall model portfolio, and market interest rate for the loans that comprise the model portfolio, among others) that Barings believes are reasonable under the circumstances. Generally, our assumptions include construction projects proceeding according to plan, no modeled losses, and no adverse macroeconomic events, among others. However, there can be no assurance that such assumptions will prove to be accurate, and the actual realized returns will depend on, among other factors, future operating results, interest rates, economic and market conditions, and the value of the underlying assets at the time of disposition, any related transaction costs and the timing and manner of disposition, all of which may differ from the assumptions on which targets and projections are based and therefore, the actual results achieved may vary significantly from the targets and projections, and the variations may be material. We would be happy to provide you with the risks related to hypothetical performance information at your request.
