MAY 2024 / FACTSHEET

KEY RISK

During exceptional market conditions there may be insufficient buyers and sellers to allow the Fund to buy and sell investments, which could affect the Fund's ability to meet investors' redemption requests. Losses may occur if an organisation through which we buy an asset fails to meet its obligations. Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care. Fund investments in derivatives are sensitive to changes in the value of the underlying asset on which they are based and their use may result in losses greater than the amount originally invested. Fund investments in overseas assets may lose value due to movements in foreign exchange rates. Fund investments in debt securities are sensitive to changes in interest rates and are subject to risks that the issuer will not meet its payment obligations (i.e., default). Low rated (high yield) or equivalent unrated debt securities generally offer a higher return than higher rated debt securities, but are subject to greater risks that the issuer will default. Fund investments in emerging markets may be subject to more risk due to economic, political or structural challenges. Further information on the Fund's risks can be found in the KIID and prospectus.

OBJECTIVE

The Barings Emerging Markets Sovereign Debt Fund (The "Fund") is an actively managed Emerging Markets ("EM") sovereign hard currency strategy. The Fund seeks to provide maximum total return consisting of both income and capital appreciation.

PAST PERFORMANCE DOES NOT PREDICT FUTURE RETURNS. An investment entails a risk of loss. Returns for periods greater than one year are annualized. If you are investing in a different currency to the base currency of the fund, your returns may increase or decrease as a result of currency fluctuations. The Benchmark is used for risk management and performance comparison purposes. The difference between the Fund's duration and the Benchmark will be no more than 2.5 years. The investment manager has complete discretion in making investments and is otherwise not constrained by the Benchmark.

Source: Morningstar/Barings: Performance figures are shown in USD on a NAV per unit basis, with gross income reinvested.

Performance figures prior to November 8, 2019 are hypothetical. The hypothetical fund performance is based on the A USD Inc share class. This has been net down by 1.29% from the inception of the fund to create a proxy net E class calculated from the inception of the fund. The proxy net E class has been net down by the A class OCF

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Barings Emerging Markets Sovereign Debt Fund class A USD Acc share class was rated against the numbers of EAA Fund Global Emerging Markets Bond investments over the following time periods: 1496 investments in the last three years, 1088 investments in the last five years, and 517 investments in the last ten years. **Past performance is no guarantee of future results.**

Morningstar Rating is for the A USD Inc share class only; other classes may have different performance characteristics.

Target and projected returns are derived from Barings' proprietary model, which contain a number of assumptions and judgements about (including future projections of one month term SOFR rates as projected by forward curves at time of preparation, prepayment of a certain percentage of the overall model portfolio, and market interest rate for the loans that comprise the model portfolio, among others) that Barings believes are reasonable under the circumstances. Generally, our assumptions include construction projects proceeding according to plan, no modeled losses, and no adverse macroeconomic events, among others. However, there can be no assurance that such assumptions will prove to be accurate, and the actual realized returns will depend on, among other factors, future operating results, interest rates, economic and market conditions, and the value of the underlying assets at the time of disposition, any related transaction costs and the timing and manner of disposition, all of which may differ from the assumptions on which targets and projections are based and therefore, the actual results achieved may vary significantly from the targets and projections, and the variations may be material. We would be happy to provide you with the risks related to hypothetical performance information at your request.
