## MAY 2025 / FACTSHEET

### KEY RISK

During exceptional market conditions there may be insufficient buyers and sellers to allow the Fund to buy and sell investments, which could affect the Fund's ability to meet investors' redemption requests. Losses may occur if an organisation through which we buy an asset fails to meet its obligations. Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care. Fund investments in derivatives are sensitive to changes in the value of the underlying asset on which they are based and their use may result in losses greater than the amount originally invested. Fund investments in overseas assets may lose value due to movements in foreign exchange rates. Fund investments in equities may be subject to significant fluctuations in value. The Fund can hold smaller company shares which can be more difficult to buy and sell and more volatile than those of larger companies. Fund investments in emerging markets may be subject to more risk due to economic, political or structural challenges. Sector specific funds have a narrower focus than those which invest broadly across markets and are therefore more risky. Further information on the Fund's risks can be found in the offering (constitutional) documents.

### OBJECTIVE

The investment objective of the Barings Global Agriculture Fund is to achieve capital growth by investing in the agricultural sector.

### STRATEGY & MARKETING OPPORTUNITY

The Fund has the flexibility to invest in companies from across the entire agricultural value chain - from planting to harvesting to delivering food to the table. Taking a long term (five-year) perspective, we avoid valuing agriculture companies on their peak or trough earnings but focus instead on their quality and long-term growth potential.

- A rising global population should lead to structurally increasing demand in grains and edible oils. Furthermore, the global middle class is forecast to double in size between 2015 and 2030 and this will likely lead to a shift in diets to consume more meat, fish and dairy which is grains intensive to produce.
- Investing across the agricultural value chain, from farm to fork, enables the Fund to access a diverse opportunity set of market-leading agriculture companies from across the globe.

FUND PERFORMANCE (%)	Class A GBP Acc (Gross of Fees)	Class A GBP Acc (Net of Fees)	Benchmark <sup>1</sup>

**PAST PERFORMANCE DOES NOT PREDICT FUTURE RETURNS.** An investment entails a risk of loss. Returns for periods greater than one year are annualized. If you are investing in a different currency to the base currency of the fund, your returns may increase or decrease as a result of currency fluctuations. An investment style bias can impact the performance of the Fund, relative to its benchmark in a positive or negative way. When one style is in favour another may be out of favour for short or long periods. The Fund's investment approach as part of its investment strategy is Growth at Reasonable Price, performance relative to the benchmark may suffer in market conditions where a growth style is out of favour. The Benchmark is used for risk management and performance comparison purposes. The investment manager has complete discretion in making investments and is not constrained by the Benchmark. Source: Morningstar/Barings: Performance figures are shown in GBP on a NAV per unit basis, with gross income reinvested.

1. The benchmark is MSCI All Country World (Net Total Return) Index from 31 October 2024 and is a target benchmark. It was DAXglobal® Agribusiness (Total Net Return) Index from 31 August 2020 and previously DAXglobal® Agribusiness (Total Gross Return) Index.

\*Morningstar Rating as of previous month end, please refer to page 3 for additional detail.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Barings Global Agriculture Fund class A GBP Inc share was rated against the following numbers of EAA Fund Sector Equity Agriculture investments over the following time periods: 123 investments in the last three years, 80 investments in the last five years, and 53 investments in the last ten years. **Past performance is no guarantee of future results.**

Morningstar Rating is for the A share class only; other classes may have different performance characteristics.

#### NO OFFER:

The document is for informational purposes only and is not an offer or solicitation for the purchase or sale of any financial instrument or service in any jurisdiction. The material herein was prepared without any consideration of the investment objectives, financial situation or particular needs of anyone who may receive it. This document is not, and must not be treated as, investment advice, an investment recommendation, investment research, or a recommendation about the suitability or appropriateness of any security, commodity, investment, or particular investment strategy, and must not be construed as a projections or predictions.

In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved and before making any investment decision, it is recommended that prospective investors seek independent investment, legal, tax, accounting or other professional advice as appropriate.

Unless otherwise mentioned, the views contained in this document are those of Barings. These views are made in good faith in relation to the facts known at the time of preparation and are subject to change without notice. Individual portfolio management teams may hold different views than the views expressed herein and may make different investment decisions for different clients. Parts of this document may be based on information received from sources we believe to be reliable. Although every effort is taken to ensure that the information contained in this document is accurate, Barings makes no representation or warranty, express or implied, regarding the accuracy, completeness or adequacy of the information.

Target and projected returns are derived from Barings' proprietary model, which contain a number of assumptions and judgements about (including future projections of one month term SOFR rates as projected by forward curves at time of preparation, prepayment of a certain percentage of the overall model portfolio, and market interest rate for the loans that comprise the model portfolio, among others) that Barings believes are reasonable under the circumstances. Generally, our assumptions include construction projects proceeding according to plan, no modeled losses, and no adverse macroeconomic events, among others. However, there can be no assurance that such assumptions will prove to be accurate, and the actual realized returns will depend on, among other factors, future operating results, interest rates, economic and market conditions, and the value of the underlying assets at the time of disposition, any related transaction costs and the timing and manner of disposition, all of which may differ from the assumptions on which targets and projections are based and therefore, the actual results achieved may vary significantly from the targets and projections, and the variations may be material. We would be happy to provide you with the risks related to hypothetical performance information at your request.
