## JUNE 2024 / FACTSHEET

### KEY RISK

During exceptional market conditions there may be insufficient buyers and sellers to allow the Fund to buy and sell investments, which could affect the Fund's ability to meet investors' redemption requests. Losses may occur if an organisation through which we buy an asset fails to meet its obligations. Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care. Fund investments in derivatives are sensitive to changes in the value of the underlying asset on which they are based and their use may result in losses greater than the amount originally invested. Fund investments in overseas assets may lose value due to movements in foreign exchange rates. Fund investments in equities may be subject to significant fluctuations in value. The Fund can hold smaller company shares which can be more difficult to buy and sell and more volatile than those of larger companies. Fund investments in emerging markets may be subject to more risk due to economic, political or structural challenges. Further information on the Fund's risks can be found in the offering (constitutional) documents.

### OBJECTIVE

The investment objective of the Fund is to achieve long-term capital growth by investing in equities listed or traded on a wide range of global markets.

### STRATEGY & MARKETING OPPORTUNITY

The Fund invests in a concentrated portfolio of global leading companies that exhibit industry excellence, superior returns and long growth paths with the aim of producing superior risk-adjusted returns.

- Global universe enables the Fund to select attractive investment opportunities whilst diversifying across stocks, sectors and regions.
- Targeting compelling capital growth in a low growth world through bottom-up, active stock selection.

**PAST PERFORMANCE DOES NOT PREDICT FUTURE RETURNS.** An investment entails a risk of loss. Returns for periods greater than one year are annualized. If you are investing in a different currency to the base currency of the fund, your returns may increase or decrease as a result of currency fluctuations. The Benchmark is used for risk management and performance comparison purposes. The investment manager has complete discretion in making investments and is not constrained by the Benchmark.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Barings Global Leaders Fund class A USD Inc share was rated against the following numbers of EAA Fund Global Large-Cap Blend Equity investments over the following time periods: 4602 investments in the last three years, 3435 investments in the last five years, and 1841 investments in the last ten years. **Past performance is no guarantee of future results.**

Morningstar Rating is for the A share class only; other classes may have different performance characteristics.
