SEPTEMBER 2024 / FACTSHEET

KEY RISK

During exceptional market conditions there may be insufficient buyers and sellers to allow the Fund to buy and sell investments, which could affect the Fund's ability to meet investors' redemption requests. Losses may occur if an organisation through which we buy an asset fails to meet its obligations. Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care. Fund investments in derivatives are sensitive to changes in the value of the underlying asset on which they are based and their use may result in losses greater than the amount originally invested. Fund investments in overseas assets may lose value due to movements in foreign exchange rates. Fund investments in equities may be subject to significant fluctuations in value. The Fund can hold smaller company shares which can be more difficult to buy and sell and more volatile than those of larger companies. Fund investments in emerging markets may be subject to more risk due to economic, political or structural challenges. Further information on the Fund's risks can be found in the offering (constitutional) documents.

OBJECTIVE

The investment objective of the Barings Global Resources Fund is to achieve long-term capital appreciation through investment in a diversified portfolio of the securities of Commodity Producers, being companies engaged in the extraction, production, processing and/or trading of commodities eg, oil, gold, aluminum, coffee and sugar.

STRATEGY & MARKETING OPPORTUNITY

The Fund invests in a diversified portfolio of companies operating in the areas of Commodity Resources, Consumer Resources and Next Generation Resources with the aim of achieving superior risk-adjusted returns.

- Commodity Resources companies are cyclical commodity suppliers who achieve Growth typically through an inflection point in the commodity cycle and/or corporate self-help measures.
- Consumer Resources companies use a commodity input to produce a product that is sold to a customer - these companies are typically stable performers that offer compounding growth rates.
- Next Generation Resources companies benefit from emerging and potentially disruptive growth trends driven by changing customer needs.

PAST PERFORMANCE DOES NOT PREDICT FUTURE RETURNS. An investment entails a risk of loss. Returns for periods greater than one year are annualized. If you are investing in a different currency to the base currency of the fund, your returns may increase or decrease as a result of currency fluctuations. The Benchmark is used for risk management and performance comparison purposes. The investment manager has complete discretion in making investments and is not constrained by the Benchmark.
